Education Sector Plans and their Implementation in Developing Countries Roy Carr-Hill, 2023-03-09 This book examines the factors affecting the successful implementation of Education Sector Plans in developing countries. It provides a detailed comparison that draws on data from 27 countries to offer careful research conclusions and policy recommendations. Offering a detailed comparison of the schooling situation e.g. availability of potable water and toilets provision for the disabled as well as educational outcomes both test scores and percentages out of school from the 27 countries using empirical evidence, the book examines the resources that have been invested in different education sectors, investigating the development and success of each plan. The volume uses correlation analysis to compare factors including the availability of government funding, national characteristics, ministerial decisions, influences of country and donor stakeholders as well as district and school level issues. Thorough comparative analysis of the data is then demonstrated with two measures of achievements to identify which factors can be considered as the most important in order to reach realistic policy and research conclusions. Timely and engaging, this book will be of great interest to researchers, scholars and postgraduate students in the field of education and international development. **comparative education and international education more broadly**

**The State of the Global Education Crisis** UNESCO, United Nations Children's Fund, World Bank (the), 2021-12-09 The global disruption to education caused by the COVID 19 pandemic is without parallel and the effects on learning are severe. The crisis brought education systems across the world to a halt with school closures affecting more than 1.6 billion learners. While nearly every country in the world offered remote learning opportunities for students, the quality and reach of such initiatives varied greatly and were at best partial substitutes for in-person learning. Now 21 months later, schools remain closed for millions of children and youth and millions more are at risk of never returning to education. Evidence of the detrimental impacts of school closures on children's learning offer a harrowing reality: learning losses are substantial, with the most marginalized children and youth often disproportionately affected. Countries have an opportunity to accelerate learning recovery and make schools more efficient, equitable and resilient by building on investments made and lessons learned during the crisis. Now is the time to shift from crisis to recovery and beyond recovery to resilient and transformative education systems that truly deliver learning and well-being for all children and youth. Sustainable Results in Development Using the SDGs for Shared Results and Impact OECD, 2019-12-17 Governments and providers of development co-operation increasingly use Sustainable Development Goal indicators to guide their policies and practices. The close examination of three large recipients of development co-operation: Ethiopia, Kenya and Myanmar across the sectors of Education, Sanitation and Energy reveals four inter-related challenges in using SDG indicators at country level.

,2001 How The New Education Establishment Betrayed The World's Poorest Children Joanna Härmä,2025-01-23 This book tells the real story of education in low income countries and shows why ordinary people are making extreme sacrifices to reject free public schools in favor of low quality private schools both legal and illegal Based on the author s experience of working in the UN system for a child rights NGO in New Delhi and working on aid projects and with private foundations in Africa and South Asia Joanna Harma reveals how public education systems got to their current state of dysfunction She argues that the international aid community and United Nations bodies such as UNESCO and UNICEF have facilitated the decline in public education and argues that young children are being let down by education systems and policy from the local to the international Harma looks at this issue from the perspectives of various stakeholders including international human rights workers parents the companies who set up the schools policy makers and NGO workers The book includes a preface from Ben Phillips Director of Communications at The Joint United Nations Programme on HIV AIDS UNAIDS **Girls Have**

**Academic Advantages and So Do Boys** Jodie Fonseca, Laiba Bahrawar,Margaret M. Dubeck,Yasmin Sitabkhan,Christopher Cumiskey,Devanshi Unadkat,2023-05-15 This paper contains a new analysis of gender differences in early grade reading and mathematics outcomes in 19 USAID funded studies over the past decade from 14 locations in Africa Asia Latin America and the Middle East The paper addresses gaps in the literature related to learning patterns for girls and boys in lower and middle income countries and in early primary school We analyzed the results from reading and mathematics assessments in grades 2 and 3 including differences in oral reading fluency ORF and quantitative comparison scores between boys and girls as well as differences in score distributions by gender In line with results from assessments in upper grades and in wealthier countries we found that girls consistently outperformed boys in reading In mathematics boys slightly outperformed girls although the differences were typically not large Global experience has shown that patterns in poor performance become more entrenched the further learners progress through the grades suggesting that early interventions for boys in reading and girls in mathematics could have long term benefits At the same time both girls and boys typically score below expectations in the two subjects across countries necessitating targeted strategies to improve outcomes for both genders early in their educational trajectories **Books in Print** ,1991 Subject Guide to Books in Print ,1991

**Substance Misuse Prevention Program Attendance** Marni L. Kan,Hsiu Chen Yeh, Lisa M. Schainker,Jessica Nelson,Samantha Charm,Cleve Redmond,Richard Spoth,2022-12-19 Typical life circumstances for military families may impact their participation in prevention programs yet little is known about what factors influence their participation The current study examined predictors of attendance in the Strengthening Families Program For Parents and Youth 10 14 for Military Families a universal in person program designed to improve family functioning and reduce youth substance misuse and other problem behaviors Participants included 159 parent child dyads randomly selected to be offered the 7 week family program Analyses examined demographic characteristics deployment experiences time spent waiting for the program to

begin and psychosocial functioning as predictors of attendance in a series of regression models Of the 39 percent of families that attended any program sessions the majority 71 percent attended at least four of the seven sessions Attendance varied significantly across the geographic areas in which groups were held Prior service utilization youth conduct problem behavior parental history of deployment and family conflict were each positively associated with attendance whereas parent tobacco use was negatively associated with attendance These results highlight the challenges in recruiting military families into in person prevention programs and suggest that extra efforts may be needed to engage families that do not perceive that they have a need for support
