Ethics For A Brave New World Second Edition Updated And Expanded:

Ethics for a Brave New World, Second Edition (Updated and Expanded) John S. Feinberg, Paul D.

Feinberg, 2010-11-04 Aldous Huxley's 1932 book *Brave New World* foresees a world in which technological advances have obliterated morality and freedom. John Feinberg and Paul Feinberg in the first edition of *Ethics for a Brave New World* noted how Huxley landed frighteningly close to the truth. Their book responded to ethical crises such as abortion, euthanasia, capital punishment, and genetic engineering by looking to Scripture for principles to guide us through the moral quagmires of our time. Now dramatically updated and expanded, this edition of *Ethics for a Brave New World* seeks to maintain the relevance, rigorous scholarship, and biblical faithfulness of the first edition. While many of the topics covered in the book remain the same, John Feinberg has revised each chapter to keep it current with contemporary trends and to respond to the most recent scholarship. There is a new chapter on stem cell research and greatly expanded material on issues such as homosexuality and genetic engineering. This important resource will be a valuable guide for students and those seeking answers to ethical dilemmas.

Ethics for a Brave New World John S. Feinberg, Paul D. Feinberg, 2010. This updated and revised second edition analyzes the current literature regarding various ethical issues. Includes a new chapter on stem cell research and expanded material on other topics.

Routledge International Handbook of Food Studies Ken Albala, 2013-05-07. Over the past decade there has been a remarkable flowering of interest in food and nutrition both within the popular media and in academia. Scholars are increasingly using foodways, food systems, and eating habits as a new unit of analysis within their own disciplines, and students are rushing into classes and formal degree programs focused on food. Introduced by the editor and including original articles by over thirty leading food scholars from around the world, the *Routledge International Handbook of Food Studies* offers students, scholars, and all those interested in food-related research a one-stop, easy-to-use reference guide. Each article includes a brief history of food research within a discipline or on a particular topic, a discussion of research methodologies and ideological or theoretical positions, resources for research including archives, grants, and fellowship opportunities, as well as suggestions for further study. Each entry also explains the logistics of succeeding as a student and professional in food studies. This clear, direct Handbook will appeal to those hoping to start a career in academic food studies, as well as those hoping to shift their research to a food-related project. Strongly interdisciplinary, this work will be of interest to students and scholars throughout the social sciences and humanities.

The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne Howell, Nikolai Kremmentsov, 2021-12-02. The idea that morally, mentally, and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals, leaders, and reformers throughout history. This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century. The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here. The book

focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind

Brave New World? Celia Deane-Drummond, 2003-11-01 One of the key issues facing us in the next millennium is the ability to manipulate the genetics of living organisms The possibility of manipulating human genetics raises many theological ethical and socio political issues These include specific decisions about whether the technology will be developed how it will be applied and more general questions about the technical manipulation of natural processes From a theological perspective the human genome project not only challenges particular doctrines such as that of creation eschatology and anthropology but also raises particular issues of social justice and medical ethics The purpose of this book is to bring together the collective expertise of theologians scientists and social scientists in order to provide a forum for critique and public debate focused on the human genome project It is hoped that the results presented in this book offer a sophisticated theological and ethical response

Reading Faithfully - Volume One Hans W Frei, 2017-04-27 Hans Frei 1922 1988 was perhaps the leading Anselmian theologian of his generation His influence is extensive in contemporary theology and his work marks the beginning of a decisive shift in biblical interpretation Reading Faithfully which is the first of two volumes is a special collection that includes a wide range of his letters lectures book reviews and other items many of them not previously available in print Analytical and perceptive Frei's writings expands his arguments about the meaning and truth of scriptural narrative distinguishing his ideas from other forms of narrative or story theology as well as exploring the kinds of political theology consistent with his typological imagination Alongside Volume II this is an invaluable resource that provides new insights into the nature and implications of Frei's work It is essential reading for anyone with an interest in the development of religious thought and understanding

Colonialism and the Emergence of Science Fiction John Rieder, 2013-01-01 This groundbreaking study explores science fiction's complex relationship with colonialism and imperialism In the first full length study of the subject John Rieder argues that the history and ideology of colonialism are crucial components of science fiction's displaced references to history and its engagement in ideological production With original scholarship and theoretical sophistication he offers new and innovative readings of both

acknowledged classics and rediscovered gems Rider proposes that the basic texture of much science fiction in particular its vacillation between fantasies of discovery and visions of disaster is established by the profound ambivalence that pervades colonial accounts of the exotic other Includes discussion of works by Edwin A Abbott Edward Bellamy Edgar Rice Burroughs John W Campbell George Tomkyns Chesney Arthur Conan Doyle H Rider Haggard Edmond Hamilton W H Hudson Richard Jefferies Henry Kuttner Alun Llewellyn Jack London A Merritt Catherine L Moore William Morris Garrett P Serviss Mary Shelley Olaf Stapledon and H G Wells

The Ethics of Superintelligent Design Paul Golata,2018-03-07 Artificial intelligence AI permeates Google searches the personal assistants in our smartphones and is all over our newsfeeds Watson s machine learning has already started to revolutionize many important industries including oncology law finance and entertainment The idea that man is about to increase his immediate surroundings with exponential gains in the level of intelligence over the coming generations is based upon a technological revolution and the potential for artificial superintelligence ASI It is within this context that there is a prevailing need for a discussion of its ethical implications As a Christian ethicist Paul Golata believes that the need for this conversation to be informed by Christian principles is imperative ASI is a move toward the proper handling of information However how a society interprets and applies this information is actually more pertinent than the raw amount of information it possesses This important ethical conversation is being led by humanistic thinkers who assume that all of reality is just matter in motion and that mind is nothing more than electrochemical activity in the wetware of human brains The Ethics of Superintelligent Design critically examines and challenges some of the most important trajectories of ASI while upholding the authority and inerrancy of the Bible the supernatural creation account a realistic view of the state of humanity and biblical ethics

Exploring Lacan's Encore Seminar XX Raul Moncayo,Barri Belnap,Greg Farr,2024-02-29 Exploring Lacan s Encore Seminar XX examines the themes presented in Encore the seminar presented by Lacan between 1972 and 1975 Raul Moncayo Barri Belnap and Greg Farr focus on Lacan s presentation of the theory of the Third Jouissance clarifying the difference between jouissance as a concept and as a word The authors argue that although there are many words that Lacan uses for jouissance there are only five concepts of jouissance the first is inconvenient the second is convenient and inconvenient while the last three are convenient and constructive Exploring Lacan s Encore Seminar XX will be essential reading for academics and scholars of Lacanian studies Lacanian analysts and readers interested in Lacan s theories of the 1970s

Cultural Heritage Ethics Constantine Sandis,2014-10-13 Theory without

practice is empty practice without theory is blind to adapt a phrase from Immanuel Kant The sentiment could not be truer of cultural heritage ethics This intra disciplinary book bridges the gap between theory and practice by bringing together a stellar cast of academics activists consultants journalists lawyers and museum practitioners each contributing their own expertise to the wider debate of what cultural heritage means in the twenty first century Cultural Heritage Ethics provides cutting edge arguments built on case studies of cultural heritage and its management in a range of geographical and cultural contexts Moreover the volume feels the pulse of the debate on heritage ethics by discussing timely issues such as access acquisition archaeological practice curatorship education ethnology historiography integrity legislation memory museum management ownership preservation protection public trust restitution human rights stewardship and tourism This volume is neither a textbook nor a manifesto for any particular approach to heritage ethics but a snapshot of different positions and approaches that will inspire both thought and action Cultural Heritage Ethics provides invaluable reading for students and teachers of philosophy of archaeology history and moral philosophy and for anyone interested in the theory and practice of cultural preservation

Ethics, Humans and Other Animals Rosalind Hursthouse, 2013-02-01 This introductory textbook is ideally suited to newcomers to philosophy and ethical problems Rosalind Hursthouse carefully introduces the three standard approaches in current ethical theory utilitarianism rights and virtue ethics She links each chapter to readings from key exponents such as Peter Singer and Mary Midgley and asks students to think critically about these readings for themselves Key features include clear activities and activities chapter summaries and guides to further reading Bioethics and the Law George Patrick Smith, 1993 Ethical challenges Rationing health care Ethics committees Informed decisionmaking Embryonic and fetal experimentations Wrongful life or wrongful birth Procreational restraints Surrogation Fetal abuse Of clones and cryons The right to die with dignity **CONTEMPORARY MORAL ISSUES SECOND EDITION**, 1968

Science Fiction and the Moral Imagination Russell Blackford, 2017-09-05 In this highly original book Russell Blackford discusses the intersection of science fiction and humanity's moral imagination With the rise of science and technology in the 19th century and our continually improving understanding of the cosmos writers and thinkers soon began to imagine futures greatly different from the present Science fiction was born out of the realization that future technoscientific advances could dramatically change the world Along with the developments described in modern science fiction space societies conscious machines and upgraded human bodies to name but a few come a new set of ethical challenges and new forms of ethics Blackford identifies these issues and their reflection in science fiction His fascinating book will appeal to anyone with an interest in philosophy or science fiction or in how they interact This is a seasoned balanced analysis of a major issue in our thinking about the future seen through the lens of science fiction a central art of our time Everyone from humanists to technologists should study these ideas and examples Blackford's book is wise and savvy and a delight to read as well Greg Benford author of Timescape The Literary World, 1894 **Legal and Healthcare Ethics for the Elderly** George P.

Smith II, 2022-04-18 Increasingly legislators at the state and federal levels of government are forced to evaluate and act upon the unique problems presented by an aging American public A domino effect has occurred evoking concern in educational circles to deal with the varied complex issues associated with the new gerontology This expanded focus brings in not only mental and public health delivery issues but reaches and impacts on the social sciences ethics law and medicine as well as public policy In response to these matters Legal and Healthcare Ethics for the Elderly provides a balanced analytical presentation of the complicated socio legal medico ethical and political perspectives which interact with gerontology as a field of study In a straightforward and unambiguous style it covers information on access and financing healthcare the ethics of rationing healthcare and the inevitable link to the quality of life guardianship issues in a nursing home setting informed consent living wills and durable powers of attorney elder abuse and death with dignity The economics of care giving is charted and directed by the sometimes harsh realities of the marketplace Thus the various philosophical and ethical dilemmas which confront the process of aging are examined here both from a micro and from a macro economic perspective This book exemplifies that it is vitally important to be educated now to be prepared for the future and thereby make informed decisions for both ourselves and our loved ones

Bearing Witness Courtney S. Campbell, 2019-09-09 In Bearing Witness Courtney S Campbell draws on his experience as a teacher scholar and a bioethics consultant to propose an innovative interpretation of the significance of religious values and traditions for bioethics and health care The book offers a distinctive exposition of a covenantal ethic of gift response responsibility transformation that informs a quest for meaning in the profound choices that patients families and professionals face in creating sustaining and ending life Campbell s account of bearing witness offers new understandings of formative ethical concepts situates medicine as a calling and vocation rooted in concepts of healing affirms professional commitments of presence for suffering and dying persons and presents a prophetic critique of medical assisted death This book offers compelling critiques of secular models of medical professionalism and of individualistic assumptions that distort the physician patient relationship This innovative interpretation bears witness to the relevance of religious perspectives on an array of bioethical issues from new reproductive technologies to genetics to debates over end of life ethics and bears witness against the oddities of a market oriented and consumerist vision of health care that is especially salient for an era of health care reform

Biolaw, Economics and Sustainable Governance Erick Valdés, Jacob Dahl Rendtorff, 2021-11-18 This book offers an accurate and updated approach to the main contributions of cosmopolitan biolaw in relation to sustainability global governance organizational health care economics and COVID 19 Bringing together different robust and dense biojuridical epistemologies to analyze key bioethical problems as well as the health care management economics and sustainability issues of our time it constitutes a paradigmatic text in its field In addition to exploring different epistemologies and jurisdictional scopes of biolaw including the relationships between this new field and the challenges which have arisen in the current globalized and technologized world the book addresses controversial issues

straight from today's headlines for example the basics for health care finance and organizational economics global biojuridical principles for governance globalization bioscientific empowerment global and existential risk and sustainability challenges for a post pandemic world The book encourages readers to think impartially in order to know and understand the bioethical and biojuridical dilemmas that stem from current economics and sustainability issues Accordingly it will be a valuable resource for courses in the fields of biolaw law bioethics global sustainability organizational health care economics and global governance at different professional levels
