Synergies Created by a Strategic Fit between Business and Human Resource Strategies Wilson J. Osito Odiyo, 2013-07-26

This text is an important addition to the ongoing discourse on strategic management, particularly strategic human resource management. It is a result of research carried out in the agricultural sector in general and on multinational tea firms in particular. The author's hands-on and conceptual insights gained through nineteen years of experience across African countries make the text a useful tool for company boards of directors and strategic level managers charged with the formulation and implementation of business and human resource strategies. In addition, it provides justification to HR managers of the need to shift focus from primarily being concerned with routine transactional HR activities to dealing with transformational ones which are contingent on the circumstances of the organization. Scholars, management consultants, and management students will also find the contents of this book to be of great interest and benefit. It is now sufficiently recognised that management has to be concerned with deliverables rather than abstractions. Therefore, many firms formulate and implement one form of business strategy or the other. However, strategies cannot be conceived, let alone realised, without human resource input. The question that HR continues to grapple with, therefore, is how it can demonstrate the contribution of each employee to the bottom line and business sustainability. How this question is to be answered has not always been explained and is even more crucial for the agricultural firms which are characterized by great instability in terms of weather patterns, commodity prices, currency exchange rates, and wage levels. HR planning in these circumstances cannot be a simple exercise; but getting it right is more important than for organizations in more predictable environments. This book moves away from the romanticization of the role of HRM in such organizations and instead provides empirical evidence of the types of business and human resource strategies employed, strategic integration between these strategies and the strategic human resource management processes and practices used. Finally, it considers the concomitant synergies achieved by strategic fit between business and human resource strategies and their role in achieving sustainable competitive advantage.

Essentials of Strategic Management Thomas Wunder, 2023-03-22. Written in English, this practice-oriented textbook covers all stages of the strategy process. Besides strategic analysis, strategy formulation, and business model innovation, the true challenges of strategic management will also be explained in detail: strategy execution and transformation. The context of strategy is currently experiencing radical changes in the world economy, planetary health, and socio-political foundations. In the era of sustainability, corporate leaders need to rethink their strategic management approach to effectively deal with these new and disruptive market situations. Sustainable strategizing is considered essential for future-proofing today's enterprises transforming markets and leading the way toward a sustainable future for both business and society. As a response to these developments, this updated and expanded edition continues to present the essentials of contemporary strategic management but it also identifies, explores, and integrates ecological and social sustainability considerations to a great extent. As a result, key concepts of sustainable strategizing, from mindsets, impact materiality, and purpose to business cases, sustainable business models, regeneration, and transformation, have been embedded and enhanced in the entire book. Other advancements are in the areas of dynamic capabilities, organizational ambidexterity, open strategy, the business ecosystem perspective, and strategic control. Including a wealth of real-life strategy practice examples and strategic snapshots, including a hands-on strategy workout, exercises, and review questions for students, including teaching aids for lecturers.
