Creative Strategy William Duggan, 2014-09-02 William Duggan s 2007 book Strategic Intuition showed how innovation really happens in business and other fields and how that matches what modern neuroscience tells us about how creative ideas form in the human mind In his new book Creative Strategy Duggan offers a step by step guide to help individuals and organizations put that same method to work for their own innovations Duggan s book solves the most important problem of how innovation actually happens Other methods of creativity strategy and innovation explain how to research and analyze a situation but they don t guide toward the next step developing a creative idea for what to do Or they rely on the magic of brainstorming just tossing out ideas Instead Duggan shows how creative strategy follows the natural three step method of the human brain breaking down a problem into parts and then searching for past examples to create a new combination to solve the problem That s how innovation really happens Duggan explains how to follow these three steps to innovate in business and any other field as an individual a team or a whole company The crucial middle step the search for past examples takes readers beyond their own brain to a what works scan of what others

have done within and outside of the company industry and country It is a global search for good ideas to combine as a new innovation Duggan illustrates creative strategy through real world cases of innovation that use the same method from Netflix to Edison from Google to Henry Ford He also shows how to integrate creative strategy into other methods you might currently use such as Porter s Five Forces or Design Thinking Creative Strategy takes the mystery out of innovation and puts it within your grasp

Project-Based Learning Applied to the Language Classroom Juliana Franco Tavares/ Louise Emma Potter, 2018-03-05 In Project Based Learning Applied to the Language Classroom the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language It is about teaching English as a second or foreign language using Project Based Learning PBL We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it but feel that there aren't enough materials based on this methodology In fact most researchers and writers we have come across discuss the applications of PBL in the students mother tongue to subjects such as Math History Literature Social Studies and Science However there are few published works about the specifics of PBL in foreign language classes Besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language
