Atrocity Fabrication and Its Consequences A.B. Abrams, 2023-03-15 Atrocity fabrication the invention and reporting of atrocities committed by an adversary without knowledge that they ever occurred has a centuries long history at the heart of propaganda and power politics as an effective means of moving public and international opinion Its use can provide pretext for a range of hostile measures against its targets transforming in the public eye wars of unprovoked aggression into wars of liberation of the oppressed or turning blockades to starve enemy civilians into humane efforts to pressure abusive governments under the moralistic label of sanctions As it plays a large and growing role in global conflict in the 21st century understanding atrocity fabrication and the consistent means by and ends to which it has been used has become crucial to comprehending geopolitical events in the present day This book elucidates the seldom explored but central role played by atrocity fabrication in eleven major conflicts from the 1950s to the present day from Korea Vietnam and Cuba during the Cold War to Iraq Libya and the emerging Sino U S cold war more recently It highlights the many variations of atrocity

fabrication the strong consistencies in how atrocity fabrication is used and the consequences it has for the populations of the targeted countries The book demonstrates the roles played by media and both government and non governmental organizations in misleading the public as to the actuality of these highly publicized events The emerging trend towards this mode of action and the deep implications this has for world order make an understanding of its history particularly critical

The End of the Republic and the Delusion of Empire James Petras, 2016-10-11 Are we approaching peak America where the Republic has failed and the Empire which put paid to it cannot be achieved Seasoned political analyst James Petras addresses in broad brush the four major upheavals that loom 1 For the first time the goal of socialism has been raised in the presidential primaries backed by tens of millions of voters The likely Republican candidate leads a mass right wing revolt which opposes globalization capital flight and the free entry of immigrant labor The US presidential elections are everything abnormal with both major party candidates arousing popular revulsion Not since the New Deal nearly a century ago have class relations come into sharper confrontation 2 Not since World War II have the US and Russia drawn closer to the possibility of mutual annihilation through nuclear war due to US empire building The Presidency in pursuit of a global legacy draws on the support of the extremist mainstream media prestigious Harvard mandarins of war and military factions to pursue global hegemony even as rebellious working peoples resist and Russian and Chinese adversaries rearm and advance 3 Popular movements in France Spain South Africa Argentina and Brazil call for popular revolutions Right wing nationalist parties are rising in Europe Though the traditional center left parties have been ousted or co opted by elites under the duress of capitalist wars and austerity mass electoral upheavals general strikes and armed resistance openly challenge the empire in all its bastions 4 Who rules America and who sets the military agenda in the most contentious regions of the Middle East is in open dispute A neoconservative domestic policy elite reflecting Zionist influence has gained ascendancy under dubious claims of meritocratic credentials Their economic policies have plunged the country into repeated crises systematic swindles and spiraling inequalities while their foreign policy has led to prolonged losing wars resulting in disastrous human and financial losses The political and economic power of the Zionist configuration in America has severely repressed critical debate and political action seeking to challenge its dominance

The Tail Wags the Dog Efraim Karsh, 2015-08-11 The continuing crisis in Syria has raised questions over the common perception of Middle Eastern affairs as an offshoot of global power politics To Western intellectuals foreign policy experts and politicians empire and imperialism are categories that apply exclusively to Europe and more recently to the United States of America As they see it Middle Eastern history is the product of its unhappy interaction with these powers Forming the basis of President Obama's much ballyhooed new beginning between the United States and Muslims around the world this outlook is continuing to shape crucial foreign policy among Western governments but in these pages Efraim Karsh propounds a radically different interpretation of Middle Eastern experience He argues that the Western view of Muslims and Arabs as hapless victims is absurd On the contrary

modern Middle Eastern history has been the culmination of long existing indigenous trends Great power influences however potent have played a secondary role constituting neither the primary force behind the region's political development nor the main cause of its notorious volatility Karsh argues it is only when Middle Eastern people disown their victimization mentality and take responsibility for their actions and their Western champions drop their condescending approach to Arabs and Muslims that the region can at long last look forward to a real spring

Coles, 2018-12-03 In a devastating analysis T J Coles reveals the true extent of Britain's covert foreign policy that supports war conflict and oppression around the world Unbeknownst to the broad population the Shadow State sponsors a new world order that allies Britain with America's quest for global power what the Pentagon calls Full Spectrum Dominance Coles documents how British operatives have interfered in Syria Libya Iraq Iran and Yemen with the aim of deposing unwanted regimes In doing so they have helped create extensive terrorist networks across the Middle East reviving previously failing Jihadist groups such as ISIL which has now transformed into an international terror franchise In addition to waging clandestine wars in the Middle East the secret services have used the military to run drugs by proxy in Colombia train death squads in Bangladesh and support instability in Ukraine where NATO's strategic encroachment on Russia is drawing the world closer to terminal nuclear confrontation Coles unearths Britain's involvement in the recent ethnic cleansing of Tamil civilians by the Sri Lankan government the invasion of Somalia by Somali and Ethiopian warlords and Indonesia's atrocities in Papua He also exposes the extensive use of drones for murder and intimidation across the Middle East and elsewhere Britain's Secret Wars is essential reading for anyone who wants to dig beneath the surface of current events This expanded edition features a new Preface

Islamic Imperialism Efraim Karsh, 2013-09-24 From the first Arab Islamic Empire of the mid seventh century to the Ottomans the last great Muslim empire the story of the Middle East has been the story of the rise and fall of universal empires and no less important of imperialist dreams So argues Efraim Karsh in this highly provocative book Rejecting the conventional Western interpretation of Middle Eastern history as an offshoot of global power politics Karsh contends that the region's experience is the culmination of long existing indigenous trends passions and patterns of behavior and that foremost among these is Islam's millenarian imperial tradition The author explores the history of Islam's imperialism and the persistence of the Ottoman imperialist dream that outlasted World War I to haunt Islamic and Middle Eastern politics to the present day September 11 can be seen as simply the latest expression of this dream and such attacks have little to do with U S international behavior or policy in the Middle East says Karsh The House of Islam's war for world mastery is traditional indeed venerable and it is a quest that is far from over

Genocide, Ethnonationalism, and the United Nations Hannibal Travis, 2013-01-17

Genocide Ethnonationalism and the United Nations examines a series of related crises in human civilization growing out of conflicts between powerful states or empires and indigenous or stateless peoples This is the first book to attempt to explore the causes of genocide and other mass killing by a detailed exploration of UN archives covering the period spanning from 1945 through 2011 Hannibal Travis argues that large states and empires disproportionately committed or facilitated genocide and other mass killings between 1945 and 2011 His research incorporates data concerning factors linked to the scale of mass killing and recent findings in human rights political science and legal theory Turning to potential solutions he argues that the concept of genocide imagines a future system of global governance under which the nation state itself is made subject to law The United Nations however has deflected the possibility of such a cosmopolitical law It selectively condemns genocide and has established an institutional structure that denies most peoples subjected to genocide of a realistic possibility of global justice lacks a robust international criminal tribunal or UN army and even encourages security cooperation among states that have proven to be destructive of peoples in the past Questions raised include What have been the causes of mass killing during the period since the United Nations Charter entered into force in 1945 How does mass killing spread across international borders and what is the role of resource wealth the arms trade and external interference in this process Have the United Nations or the International Criminal Court faced up to the problem of genocide and other forms of mass killing as is their mandate

Reflections on War, Diplomacy, Human Rights and Liberalism Adam Hughes Henry, 2020-12-01 For most people the idea that extremist ideologies glorify themselves through warfare and commit crimes against humanity and genocide is the natural extension of their moral and philosophical failings As this volume outlines liberal democracies such as Australia and others also glorify in war and they may also at various times engage in support or turn a blind eye to crimes against humanity or genocide However liberal democracies such as Australia the US and the UK among others routinely present themselves as arbiters of liberal values defenders of human rights and guardians of virtue This book explores the obvious contradiction between the ideals of liberalism and how liberal democracies ignore and at times even justify their failure to uphold the principles they espouse

geography migration studies and border theory *Global NATO and the Catastrophic Failure in Libya* Horace Campbell, 2013-03 In this incisive account scholar Horace Campbell investigates the political and economic crises of the early twenty first century through the prism of NATO's intervention in Libya He traces the origins of the conflict situates it in the broader context of the Arab Spring uprisings and explains the expanded role of a post Cold War NATO This military organization he argues is the instrument through which the capitalist class of North America and Europe seeks to impose its political will on the rest of the world however warped by the increasingly outmoded neoliberal form of capitalism The intervention in Libya characterized by bombing campaigns military information operations third party countries and private contractors exemplifies this new model Campbell points out that while political elites in the West were quick to celebrate the intervention in Libya as a success the NATO campaign caused many civilian deaths and destroyed the nation's infrastructure Furthermore the instability it unleashed in the forms of militias and terrorist groups have only begun to be reckoned with as the United States learned when its embassy was attacked and personnel including the ambassador were killed Campbell's lucid study is essential reading for anyone seeking to understand this complex and weighty course of events
