GPS Paul E. Ceruzzi,2018-11-06 A concise history of GPS from its military origins to its commercial applications and ubiquity in everyday life GPS is ubiquitous in everyday life GPS mapping is standard equipment in many new cars and geolocation services are embedded in smart phones GPS makes Uber and Lyft possible driverless cars won t be able to drive without it In this volume in the MIT Press Essential Knowledge series Paul Ceruzzi offers a concise history of GPS explaining how a once obscure

space technology became an invisible piece of our infrastructure as essential to modern life as electric power or clean water. GPS relays precise time and positioning information from orbiting satellites to receivers on the ground, at sea and in the air. It operates worldwide and its basic signals are free, although private companies can commodify the data provided. Ceruzzi recounts the origins of GPS and its predecessor technologies, including early aircraft navigation systems and satellites. He describes the invention of GPS as a space technology in the post-Apollo pre-Space Shuttle years and its first military and commercial uses. Ceruzzi explains how the convergence of three major technological developments—the microprocessor, the Internet, and cellular telephony—enabled the development and application of GPS technology. Recognizing the importance of satellite positioning systems in a shifting geopolitical landscape and perhaps doubting U.S. assurances of perpetual GPS availability, other countries are now building or have already developed their own systems, and Ceruzzi reports on these efforts in the European Union, Russia, India, China, and Japan.

Precision agriculture '13 John V. Stafford, 2013-09-04

Precision agriculture is now mainstream in agriculture and is playing a key role as the industry comes to terms with the environment, market forces, quality requirements, traceability, vehicle guidance, and crop management. Research continues to be necessary and needs to be reported and disseminated to a wide audience. This book contains peer-reviewed papers presented at the 9th European Conference on Precision Agriculture held in Lleida, Spain. The papers reflect the wide range of disciplines that impinge on precision agriculture technology: crop science, soil science, agronomy, information technology, decision support, remote sensing, and others. The broad range of research topics reported will be a valuable resource for researchers, advisors, teachers, and professionals in agriculture long after the conference has finished.

Cemitério Horizontal - Poluição do

solo e água subterrânea Marcelo Mauri da Cunha, 2023-01-23 A população mundial acaba de atingir a marca de oito bilhões de seres humanos. O crescimento populacional potencializa o impacto ambiental decorrente da necessidade de novas moradias, maior produção de alimentos, consumo de água, energia, geração de resíduos e não menos importante, apesar de negligenciados, novos espaços para a atividade de sepultamento. A integridade de alguns aquíferos freáticos está comprometida pela contaminação provocada por cadáveres que são sepultados em áreas sem a própria avaliação do meio físico. Quando o processo de sepultamento por inumação ocorre em ambientes com meio físico inadequado, há contaminação do solo e água subterrânea por bactérias e vírus que proliferam durante os processos de decomposição dos corpos, além das substâncias químicas liberadas. Dentro desse contexto, que através de pesquisa de campo e bibliografias especializadas, o presente livro pretende apresentar os resultados da investigação do meio físico realizada em um dos cemitérios mais antigos da região nordeste catarinense, em comparação com o estabelecido pela Resolução do CONAMA nº 335/2003. A presente obra foi redigida com base na Dissertação de Mestrado do Curso de Pós-Graduação em Tecnologia e Ambiente (PPGTA) do Instituto Federal Catarinense (IFC) sob a orientação da Professora Dra. Patrícia Devantier Neuenfeldt.
