Volume 8.2 J. Jeremy Wisniewski, 2011-01-18 This journal has been discontinued Any issues are available to purchase separately **Disaster Bioethics: Normative Issues When Nothing is Normal** Dónal P. O'Mathúna, Bert Gordijn, Mike Clarke, 2013-12-26 This book provides an early exploration of the new field of disaster bioethics examining the ethical issues raised by disasters Healthcare ethics issues are addressed in the first part of this book Large scale casualties lead to decisions about who to treat and who to leave behind cultural challenges and communication ethics The second part focuses on disaster research ethics With the growing awareness of the need for evidence to guide disaster preparedness and response more research is being conducted in disasters Any research involving humans raises ethical questions and requires appropriate regulation and oversight The authors explore how disaster research can take account of survivors vulnerability informed consent the sudden onset of disasters and other ethical issues Both parts examine ethical challenges where seeking to do good harm can be done Faced with overwhelming needs and scarce resources no good solution may be apparent But choosing the less wrong option can have a high price In addition what might seem right at home may not be seen to be right elsewhere This book provides in depth and practical reflection on these and other challenging ethical questions arising during disasters Scholars and practitioners who gathered at the Brocher Foundation in Geneva Switzerland in 2011 offer their reflections to promote further dialogue so that those devastated by disasters are respected by being treated in the most ethically sound ways possible [International Disaster Management Ethics](#) Liza Ireni Saban, 2016-09-30 Today s

international disaster management community faces demanding political and ethical challenges In *International Disaster Management Ethics* Liza Ireni Saban suggests that it is crucial for international aid organizations engaged in disaster management to attempt to lift the moral fog that envelops their practice and to alert them to the ethical implications and meaning of their decisions and actions commitment to exercising ethical judgment and leadership Drawing on examples from large scale natural disasters the 2003 Bam earthquake in Iran the 2004 Indian Ocean earthquake and tsunami the 2005 hurricanes that struck the US Gulf Coast the 2010 Haitian earthquake and the 2013 Philippines typhoon Saban applies

current prominent perspectives on global justice to international disaster management arguing that a process of codification will enhance the capacity to professionalize distributive decision making Rather than being obligatory taking into account global distributive considerations will become a defining part of the profession at a global level at a time when international disaster relief is facing more and more severe natural disasters
