Eu Environmental Law And The Internal Market:

EU Environmental Law and the Internal Market Nicolas de Sadeleer, 2014 A robust exhaustive and systematic legal analysis of the conflicts opposing integration of internal market and free competition rules with the environmental protection rules including climate change rules taken at an EU and national level

EU Environmental Law and the Internal Market Nicolas de Sadeleer, 2014-01-09 For some a protectionist policy underlies most environmental measures Lawyers working in the area of fundamental freedoms are very accustomed to discussing all issues within a free market framework and therefore often come to market friendly decisions Similarly while environmental law has taken on a renewed intensity at European level the tendency has been to analyse the subject rather narrowly and studies fail to address the impact of environmental law on market integration Written by one of the foremost experts in the area the book challenges current thought and re assesses the rules of economic integration within an environmental framework In so doing it bridges the gap between environmental and trade law and provides a systematic robust and practically workable analytical framework of the conflicts opposing rapidly evolving environmental and climate change measures and internal market as well as competition rules The book is divided into three parts beginning with a systematic and in depth analysis of the key Treaty provisions regarding environmental protection as well as an overview of secondary environmental law Part two addresses the compatibility of EU and national environmental protection measures with the provisions of the TFEU on the free movement of goods and services and the freedom of establishment Part three examines the compatibility of environmental protection measures with treaty provisions on the freedom of competition and State aids The book also includes discussion of all major cases handed down by the Court of Justice highlighting the real impact of the conflicts

Research Handbook on the Law of the EU's Internal Market Panos Koutrakos, Jukka Snell, 2017-01-27 While the internal market has been at the heart of the European project from the very beginning it has rarely been the subject of sustained and comprehensive scholarly examination in its entirety In the face of profound legal political and policy pressures this timely Research Handbook reflects on the cutting edge issues horizontal themes and the big questions which illuminate the shape of the internal market It places the law and policy of the internal market within the context of the financial crisis and the existential questions this has raised for future European integration

EU Environmental Law and Policy David Langlet, Said Mahmoudi, 2016-09-02 An accessible and comprehensive resource EU Environmental Law and Policy explains the structure and logic of EU environmental law and enables readers to quickly gain a thorough understanding of the different areas of EU secondary law pertaining to the protection of the environment This volume explores the institutional constitutional and historical premises for the adoption and application of substantive EU environmental law and further expounds upon the dynamics between EU Member States and the EU The book additionally provides an introduction to the specific subject areas of EU environmental law through thematic chapters that analyse important topics such as climate and energy water and biological diversity Each

area is explained in detail including a discussion of the specific features that characterize each area and an overview of the main legal acts and case law relevant to the particular area

The Internal Market as a Legal Concept Stephen Weatherill, 2017 An inquiry into the internal market as an ambiguous legal concept this volume will consider the vertical distributions of competences between the EU and its Member States and the horizontal distribution of powers between the Court and the legislative institutions of the EU

Risk Regulation in the Internal Market Maria Weimer, 2019-03-19 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

EU Environmental Law, Governance and Decision-Making Maria Lee, 2014-01-12 A vast and diverse body of EU law addresses an enormous range of environmental matters This book examines a number of areas of substantive EU environmental law focusing on the striking preoccupation of EU environmental law with the structure of decision making It highlights the observation that environmental protection and environmental decision making depend intimately on both detailed specialised information about the physical state of the world and on political judgments about values and priorities It also explores the elaborate mechanisms that attempt to bring these distinctive decision making resources into EU environmental law in areas including industrial pollution chemicals regulation environmental assessment and climate change

European Environmental Law Suzanne Kingston, Veerle Heyvaert, Aleksandra Čavoški, 2017-07-20 A critical and contextual overview of European environmental law examining today's key environmental challenges alongside traditional topics

Research Handbook on EU Environmental Law Marjan Peeters, Mariolina Elia Antonio, 2020-06-26 This comprehensive Research Handbook discusses how the EU has used its regulatory power to steer towards environmentally friendly behaviour delving into the deep

concerns related to the compliance with and enforcement of EU environmental law It also highlights the important role of civil society's use of environmental procedural rights and characterizes how the CJEU case law has contributed to the effective implementation of EU environmental legislation

A Guide to EU Environmental Law Josephine van Zeben, Arden Rowell, 2020-10-27 Written by two internationally respected scholars this unique primer distills European Union environmental law and policy into a practical guide for a nonlegal audience as well as for lawyers trained in other jurisdictions The first part explains the basics of the European legal system including key actors types of laws and regulatory instruments The second part describes the EU's overarching legal strategies for environmental management and delves into how the EU addresses the specific environmental issues of pollution ecosystem management and climate change Chapters include summaries of key concepts and discussion questions as well as informative spotlights offering brief overviews of topics With a highly accessible structure and useful illustrative features A Guide to EU Environmental Law provides a long overdue synthetic resource on EU environmental law for students and for anyone working in environmental policy or environmental science This text can also be read with the authors A Guide to US Environmental Law for a comparative look at how two important jurisdictions in the world deal with key environmental problems

Discretion in EU Public Procurement Law Sanja Bogojevic, Xavier Groussot, Jörgen Hettne, 2019-05-30 The EU public procurement regime has recently undergone an overhaul and now allows Member States and their contracting authorities to pursue strategic goals via public procurement including environmental and social objectives The extent to which such interests may be accommodated in the procurement process is ultimately determined by the broader legal context in which the EU public procurement regime exists which raises pressing questions regarding the scope and limits of Member States discretion This volume scrutinises these new legal acts particularly Directive 2014/24/EU focusing on discretion and engaging with questions central to the public procurement regime against the EU legal backdrop including internal market law and environment law as well as law beyond the EU

EU Environmental Law Geert Van Calster, Leonie Reins, 2017-02-24 EU Environmental Law discusses the reality for legal practice throughout the EU as environmental law of the Member States is becoming ever less national Consequentially European environmental regulation is becoming more complex and interrelated making it an emerging field of study for European law graduates and an area of increasing exposure to the legal profession This book gives readers a thorough overview of core European environmental law with a section on the basic framework and principles as well as on substantive law issues giving insight into the legislation in the different sectors and the most topical developments

The Oxford Handbook of Comparative Environmental Law Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points country studies from all continents responses to common problems including air pollution water management nature conservation

genetically modified organisms climate change and energy chemicals waste foundational components of environmental law systems including principles property rights administrative and judicial organisation command and control regulation market mechanisms informational techniques and liability mechanisms and common interactions of environmental protection with the broader public private and criminal law contexts The volume brings together the foremost authorities in this field from around the world to provide a concise self contained and technically rigorous account of environmental law as a single overall system

Emissions Trading Schemes Sanja Bogojevic, 2013-07-04 Over the last four decades emissions trading has enjoyed a high profile in environmental law scholarship and in environmental law and policy Much of the discussion is promotional preferring emissions trading above other regulatory strategies without however engaging with legal complexities embedded in conceptualising scrutinising and managing emissions trading regimes The combined effect of these debates is to create a perception that emissions trading is a straightforward regulatory strategy imposable across various jurisdictions and environmental settings This book shows that this view is problematic for at least two reasons First emissions trading responds to distinct environmental and non environmental goals including creating profit centres substituting bureaucratic control of resources and ensuring regulatory compliance This is important as the particular purpose entrusted to a given emissions trading regime has as its corollary a particular governance structure according to which the regime may be constructed and managed and which trusts the emissions market the state and rights in emissions allowances with distinct roles Second the governance structures of emissions trading regimes are culture specific which is a significant reminder of the importance of law in understanding not only how emissions trading schemes function but also what meaning is given to them as regulatory strategies This is shown by deconstructing emissions trading discourses that is by inquiring into the assumptions about emissions trading as featuring in emissions trading scholarship and in debates involving law and policymakers and the judiciary at the EU level Ultimately this book makes a strong argument for reconfiguring the common understanding of emissions trading schemes as regulatory strategies and sets out a framework for analysis to sustain that reconfiguration

Krämer's EU Environmental Law Ludwig Krämer, Christopher Badger, 2024-05-30 The new edition of this essential book details the present state of EU environmental law as it has developed over the last 50 years The author was personally involved in its making and enforcement having worked for more than 30 years in the environmental department of the European Commission The book therefore provides unique insights into this complex field The book discusses in detail governance and other horizontal issues such as competence questions the division of power between the EU and its Member States the individual right to a clean environment and the integration of environmental requirements into other EU policies such as energy transport agriculture fisheries trade and tourism New chapters elaborate on the relationship between UK and EU law after Brexit written by Christopher Badger and on the global effect of EU environmental law and policy Other chapters deal with climate change biodiversity water protection air and noise pollution

products and waste Implementation of EU law in the Member States and the prominent role of the EU Court of Justice with its more than 1 100 environmental judgments are discussed as well as an overall assessment of EU law and policy in environmental matters and its perspectives to 2030 under the 8th EU environmental action programme At a time of globalisation the book is indispensable reading for students researchers and practising lawyers alike **Research**

Handbook on Climate Change and Trade Law Panagiotis Delimatsis,2016-12-30 The interaction between climate change and trade has grown in prominence in recent years This Research Handbook contains authoritative original contributions from leading experts working at the interface between trade and climate change It maps the state of affairs in such diverse areas as carbon credits and taxes sustainable standard setting and trade in green goods and services or investment from both a regional and global perspective Panagiotis Delimatsis redefines the interrelationship of trade and climate change for future scholarship in this area **Environmental Law and Governance for the Anthropocene** Louis Kotzé,2017-06-15

The era of eco crises signified by the Anthropocene trope is marked by rapidly intensifying levels of complexity and unevenness which collectively present unique regulatory challenges to environmental law and governance This volume sets out to address the currently under theorised legal and consequent governance challenges presented by the emergence of the Anthropocene as a possible new geological epoch While the epoch has yet to be formally confirmed the trope and discourse of the Anthropocene undoubtedly already confront law and governance scholars with a unique challenge concerning the need to question and ultimately re imagine environmental law and governance interventions in the light of a new socio ecological situation the signs of which are increasingly apparent and urgent This volume does not aspire to offer a univocal response to Anthropocene exigencies and phenomena Any such attempt is in any case unlikely to do justice to the multiple implications and characteristics of Anthropocene forebodings What it does is to invite an unrivalled group of leading law and governance scholars to reflect upon the Anthropocene and the implications of its discursive formation in an attempt to trace some initial often radical future facing and imaginative implications for environmental law and governance The Yearbook of European
