**Science Between Myth and History** José G. Perillán, 2021-06-15 Scientists regularly employ historical narrative as a rhetorical tool in their communication of science yet there's been little reflection on its effects within scientific communities and beyond *Science Between Myth and History* begins to unravel these threads of influence The stories scientists tell are not just poorly researched scholarly histories they are myth histories a chimeric genre that bridges distinct narrative modes This study goes beyond polarizing questions about who owns the history of science and establishes a common ground from which to better understand the messy and lasting legacy of the stories scientists tell It aims to stimulate vigorous conversation among science practitioners scholars and communicators Scientific myth histories undoubtedly deliver value coherence and inspiration to their communities They are tools used to broker scientific consensus resolve controversies and navigate power

dynamics Yet beyond the explicit intent and rationale behind their use these narratives tend to have great rhetorical power and social agency that bear unintended consequences This book unpacks the concept of myth history and explores four case studies in which scientist storytellers use their narratives to teach build consensus and inform the broader public From geologically informed quantum interpretation debates to high stakes gene editing patent disputes these case studies illustrate the implications of storytelling in science *Science Between Myth and History* calls on scientists not to eschew writing about their history but to take more account of the stories they tell and the image of science they project In this time of eroding common ground when many find themselves dependent on yet distrustful of scientific research this book interrogates the effects of mismatched dissonant portraits of science

**Emerging Technologies / Life at the Edge of the Future** Sarah Pink, 2022-09-14 *Emerging Technologies Life at the Edge of the Future* invites us to think forward from our present moment of planetary public and everyday crisis through the prism of emerging technologies It calls for a new ethical responsible and equitable path towards possible futures curated through in depth engagement with and across experiential environmental and technological possibilities It tackles three of the most significant challenges for contemporary society by asking how emerging technologies are implicated in the sites of everyday lives what place emerging technologies have in an evolving world in crisis and how we might better imagine and shape ethical equitable and responsible futures The book interweaves three narratives each of which advances three sets of concerns for our societal futures *Emergence* which addresses futures trust and hope *Worlds* which addresses data air and energy and *Technologies* which addresses the future of mobilities homes and work Not simply a critical study of emerging technologies this book is also an approach to thinking and practice in times of global crisis that plays out a mode of future focused scholarship and action for the first half of the twenty first century
