**Economics, Culture and Development** Eiman O. Zein-Elabdin, 2017-09-19. This book examines the treatment of culture and development in the discipline of economics, thereby filling a conspicuous gap in current literature. Economics has come a long way to join the cultural turn that has swept the humanities and social sciences in the last half century. This volume identifies some of the issues that major philosophies of economics must address to better grasp the cultural complexity of contemporary economies. This book is an extensive survey of the place of culture and development in four theoretical economic perspectives: Neoclassical, Marxian, Institutional, and Feminist. Organized in nine chapters with three appendices and a compendium of over 50 interpretations of culture by economists, this book covers vast grounds from classical political economy to contemporary economic thought. The literatures reviewed include original and new institutionalism, cultural economics, postmodern Marxism, economic feminism, and the current culture and development discourse on subjects such as economic growth in East Asia, businesswomen entrepreneurs in West Africa, and comparative development in different parts of Europe. Zein Elabdin carries the project further by borrowing some of the insights from postcolonial theory to call for a more profound rethinking of the place of culture and of currently devalued cultures in economic theory. This book is of great interest for those who study Economic development, International relations, feminist economics, and Economic geography.

**The Cultural Political Economy of the Construction Industry in Turkey** Ismail Doga Karatepe, 2020-10-20. The Cultural Political Economy of the Construction Industry in Turkey analyses the growth of the popularity of the Justice and Development Party (official acronym AK Parti or AKP) of Turkey's president Erdogan through the lens of the construction sector. It provides a comprehensive analysis of the question of hegemony and the electoral success of the AKP despite frequent economic downturns and ferocious political conflicts, including a coup d'état attempt and rekindled armed struggles. In this book, Ismail Doga Karatepe critically examines the AKP's ability to satisfy the needs and wishes of different social classes and groups. By taking the construction sector as an example, the book analyses these in the context of the changes in the urban landscape of modern Turkey.

**Knowledge for Governance** Johannes Glückler, Gary Herrigel, Michael Handke, 2021-01-14. This open access book focuses on theoretical and empirical intersections between governance, knowledge, and space from an interdisciplinary perspective. The contributions elucidate how knowledge is a prerequisite as well as a driver of governance efficacy and conversely how governance affects the creation and use of knowledge and innovation in geographical context. Scholars from the fields of anthropology, economics, geography, public administration, political science, sociology, and organization studies provide original theoretical discussions along these

interdependencies Moreover a variety of empirical chapters on governance issues ranging from regional and national to global scales and covering case studies in Australia Europe Latina America North America and South Africa demonstrate that geography and space are not only important contexts for governance that affect the contingent outcomes of governance blueprints Governance also creates spaces It affects the geographical confines as well as the quality of opportunities and constraints that actors enjoy to establish legitimate and sustainable ways of social and environmental co existence *The Rejuvenation of Political Economy* Nobuharu Yokokawa, Kiichiro Yagi, Hiroyasu Uemura, Richard Westra, 2016-04-14 This book provides the basic knowledge of Japanese contributions in political economy and the ongoing research agenda such as the pursuit of theoretical consistency in Marxian economics by Uno School the concept of civil society as a criterion of existing socio economic structure a mathematical reconstruction of Marxian theory and an analysis of environmental pollution The new generation of Japanese political economists in collaboration with their overseas counterparts has produced new insights into political economy and into the newly emerging structure of the world economy The book provides useful insights into international capitalism and how past patterns of uneven development are now changing the role of international finance in affecting both national and international growth and employment patterns an analysis of recent growth patterns in Asia and the specific issue emerging within the Asian region and the implications for economics social change and geopolitics

**Representing Public Credit** Natalie Roxburgh, 2015-12-22 Public credit was controversial in seventeenth and eighteenth century England It entailed new ways of thinking about the individual in relation to the State and was for many reasons a site of cultural negotiation and debate At the same time it required commitment from participants in order to function Some of the debates relating to public credit whose success was tied up in the way it was represented find their way into contemporary fiction in particular the eighteenth century novel This book reads eighteenth century fiction alongside works of political economy in order to offer a new perspective on credible commitment and the rise of a credit economy facilitated by public credit Works by authors such as Daniel Defoe Samuel Richardson and Frances Burney are explored alongside lesser known fictional texts including some early narratives and novels of sensibility to give a fully rounded view of the perception of public credit within England and its wider cultural and social implications Strategies for representing public credit the book argues can be seen as contributing to the development of the English novel a type of fiction whose emphasis on the individual can also be read as helping to produce a certain type of person the modern financial subject This interdisciplinary book draws from economic history and literary cultural studies in order to make connections between the development of finance and an important facet of modern Western culture the novel *Crisis in Sri Lanka and the World* Asoka Bandarage, 2023-05-22 This book provides a broad picture of Sri Lanka's ongoing political and economic crisis as the culmination of several centuries of colonial and neo colonial developments The book presents the Sri Lankan crisis as an exemplification of a broader global existential crisis facing more and more debt trapped countries especially in the post

colonial Global South The book's in depth case study raises important questions pertaining to sovereignty and political and economic democracy in Sri Lanka and the world at large The book also explores the emergence of the crisis in the context of the accelerating geopolitical conflict between China and the USA in the Indian Ocean It ponders if the debt crisis economic collapse and political destabilization in Sri Lanka were intentionally precipitated to the advantage of the Quadrilateral Alliance USA India Australia and Japan Moving beyond geopolitical rivalry the book juxtaposes Sri Lanka's political economic crisis with the broader ecological crisis of climate change and sea level rise The book concludes with a consideration of the ethical dilemmas behind the debt and survival crisis in Sri Lanka and across the world It points out a range of social movements and initiatives in Sri Lanka and the Global South which subscribe to collective and ecological alternatives and a Middle Path of sustainability and social justice

**Global Libidinal Economy** Ilan Kapoor, Gavin Fridell, Maureen Sioh, Pieter de Vries, 2023-05-01 This is the first book to examine global political economy from a psychoanalytic perspective It claims that the libidinal the site of unconscious desire plays not a supplementary or trivial but a constitutive role in global political economy Consumption for example is not simply a way of satisfying a material or biological need but a doomed attempt at soothing our deeply held sense of loss and capital is not just a means to material growth and prosperity but is invested with drive that seduces beguiles and manipulates in the service of unending accumulation Thus in contrast to political economy which assumes a rational subject libidinal economy is founded on the notion of a desiring subject who obeys a logic not of good sense or self interest but profligacy and irrationality By applying a psychoanalytic lens Global Libidinal Economy thereby seeks to uncover the unconscious excesses and antagonisms emergent in such key political economy categories as production trade and ecology while also bringing out significant contemporary themes relating to gender and race

global governance of the political economy      **Global Political Economy** Robert O'Brien, Marc Williams, 2024-11-14  
Offering an accessible introduction to both the historical roots and the contemporary dynamics of today's world economy this seventh edition equips students with the knowledge required to make sense of the fast paced discipline of the global political economy. Illustrating the breadth of the subject the authors show how the national and the international interact while also placing an emphasis on the historical evolution of the world economy in order to appreciate the nuances of today's economy structures. It gives students a firm grounding in both traditional and critical theories of global political economy. Tracing the global economy from its early origins through each phase of a shifting world order the book takes a non Eurocentric approach covering both traditional elements of the global economy such as trade and finance while also addressing important contemporary areas of concern including social inequality, cryptocurrencies, populism and protectionism. Reflecting the latest empirical and scholarly developments this new edition offers a new chapter on race in the global economy in dialogue with the growing body of postcolonial literature in the field. A new chapter on health and the global economy examining the interactions between the economy and health and discussing the ongoing implications of COVID 19. Analysis of key contemporary challenges including sustainable development, environmental concerns and security issues. Extensive companion website resources for lecturers and students including multiple choice questions, mock essay questions and examples, flashcards and chapter by chapter PowerPoint slides. This authoritative and accessible guide to the global political economy is the ideal companion for students at undergraduate and postgraduate levels taking politics, international relations and related degrees.      **Science in a Time of Crisis: Communication, Engagement and the Lived Experience of the Covid-19 Pandemic** Dara M. **The Crisis and Renewal of American Capitalism** Laurence Cossu-Beaumont, Jacques-Henri Coste, Jean-Baptiste Velut, 2015-12-22. Despite the reversal of America's fortune from the triumphalism of the Roaring Nineties to the gloom of the lost decade and the Great Depression, theoretical conceptions of US capitalism have remained surprisingly unchanged. In fact, if the crisis questioned the sustainability of the US capitalist paradigm, it did not fundamentally challenge academic theorization of American political economy. This book departs from the American political economy literature to identify three common myths that have shaped our conceptualization of US capitalism: its reduction to a state-market dyad, disembedded from societal factors, the illusion of a weak state and the synchronic conception of the US variety of capitalism. To remedy these pitfalls the authors propose a civilizational approach to American political economy at the crossroads between cultural studies, history, sociology and political science. Drawing together contributions from a rich variety of fields from geography to cultural studies, political science and sociology, this work sheds a new light on America's cultural political economy, combining theoretical reflection with empirical data and offering innovative perspectives on the crisis and renewal of American capitalism.      **Governing Carbon Dioxide Removal** Rob Bellamy, Oliver Geden, Mathias Fridahl, Emily Cox, James

By March 2020 COVID 19 had affected nearly every community on earth either with infections or with mobility restrictions Significant peer reviewed research effort has gone into understanding the virus and its spread mainly from an epidemiological and medical perspective Political ecologists have been somewhat critical of such analyses because of their failure to understand the sociality of COVID 19 and its emergence They emphasise the need to look for how the virus has acted upon inclusions and exclusions and current cleavages in society despite the fact that it can potentially attack anyone anywhere Commentaries have therefore drawn attention to the more than human assemblages that allowed COVID 19 to infect humans global food chains and capitalism and social inequalities that underpin uneven exposure and access to health care In this Research Topic we seek papers that engage with political ecologies of COVID 19 We welcome articles that are based on empirical research in specific contexts attempting to understand the impacts of the viral outbreak as well as articles which lay out research agendas for political ecologies of COVID 19 What questions need to be asked What does it mean to take a socionatural and political ecological approach What can we learn from the state s response in different places How can such analyses add to the global conversation about the pandemic

*The Micro-politics of Microcredit* Mohammad Jasim Uddin,2015-05-01 Microcredit has been seen in recent decades as having great potential for aiding development in poor developing countries with Bangladesh being one of the countries which has pioneered microcredit and implemented it most widely This book based on extensive original research explores how microcredit works in practice and assesses its effectiveness It discusses how microcredit usually channelled through women is often passed to the men of the family a practice disapproved of by some but regarded as acceptable by borrowers who have a communal approach to debt rather than viewing debt as something held by single individuals The book demonstrates how the rules around microcredit are often seem as irksome by the borrowers how lenders often charge high rates of interest and work primarily to preserve their institutions thereby going against the spirit of the microcredit movement and how borrowers often end up on a downward spiral deeper and deeper in debt Overall the book argues that although microcredit does much good it also has many drawbacks
