fits all solution either Rather in light of Africa s rich diversity the book embraces the need for plurality within different regions AI ecosystems The book advocates that Africa inclusive AI policies incorporate a relational ethics of care which explicitly addresses how Africa s unique landscape is entwined in an AI ecosystem The book also works to provide actionable AI tenets that can be incorporated into policy documents that suit Africa s needs This book will be of great interest to researchers students and readers who wish to critically appraise the different facets of AI in the context of Africa across many areas that run the gamut from education gender studies and linguistics to agriculture data science and economics This book is of special appeal to scholars in disciplines including anthropology computer science philosophy and sociology to name a few
