Fantasy Writers,2010-11 What is a dream Modern science isn t sure The general belief runs that dreams are illusions while we sleep our brains process recent electrical memory into long term chemical memory and our minds try to make sense of all the scraps of image and emotion and impression Some people

believe that dreams reveal our innermost desires or our deepest fears We pay analysts a fortune to interpret them Some believe that dreams are visions of the future They've been known to come true Some believe that dreams are messages from someone or somewhere beyond our regular senses Some believe that dreams are glimpses or even visits into other realities the afterlife or worlds that might have been Are dreams real If they exist even only in our minds then how can they not be real So what is a dream Here we present one answer and ten dreams if you will They were at least visions in the minds of the writers Whether they are real is up to you Caitlin R.
