Nielsen, 2015-07-01 What role should students take in shaping their education, their university, and the wider society? These questions have assumed new importance in recent years as universities are reformed to become more competitive in the global knowledge economy. With Denmark as the prism, this book shows how negotiations over student participation, influenced by demands for efficiency, flexibility, and student-centered education, reflect broader concerns about democracy and citizen participation in increasingly neoliberalised states. Combining anthropological and historical research, Gritt B. Nielsen develops a novel approach to the study of policy processes and opens a timely discussion about the kinds of future citizens who will emerge from current reforms. **Figurative Language and Thought** Albert N. Katz, Cristina Cacciari, Raymond W. Gibbs Jr., Mark Turner, 1998-09-10 Our understanding of the nature and processing of figurative language is central to several important issues in cognitive science, including the relationship of language and thought, how we process language, and how we comprehend abstract meaning. Over the past fifteen years, traditional approaches to these issues have been challenged by experimental psychologists, linguists, and other cognitive scientists interested in the structures of the mind and the processes that operate on them. In *Figurative Language and Thought*, internationally recognized experts in the field of figurative language, Albert Katz, Mark Turner, Raymond W. Gibbs Jr., and Cristina Cacciari, provide a coherent and focused debate on the subject. The book's authors discuss a variety of fundamental questions, including: What can figures of speech tell us about the structure of the conceptual system? If and how should we distinguish the literal from the nonliteral in our theories of language and thought? Are we primarily figurative thinkers, and consequently figurative language users, or the other way around? Why do we prefer to speak metaphorically in everyday conversation when

literal options may be available for use Is metaphor the only vehicle through which we can understand abstract concepts What role do cultural and social factors play in our comprehension of figurative language These and related questions are raised and argued in an integrative look at the role of nonliteral language in cognition This volume a part of Counterpoints series will be thought provoking reading for a wide range of cognitive psychologists linguists and philosophers Postwar Figures of L'ephemere James Petterson,2000-09 The question of the relationship between aesthetics and history is reconsidered in this study of these postwar poets Petterson argues that postwar French poetry is a critical poetry encompassing a vast poetic tradition from poets such as Baudelaire and Rimbaud to Francis Ponge and Paul Celan The author also shows how the critical writings of Hegel Heidegger and Ricoeur among others suggest that what he calls postwar poetry s will to meaning and its attempt to develop a post Romantic poetics necessarily questions poetry s ties to philosophical historical and political narratives **Figurative Language** George H. Reibold,1925 *Francis Bacon* Gilles Deleuze,2005-01-01 Francis Bacon is Deleuze s long awaited work on Bacon widely regarded as the one of the most radical painters of the twentieth century The book presents a deep engagement with Bacon s work and the nature of art Deleuze analyses the distinctive innovations that came to mark Bacon s style while introducing a number of his own famous concepts Deleuze links Bacon s work to Cezanne s notion of a logic of sensation which reaches its summit in colour Investigating this logic Deleuze explores Bacon s crucial relation to past painters such as Velasquez Cezanne and Soutine as well as Bacon s rejection of expressionism and abstract painting **Figure** Celia Lury,William Viney,Scott Wark,2022-10-26 This open access book shows how figures figuring and configuration are used to understand complex contemporary problems Figures are images numbers diagrams data and datasets turns of phrase and representations Contributors reflect on the history of figures as they have transformed disciplines and fields of study and how methods of figuring and configuring have been integral to practices of description computation creation criticism and political action They do this by following figures across fields of social science medicine art literature media politics philosophy history anthropology and science and technology studies Readers will encounter figures as various as Je Suis Charlie MeToo social media personae gardeners asthmatic children systems configuration management and cloud computing all demonstrate the methodological utility and contemporary relevance of thinking with figures This book serves as a critical guide to a world of figures and a creative invitation to go figure Figurative Language and Thought Albert N. Romans: Three Exegetical Interpretations and the History of Reception Daniel Patte, 2018-07-26 In the first of a three volume work Daniel Patte presents three very different critical exegeses of Romans 1 arguing that all are equally legitimate and hermeneutically plausible By expanding upon and respecting the exegeses of many erudite scholars of the last two centuries Patte concludes that three families of vastly different critical interpretations are fully justified traditional philological and epistolary studies rhetorical and sociocultural studies and figurative studies of the coherence of Paul's teaching Arising from a long standing interdisciplinary investigation of many receptions of Romans in light of recent diversification of exegetical methodologies Patte concludes that the interpretation of a scriptural text necessarily involves making a choice among equally legitimate and plausible alternatives and second that this choice is always contextual and ethical When these points are denied by failing to respect the interpretations of others and absolutizing one's interpretation instead of being a scriptural blessing Romans becomes a deadly weapon against others heretics Jews Shoah and many others The result is a threefold commentary of Romans 1 that is unique in its scope and thorough going exegesis
