third edition of the foundational volume in Asian American studies *Who are Asian Americans Moving beyond popular stereotypes of the model minority or forever foreigner* most Americans know surprisingly little of the nation's fastest growing minority population Since the 1960s when different Asian immigrant groups came together under the Asian American umbrella they have tirelessly carved out their presence in the labor market education politics and pop culture Many times they have done so in the face of racism discrimination sexism homophobia and socioeconomic disadvantage Today contemporary Asian America has emerged as an incredibly diverse population with each segment of the community facing its unique challenges When *Contemporary Asian America* was first published in 2000 it exposed its readers to the formation and development of Asian American studies as an academic field of study from its inception as part of the ethnic consciousness movement of the 1960s to the systematic inquiry into more contemporary theoretical and practical issues facing Asian America at the century's end It was the first volume to integrate a broad range of interdisciplinary research and approaches from a social science perspective to assess the effects of immigration community development and socialization on Asian American communities This updated third edition discusses the impact of September 11 on Asian American identity and citizenship the continued influence of globalization on past and present waves of immigration and the intersection of race gender sexuality and class on the experiences of Asian immigrants and their children The volume also provides study questions and recommended supplementary readings and documentary films This critical text offers a broad overview of Asian American studies and the current state of Asian America

*Riding the Academic Freedom Train* Jeanett Castellanos, Joseph L. White, Veronica Franco, 2023-07-03 Mentoring demonstrably increases the retention of undergraduate and graduate students and is moreover invaluable in shaping and nurturing academic careers With the increasing diversification of the student body and of faculty ranks there's a clear need for culturally responsive mentoring across these dimensions Recognizing the low priority that academia has generally given to extending the practice of mentoring let alone providing mentoring for Black indigenous and people of color BIPOC and first generation students this book offers a proven and holistic model of mentoring practice developed in the field of psychology that not only helps mentees navigate their studies and the academy but provides them with an understanding of the systemic and racist barriers they will encounter validates their cultural roots and contributions and attends to their personal development Further recognizing the demands that mentoring places on already busy faculty the model addresses ways of distributing the work inviting White and BIPOC faculty to participate developing mentees capacities to mentor those that follow them building a network of mentoring across generations and adopting group mentoring Intentionally planned and implemented the model becomes self-perpetuating building an intergenerational cadre of mentors who can meet the growing and continuing needs of the BIPOC community Opening with a review of the salient research on effective mentoring and chapters that offer minority students views on what has worked for them as well as reflections by faculty mentors the core of the book describes the Freedom Train model

developed by the godfather of Black psychology Dr Joseph White setting out the principles and processes that inform the Multiracial Multiethnic Multicultural M3 Mentoring Model that evolved from it and offers an example of group mentoring While addressed principally to faculty interested in undertaking mentoring and supporting minoritized students and faculty the book also addresses Deans and Chairs and how they can create Freedom Train communities and networks by changing the cultural climate of their institutions providing support and modifying faculty evaluations and rewards that will in turn contribute to student retention as well as creative and productive scholarship and research This is a timely and inspiring book for anyone in the academy concerned with the success of BIPOC students and invigorating their department s or school s scholarship

**Education at War** Arshad Imtiaz Ali, 2018-04-10 Education at War The Fight for Students of Color in America s Public Schools attempts to shape educational research and practice to more explicitly consider the relationship between education capitalism and war and more specifically its impact on students of color The authors as a whole contend that the contemporary specter of war has become a central way that racism and materialism become manifested and practiced within education In particular this collection asserts that the contemporary neoliberal characterization of education and school based reform is situated within the global political economy that has facilitated a growth in the prison and military industrial complex and simultaneous divestment in education domestically within the U S Education at War attempts to make research relevant by bringing the tensions within young people s lives to the fore The heavy shadow cast by recent U S led wars re organizes the sites of learning and teaching nationally as well as differentially within specific sites and upon particular communities Nonetheless the examination of this context is not enough Rather we consider how such a contemporary context can facilitate educational spaces for communities and youth to grow their vision for a different and hopefully a more humanizing future Thus the book contributors will collectively explore how resistance can produce the opportunity for rich diverse and transformative learning for marginalized students and communities The lives of People of Color are the forefront of Education at War The Fight for Students of Color in America s Public Schools Whereas there are many attempts to theorize about the global implications of war less attention is paid to the ways that war shapes young lives in the U S particularly in an educational context The book addresses the absence of youth centered discussions regarding education during a political context of neoliberalism and war and provides important perspectives on which to ground critical discussions among students and families education scholars and practitioners and policymakers

**The Misrepresented Minority** Samuel D. Museus, Dina C. Maramba, Robert T. Teranishi, 2023-07-03 While Asian Americans and Pacific Islanders AAPIs are growing faster than any other racial group in the U S they are all but invisible in higher education and generally ignored in the research literature and thus greatly misrepresented and misunderstood This book presents disaggregated data to unmask important academic achievement and other disparities within the population and offers new insights that promote more authentic understandings of the realities masked by the designation of AAPI In offering new perspectives conceptual

frameworks and empirical research by seasoned and emerging scholars this book both makes a significant contribution to the emerging knowledge base on AAPIs and identifies new directions for future scholarship on this population Its overarching purpose is to provide policymakers practitioners and researchers in higher education with the information they need to serve an increasingly important segment of their student populations In dispelling such misconceptions as that Asian Americans are not really racial minorities the book opens up the complexity of the racial and ethnic minorities within this group and identifies the unique challenges that require the attention of anyone in higher education concerned with student access and success as well as the pipeline to the professoriate
