our own project of reconstructing MacIntyre's theory of virtue in view of offering an account of virtue that is adequate. In this way our own project complements that of MacIntyre. *Routledge Encyclopedia of Philosophy*, 1998 [Indexing Specialties](#) Margie Towery, Enid L. Zafran, 2005. Compendium of Neurosymbolic Artificial Intelligence P. Hitzler, Md Kamruzzaman Sarker, Aaron Eberhart, 2023-08-04. If only it were possible to develop automated and trainable neural systems that could justify their behavior in a way that could be interpreted by humans like a symbolic system. The field of Neurosymbolic AI aims to combine two disparate approaches to AI: symbolic reasoning and neural or connectionist approaches such as Deep Learning. The quest to unite these two types of AI has led to the development of many innovative techniques which extend the boundaries of both disciplines. This book, *Compendium of Neurosymbolic Artificial Intelligence*, presents 30 invited papers which explore various approaches to defining and developing a successful system to combine these two methods. Each strategy has clear advantages and disadvantages, with the aim of most being to find some useful middle ground between the rigid transparency of symbolic systems and the more flexible yet highly opaque neural applications. The papers are organized by theme, with the first four being overviews or surveys of the field. These are followed by papers covering neurosymbolic reasoning, neurosymbolic architectures, various aspects of Deep Learning, and finally two chapters on natural language processing. All papers were reviewed internally before publication. The book is intended to follow and extend the work of the previous book, *Neurosymbolic artificial intelligence: The state of the art* (IOS Press, 2021), which laid out the breadth of the field at that time. Neurosymbolic AI is a young field which is still being actively defined and explored, and this book will be of interest to those working in AI research and development. [Advancing Phenomenology](#) Thomas Nenon, Philip Blosser, 2010-09-08. Philip Blosser and Thomas Nenon. The essays in the volume were assembled in honor of Lester Embree, who celebrated his 70th birthday on January 9, 2008. A preview of this volume was presented to Professor Embree at a reception sponsored by the Center for Advanced Research in Phenomenology that was held in his honor at the 2008 meeting of the Husserl Circle at Marquette University in Milwaukee, Wisconsin. The title *Advancing Phenomenology* is purposely ambiguous. On the one hand, these essays document the progress that phenomenology as an ongoing and vibrant movement has made in the period of over a century since its inception. They illustrate the advance of phenomenology both in terms of the range of topics represented in this volume and in terms of the disciplinary and geographical diversity of the scholars who have contributed to it. The topics range from scholarly appropriations of past achievements in phenomenology to concrete phenomenological investigations into

ethics gender and environmental philosophy as well as phenomenological reflections on the foundations of disciplines outside philosophy such as psychology history the social sciences and archeology The contributors come both from philosophy departments and from a number of disciplines outside of philosophy such as sociology psychology and archeology and they come from all around the world from North America from Western and Eastern Europe from Latin America and from several different countries in Asia
