#### The Politics of European Security Policies Xymena

Kurowska, Patryk Pawlak, 2014-06-03 The book is a timely investigation into the European security policy dynamic from the perspective of actors engaged in the contentious policy process. Instead of looking at security actors in isolation from one another, the book enquires into the practice of the policy process and maps out the constellations of formal and informal actors sponsoring concrete ideas on what European security should be about. The understandings of security shift and advocating a particular reading of security involves entering the political contest with actors advancing different conceptions. The contributors analyse these different modalities, overlapping scenes and shifting meanings that bring about EU security policies. Our case studies illustrate how these processes unfold both at the intra EU level where different institutions supply and endorse their security framings and vis-à-vis the EU and its neighbours. The purpose of the book is to uncover by pluralistic means the rules of the game that structure the field of the EU's security making. That way rather than impose a rigid theoretical model, the editors structure the inquiry around three concepts: security politics and policy. This book was published as a special issue of *Perspectives on European Politics and Society*.

#### **ECOOP '87. European Conference on Object-Oriented Programming** Jean Bezivin, Jean-Marie

Hullot, Pierre Cointe, Henry Lieberman, 2007-03-06 In October 1983 an informal meeting was organized in Le Cap d'Agde with the help of the BIGRE bulletin. Sixty people turned out to hear more than ten presentations on object-oriented programming. More important was their unanimous demand for other more structured encounters. So about one year later the Object group was created by AFCET. A second workshop was organized in Brest and again one year later in Paris, each time showing increased attendance and interest. The success of these meetings and the fact that similar activities were taking place in other European countries, especially Great Britain and Germany, led to the idea of an annual European Conference providing a forum for theorists and practitioners interested in the object-oriented programming paradigm. It is impossible to acknowledge here all the people and organizations that welcomed with great enthusiasm the birth of the ECOOP conference and contributed to its organization. More than a hundred submissions were received and the program committee had the unpleasant task of turning down many valuable contributions. We hope, however, that the selection of papers for ECOOP '87 emphasizes the fundamental issues and problems of object-oriented programming and will point toward interesting future research directions.

#### *European Economic Governance* Willem Molle, 2011-03-01

In the course of its development, the EU has had to deal with an expanding policy agenda covering ever more subjects and an increased diversity of instruments. It has also had to deal with an increased number of member states and an extended range of partners: regional authorities, non-

governmental organisations These developments have greatly increased the risk of inconsistencies between the various policies pursued and between the various levels of competence for the same policy Inconsistent policies are less effective than they ought to be So they imply a welfare loss The EU has tried to cope with the challenge of consistency by adapting its governance Traditionally it uses mainly the regulatory method The effectiveness of this method has recently come into question So alternative methods are now favoured One is the financial method which implies more expenditure via the EU budget The other is coordination The application of both methods has certain advantages and disadvantages The problem for policy makers is then to determine the choice between the modes first and the optimal level of budgetary and coordination efforts next Notwithstanding its obvious policy relevance the problem has got little attention from academia This book sets out to contribute to a solution by following two approaches The first is a systematisation of the theoretical and conceptual underpinnings of the financial and coordination methods The second is an empirical investigation into a range of European policy processes implying to different degrees budgetary outlays and coordination

**Transnational Crime** Valsamis Mitsilegas, Saskia Hufnagel, Anton Moiseienko, Shi Yanan, Liu Mingxiang, 2018-10-09 This volume offers a diverse set of perspectives on transnational crime Providing a wide ranging overview of the legal and policy issues that arise in connection with various forms of transnational crime the authors outline the criminal justice responses adopted across different jurisdictions Including contributions from high profile Chinese and European academics and practitioners across a variety of disciplines and methodological backgrounds the authors address some of the hitherto underexplored issues related to transnational crime These range from trafficking in cultural objects derived from illicit metal detecting and metal detecting tourism in China to the European approaches to criminalising the denial of historical truth The central theme of the book is that useful lessons can be drawn from each other's experiences and that a cross fertilisation of domestic approaches to transnational crime is essential to effective cooperation This book will be of use to students and academics of comparative criminal justice and anyone interested in transnational crime
