the difference between a successful organisation and one that fails is that organisation's level of cultural intelligence. Cultural intelligence has never been more important as businesses globalise especially in parts of the world that are very different to markets in the West. Cultural and social mistakes can cost businesses dearly. Learning how to do business in the Middle East without causing offence is crucial. This book provides cultural and practical business intelligence for all Western business people working throughout the Middle East. It also focuses on issues specifically important to Western businesswomen as well as for men who might be working with Arab and Muslim women. It can make the difference between success and failure for the reader and his or her organisation.

Supply Chain Integration Challenges in Commercial Aerospace Klaus Richter, Johannes Walther, 2016-12-13. This book presents firsthand insights into strategies and approaches for the commercial aerospace supply chain in response to the numerous changes that airlines, aircraft OEMs and their suppliers have experienced over the past few decades. In doing so, it investigates the entire product value chain. Accordingly, the chapters address the challenges of configuration and demand and highlight the specificities of customization in the aviation industry. They analyze component manufacturing, share valuable insights into assembly and integration activities and describe aftermarket business models. In order to ensure more varied and balanced coverage, the book includes contributions by researchers, suppliers and experts and practitioners from consulting companies and the aircraft industry. Taken together, they provide a holistic perspective on the transformation drivers and the innovations that have either been implemented or will be adopted in the near future. The book introduces and describes new concepts and innovations such as 3D printing, E2E demand management, digital production, predictive maintenance and open innovation in general, supplementing them with sample industrial applications from the aviation sector.

Legal Priorities in Air Transport Ruwantissa Abeyratne, 2019-05-27. Against the backdrop of enormous technological strides, this book argues that the air transport industry must be constantly vigilant in its efforts to

employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods In this regard safety and security are of the utmost importance both in terms of safe air navigation and the preservation of human life Although the International Civil Aviation Organization ICAO addresses legal issues through its Legal Committee many emerging issues that urgently require attention lie outside the Committee s purview This book analyzes in detail the items being considered by ICAO s Legal Committee considers the legal nature of ICAO and discusses whether or not ICAO s scope should be extended Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport the book also covers a broad range of key issues outside the parameters set by ICAO such as the need to teach air law to a new generation of aviation professionals combating cyber crime and cyber terrorism the regulation of artificial intelligence traveller identification interference with air navigation human trafficking unruly passengers climate change air carrier liability for passenger death or injury Remotely Piloted Aircraft Systems drones and the cabin crew and their legal implications
