Technē Gerald Hiestand, Todd A.

Wilson,2022-11-18 Christians have an increasingly complex and often conflicted relationship with technology As Genesis 1 succinctly and profoundly declares God created humanity in his image and as part of that vocation we are called to make something of the world Technology is one of the most important and powerful ways that human beings exercise this dominion But while technology can extend our humanity in powerful and exciting ways many of us feel that it can compromise or fracture our humanity at its core As a result questions quickly emerge What does it mean to be human How does our creation in the image of God affect the way we use design and understand technology Should our general posture toward technology be cautious or optimistic This collection of scholarly and pastoral essays drawn from the 2019 annual theology conference of the Center for Pastor Theologians offers substantive Christian reflection on a wide range of issues pertinent to a distinctly Christian vision of technology today and in the future

Art of Peace Formation Oliver P. Richmond,Stefanie

Kappler,Birte Vogel,2024-04-30 Artpeace represents a conceptual framing of the synergy between the arts and peacemaking as well as a methodological strategy for addressing war and political conflict through the arts Developing the concept of artpeace this book investigates how local art projects in seven locations across Africa Asia Europe and Latin America have played a role in broader national peace projects And it examines the blockages that at times prevent the arts from making a tangible difference to the variations of peace being designed

Civil Society, Education and Human Formation Jānis

(John) Tāļivaldis Ozoliņš,2017-04-07 Education has been widely criticised as being too narrowly focused on skills capacities and the transference of knowledge that can be used in the workplace As a result of the dominance of economic rationalism and neo liberalism it has become commodified and marketed to potential customers As a consequence students have become consumers of an educational product and education has become an industry There is deep dissatisfaction with these neo liberal developments What is missing is any conception of education as a key factor in the human formation that will lead students to develop the virtues and values that they will need to not only lead successful lives but also be responsible members of their communities working for the common good and acting to transform them into just societies This volume draws together a number of different perspectives on what is meant by human formation argues that for a much richer conception of education and addresses the lack of attention to human fulfilment It also highlights the importance of philosophy in the articulation of novel ways of conceptualising education providing alternatives to the dominant neo liberal and economic rationalist models The central question with which the book is concerned is a renewed understanding of education as the formation of persons of civil society and the role of philosophy in fostering that renewal In this volume there are a variety of voices from diverse traditions and cultures Both East and West are represented and it might be expected that this would result in a divergence of opinion about the purpose of education However in spite of the diversity there is some significant convergence in thinking about the ways in which education ought to serve the needs of both the individual and their communities What is also particularly useful and what is fresh about the essays presented here is that there is also

diversity in the philosophical approaches to the problem This means that the convergence on the importance of human formation as the cornerstone of education does not rely on a privileged philosophical method

Neural Gospels: The Digital Rewriting of Faith in a Post-Human World Pastor Yves Gerard, Neural Gospels The Digital Rewriting of Faith in a Post Human World is a provocative and visionary exploration of how artificial intelligence biotechnology and transhumanist ideologies are reshaping the language practice and very meaning of faith in the 21st century In a world where neural networks write sermons digital prophets emerge on social media platforms and consciousness itself is being uploaded into clouds of code the sacred is no longer confined to ancient texts or traditional rituals it is being rewritten by machines This groundbreaking work examines the collision between theology and technology offering a deep and critical look at what happens when the divine meets the digital Drawing from scripture science fiction posthuman philosophy and real world advancements in AI and neurotheology Neural Gospels dares to ask Can a machine encounter God Will future faith be mediated through algorithms instead of sacraments And what does salvation look like in an age of synthetic consciousness Far from a dystopian warning or utopian dream this book navigates the paradoxes and promises of our time It challenges readers to rethink the boundaries of soul spirit and self in a society where the human body is increasingly viewed as hackable hardware and the mind as programmable software It explores whether spiritual authority can remain relevant when AI can simulate mystical experiences and generate religious texts more fluently than human theologians From cyber churches and metaverse baptisms to AI driven Bible translations and virtual resurrections Neural Gospels charts the emergence of a post human spirituality one that questions whether divine inspiration can coexist with digital creation It probes the theological implications of mind uploading digital immortality and synthetic prophets raising urgent ethical and spiritual questions about identity faith and the future of religious belief Written for theologians futurists cultural critics technologists and curious seekers alike this book is both intellectually rigorous and spiritually attuned It invites readers to wrestle with the sacred in an era of artificial gods and neural revelations challenging them to discern the voice of the true Shepherd amidst the noise of machine learning and digital prophecy Ultimately Neural Gospels is not just about technology s impact on religion it is a meditation on what it means to be human when the traditional boundaries between creator and created organic and artificial sacred and secular begin to blur In this bold theological treatise for the digital age faith is not lost it is transformed rewritten in code and preached from the cloud

Social Media Impact Xena Mindhurst, AI, 2025-01-31 Social Media Impact offers a comprehensive data driven analysis of how digital platforms are fundamentally reshaping human relationships mental health and public discourse in an age where people spend over two hours daily on social media Through a unique combination of clinical studies platform data and interviews spanning multiple countries the book reveals compelling insights about our evolving digital social landscape The investigation unfolds across three interconnected dimensions the transformation of traditional friendships in the digital age the psychological implications of social media usage and the evolution of public

discourse on these platforms Drawing from studies involving over 10 000 participants the book explores fascinating patterns in online relationship dynamics and demonstrates how different age groups balance digital and real world connections It delves into crucial findings about digital anxiety comparison driven depression and the neurological effects of social media engagement supported by recent neuroscience research What sets this book apart is its balanced approach to examining both benefits and drawbacks of social media combining rigorous academic research with practical actionable guidance Each chapter concludes with evidence based strategies for healthier online engagement making complex concepts from behavioral economics and information theory accessible to general readers The book s interdisciplinary perspective offers valuable insights for anyone seeking to understand and navigate today s digital social environment from mental health professionals to concerned parents and everyday users
