Hanson, 2013-03-06 We have provided the reader with a resource for applied ethical decision making for use in clinical educational and research settings The Rehabilitation Psychologist using this book will have a choice of utilizing a Quick Reference guide including pro con positions regarding possible resolutions and a tabular summary of the varied case examples presented or making use of more detailed discussion of the ethical concepts pertinent to each case The most important aspect of this book is inclusion of psycho social context for each case This critical factor allows the reader to understand the flow of events and other factors influencing the

actions of the key stakeholders thereby facilitating the ethical decision making process The mix of case examples is intentionally broad based including ample clinical practice situations along with challenges found in educational and research settings There is also variety among the case examples with two detailed scenarios in each chapter along with two briefer learning exercises with focused summaries The reader is challenged to analyze each case and compare the results with the preferred resolution proposed by the authors Finally at the end of the book the reader has access to a list of ethics relevant reading resources These resources are divided into categorical domains that will assist with literature searches and further research into applied ethics The authors trust that this book will serve as a preparatory experience for those psychologists studying for the Rehabilitation Psychology specialty board exam as well as trainees and clinicians at all levels who desire an applied approach to utilizing the APA Ethics Code as an invaluable guide to everyday professional practice
