What teaching strategies can help overcome maths anxiety and specific maths learning difficulties? Without doubt, maths is one of the most important subjects taught in schools and yet it is the one subject that can strike fear and dread in children from the very start of their education. It considers how general maths anxiety impedes mathematical development and then examines whether this or a more fundamental and specific difficulty with maths such as dyscalculia is the real root of difficulties. The book then looks in detail at a wide range of strategies to help overcome general maths anxiety and more specific learning difficulties. It addresses four distinct areas: core number reasoning, memory and visual spatial awareness as the main areas of difficulty for learners with dyscalculia; core number and reasoning, dyslexia; memory and dyspraxia; visual spatial awareness.
