Esbjerg Denmark Apart from the two day main event two workshops were also held the Workshop on Creating Social Semantic Web 2.0 Information Spaces and the Workshop on Wireless Sensor Networks Two hundred participants registered for the main conference from 24 countries and 43 papers were presented the two workshops had overwhelming support and over 400 delegates registered IMTIC 2008 served as a platform for international scientists and the engineering community in general and in particular for local scientists and the engineering community to share and cooperate in various fields of interest The topics presented had a reasonable balance between theory and practice in multidisciplinary topics The conference also had excellent topics covered by the keynote speeches keeping in view the local requirements which served as a stimulus for students as well as experienced participants The Program Committee and various other committees were experts in their areas and each paper went through a double blind peer review process The conference received 135 submissions of which only 46 papers were selected for presentation an acceptance rate of 34%

Mobile Wireless Middleware, Operating Systems, and Applications Ying Cai, Thomas Magedanz, Minglu Li, Jinchun Xia, Carlo Giannelli, 2010-11-30 The advances in wireless communication technologies and the proliferation of mobile devices have enabled the realization of intelligent environments for people to communicate with each other interact with information processing devices and receive a wide range of mobile wireless services through various types of networks and systems everywhere anytime A key enabler of this pervasive and ubiquitous connectivity environments is the advancement of software technology in various communication sectors ranging from communication middleware and operating systems to networking protocols and applications The international conference series on Mobile Wireless Middleware Operating Systems and Applications MOBILWARE is dedicated to address emerging topics and challenges in various mobile wireless software related areas The scope of the conference includes the design implementation deployment and evaluation of middleware operating systems and applications for computing and communications in mobile wireless systems MOBILWARE 2010 was the third edition of this conference which was made possible thanks to the sponsorship of ICST and Create Net and most importantly the hard work of the TPC and reviewers Similar to the last successful editions we had 35 submissions from 23 different countries this year reflecting the international interest for the conference topics After a thorough review process we finalized an excellent technical program including 18 regular papers and 4 short papers

Recent Advances in Parallel Virtual Machine and Message Passing Interface Yiannis Cotronis, Jack Dongarra, 2003-06-30 Parallel Virtual Machine PVM and Message Passing Interface MPI are the most frequently used tools for programming according to the message passing paradigm which is considered one of the best ways to develop parallel applications This volume comprises 50 revised contributions presented at the Eighth European PVM MPI Users Group Meeting which was held on Santorini Thera Greece 23-26 September 2001

The conference was organized by the Department of Informatics and Telecommunications University of Athens Greece This conference has been previously held in Balatofured Hungary 2000 Barcelona Spain 1999 Liverpool UK 1998 and Krakow

Poland 1997 The first three conferences were devoted to PVM and were held at the TU Munich Germany 1996 the ENS Lyon France 1995 and the University of Rome 1994 This conference has become a forum for users and developers of PVM MPI and other message passing environments Interaction between these groups has proved to be very useful for developing new ideas in parallel computing and for applying some of those already existent to new practical fields The main topics of the meeting were evaluation and performance of PVM and MPI extensions and improvements to PVM and MPI algorithms using the message passing paradigm and applications in science and engineering based on message passing The conference included one tutorial on MPI and 9 invited talks on advances in MPI cluster computing network computing Grid computing and parallel programming and programming systems These proceedings contain papers on the 46 oral presentations together with 4 poster presentations
