**Conscience and the Common Good** Robert K. Vischer, 2010 Our society's longstanding commitment to the liberty of conscience has become strained by our increasingly muddled understanding of what conscience is and why we value it Too often we equate conscience with individual autonomy and so we reflexively favor the individual in any contest against group authority losing sight of the fact that a vibrant liberty of conscience requires a vibrant marketplace of morally distinct groups Defending individual autonomy is not the same as defending the liberty of conscience because although conscience is inescapably personal it is also inescapably relational Conscience is formed articulated and lived out through relationships and its viability depends on the law's willingness to protect the associations and venues through which individual consciences can flourish these are the myriad institutions that make up the space between the person and the state Conscience and the Common Good reframes the debate about conscience by bringing its relational dimension into focus

**Received Wisdom, Kernels of Truth, and Boundary** Daniel J. Svyantek, Kevin T. Mahoney, 2013-03-01 This volume of the Research in Organizational Sciences is entitled Received Wisdom Kernels of Truth and Boundary Conditions in Organizational Studies Received wisdom is knowledge imparted to people by others and is based on authority and tenacity as sources of human knowledge Authority refers to the acceptance of knowledge as truth because of the position and credibility of the knowledge source Tenacity refers to the continued presentation of a particular bit of information by a source until this bit of information is accepted as true by receivers The problem for organizational studies however is that this received wisdom often becomes unquestioned assumptions which guide interpretation of the world and decisions made about the world Received wisdom therefore may lead to organizational practices which provide little or no benefit to the organization and potentially negative organizational effects because this received wisdom is no longer valid The 14 papers in this volume all in some way strive to question received wisdom and present alternatives which expand our understanding of organizational behavior in some way The chapters in this volume each strive to present new ways of understanding organizational constructs and in so doing reveal

how received wisdom has often led to confirmation bias in organizational science The knowledge that some perceived truths are actually the products of received wisdom and do not stand up to close scrutiny shakes up things within research areas previously thought settled allowing new perspectives on organizational science to emerge Handbook of Research on Technoethics Luppigini, Rocci, Adell, Rebecca, 2008-08-31 This book traces the emergence of the new interdisciplinary field of technoethics by exploring its conceptual development important issues and key areas of current research Compiling 50 authoritative articles from leading researchers on the ethical dimensions of new technologies Provided by publisher **We Make a Life by What We Give** Richard B.
