

Since Castaneda's figure only
seems to exist
you and alone
it's a still life in the air
it's a flower

In this drawing Castaneda shows you how an entire figure of the figure is made of simple forms. He uses blocks to study the front and side planes and the top and down planes. He then shows a light from the left and from above. Then, if we say only for this to put shade on the side and down planes. If he had drawn perfectly like the figure and put the same light and shade on them, they would have looked very well.

For to show that the figure, Castaneda will show his movement. The line (1) shows the top of the figure.

There is another principle easily shown here. As the entire figure has movement from one block to the next to another, he shows the direction of each form. In other words, objects have only to function with or with.

practices of drawing from the earliest markings on cave walls to the complex technical schematics that make the modern world possible from cartoons and the first efforts of preschoolers to the works of skilled draftspeople and the greatest artists East and West Despite or perhaps because of its ubiquity drawing as such has provoked remarkably little philosophical reflection Nonphilosophical writing on the topic tends to be divided between specialties such as art history and mechanics In this engagingly written and well illustrated book Maynard reveals the interconnections and developments that unite this fundamental autonomous human activity in all its diversity Informed by close discussion of work in art history art criticism cognitive and developmental psychology and aesthetics *Drawing Distinctions* presents a theoretically sophisticated yet approachable argument that will improve comprehension and appreciation of drawing in its many forms uses and meanings
