

A step-by-step guide to conducting a research project or thesis in education

Designed to be used during the research process, *Conducting Educational Research* walks readers through each step of a research project or thesis, including developing a research question, performing a literature search, developing a research plan, collecting and analyzing data, drawing conclusions, and sharing the conclusions with others. Throughout the book, Daniel J. Boudah covers all types of research (including experimental, descriptive, qualitative, group designs, and single subject designs) and helps readers link research questions to designs, designs to data sources, and data sources to appropriate analyses.

Key Features

- **Technology in Research boxes** help readers take advantage of related technologies and online resources
- **In Their Own Words** sections provide tips and suggestions from students who have completed projects
- **End of chapter Four Research Project in Action** sections prompt students to apply what they have learned to their current research projects
- **Active learning aids**, including chapter opening outlines and objectives and chapter ending summaries and discussion questions, help readers master the material

modelling provides a way of conceiving and resolving problems in people's everyday lives as well as sophisticated new problems for society at large. Mathematical modelling and real world applications are considered as having potential for cultivating sense making in classroom settings. This book focuses on the educational perspective researching the complexities encountered in effective teaching and learning of real world modelling and applications for sense making is only beginning. All authors of this volume are members of the International Community of Teachers of Mathematical Modelling ICTMA, the peak research body into researching the teaching and learning of mathematical modelling at all levels of education from the early years to tertiary education as well as in the workplace.

Artificial Intelligence (AI) and Customer Social Responsibility (CSR) Reem Khamis Hamdan, Amina Buallay, 2024-07-15 The impact of artificial intelligence AI on business and society has been significant with the incorporation of AI technologies such as robots, facial recognition algorithms and natural language processing into business leading to both corporate benefits and potential challenges for stakeholders. The question of how to engage in responsible business practices in the era of AI is an important one and there is a need for more research on the relationship between AI and corporate social responsibility CSR. As AI becomes more prevalent there is a growing focus on the ethical implications of AI and the potential for AI to perpetuate biases or to displace human workers. CSR initiatives can include considerations of ethical AI in the development and use of AI systems. AI has the potential to solve many global challenges and improve people's lives but it can also have negative consequences if not developed and used responsibly. CSR initiatives can focus on the social impact of AI including efforts to ensure that the benefits of AI are distributed fairly and that AI is used for the common good. CSR initiatives often involve engaging with stakeholders including employees, customers and communities to understand their needs and concerns and to ensure that their interests are taken into account. This can include engaging with stakeholders about the use of AI in the organization and its potential impacts. The adoption of AI in business is changing many aspects of doing business in a socially responsible manner and there is a need to examine the potential unethical behaviors and novel ways of engaging in CSR that may arise. This book aims to focus on AI and CSR and to advance our understanding of the role of AI in organizations and the literature on CSR by assembling high quality papers with a strong connection between theory and practice.

Product Lifecycle Management. Green and Blue Technologies to Support Smart and Sustainable Organizations Osiris Canciglieri Junior, Frédéric Noël, Louis Rivest, Abdelaziz Bouras, 2022-02-08 The two volume set IFIP AICT 639 and 640 constitutes the refereed post conference proceedings of the 18th IFIP WG 5.1 International Conference on Product Lifecycle Management PLM 2021 held in Curitiba, Brazil during July 11-14, 2021. The conference was held virtually due to the COVID-19 crisis. The 107 revised full papers presented in these proceedings were carefully reviewed and selected from 133 submissions. The papers are organized in the following topical sections: Volume I Sustainability, sustainable development and circular economy, sustainability and information technologies and services, green and blue technologies, AI and blockchain integration with enterprise applications.
