It has been verified in many cases that with the proper methods and tools, teaching and learning at a distance can be as effective as traditional face-to-face instruction. Today, distance education is primarily performed through the Internet, which is the biggest and most powerful computer network of the World, and the World Wide Web (WWW), which is an effective front end to the Internet and allows the Internet users to uniformly access a large repertory of resources: text, data, images, sound, video, etc., available on the Internet.
