Advances in Language and Education Anne McCabe, Mick O'Donnell, Rachel Whittaker, 2007-07-19 This book examines new functional approaches to language and education and the impact of these on literacy in the classroom The first section looks at issues of multimodality in which the definition of a text is expanded to include not only that which is written down but also the interaction of writing graphics and audiovisual material The contributors explores ways in which language education can be expanded to deal with multimodal discourse whether in children s books in textbooks or on the web The second section looks at how critical discourse analysis and appraisal theory can be used as tools for assessing the effectiveness of student writing and literacy achievement and also for helping developing writers to write more successfully The final section argues that corpus based studies of language have changed the way we see language and that the way we teach language should evolve in line with these changes This appealing survey of new directions in language and education includes contributions from internationally renowned scholars It will be of interest to researchers in systemic functional linguistics or language and education

without revealing its presence or ground and therefore have considerable potential to socialize their audience John Stephens analyses this process and shows how fictions can work to constrain or liberate audience responses He explores picture books as well as historical realistic and fantastic fictions to show how both a character within the narrative and the implied reader are positioned within ideology The author considers areas of ideology not previously examined and offers new perspectives on realism and fantasy The book will be of interest to linguists and teachers as well as to the general reader *Children's Literature Studies* Matthew O.
