Praise Be to You - Laudato Si' Pope Francis,2015-07-06 The earth is the common home of humanity It is a gift from God Yet man's abuse of freedom threatens that home In his encyclical Praise Be to You Laudato Si Pope Francis challenges all people to praise God for his glorious creation and to work to safeguard her The encyclical letter takes its name from St Francis of Assisi's Canticle of the Creatures which depicts creation as a sister with whom we share our life and a beautiful mother who opens her arms to embrace us This sister Pope Francis declares now cries out to us because of the harm we have inflicted on her by our irresponsible use and abuse of the goods with which God has endowed her He calls for an integral ecology based on what Pope St John Paul called an ecological conversion a moral transformation linking the proper response to God for the gift of his creation to concern for justice especially for the poor He challenges people to understand ecology in terms of the right ordering of the fundamental relationships of the human person with God oneself other people and the rest of creation Francis examines such ecological concerns as pollution waste and what he calls the throwaway culture Climate he insists is a common good to be protected He explores the proper use of natural resources and notions such as sustainability from a Judeo Christian perspective The loss of biodiversity due to human activities decline in the quality of life for many people global inequality of resources as well as concerns over consumerism and excessive individualism also threaten the good order of creation writes Pope Francis While valuing technology and innovation he rejects efforts to repudiate the natural order including the moral law inscribed in human nature or to rely simply on science to solve ecological problems Moral and spiritual resources are crucial including openness to God's purpose for the world Expounding the biblical tradition regarding creation and redemption in Christ Francis stresses man's subordination to God's plan and the universal communion of all creation Dominion he maintains means responsible stewardship rather than exploitation He rejects treating creation as if it were divine and insists on the primacy of the human person in creation He also explores the roots of the ecological crisis in man's abuse of technology his self centeredness and the rise of practical relativism Without rejecting political changes he implores people to change their hearts and their ways of life Popes Benedict XVI St John Paul II and Blessed Paul VI addressed key themes regarding stewardship of God's creation and justice in the world But Pope Francis is the first to devote an entire encyclical to the subject

Care for the World Frank Pasquale,2019-06-20 This book applies and explores Catholic social thought focusing on the relevance of the encyclical Laudato Si in an era of climate crises

Communicating the Climate Crisis Julia B. Corbett,2021-02-22 Communicating the Climate Crisis puts communication at the center of the change we need providing concrete strategies that help break the

inertia that blocks social and cultural transformation Reimagining earth not just as the ground we walk upon but as the atmosphere we breathe Eairth this book examines our consumption based identities in fossil fuel culture and the necessity of structural change to address the climate crisis Strategies for overcoming obstacles start with facing the emotional challenges and mental health tolls of the crisis that lead to climate silence Breaking that silence through personal climate conversations elevates the importance of the problem finds common ground and eases climate anxiety Climate justice and faith based worldviews help articulate our moral responsibility to take drastic action to protect all humans and the living world This book tells a new story of hope through action not as isolated guilty consumers but as social actors who engage hearts hands and minds to envision and create a desired future

It's Sunday in America Barry R. Harker, 2017-11-07 It's Sunday in America is about the return of mandatory Sunday worship and rest to the center of American national life and how this will shape the future of America and the world American greatness rests upon its constitutional guarantees of civil and religious liberty Separation of church and state in America created favorable conditions for human flourishing Despite this American history records numerous attempts at the state level to undermine the principle of separation through the establishment of laws regulating Sunday For half a century after 1888 persistent attempts to introduce national Sunday legislation were made Today proponents of the myth of separation suggest the founding fathers never intended a wall of separation between church and state Two competing conceptions of American freedom and greatness are contending for the loyalty of Americans The rise of the religious right is creating the space in which conceptions of freedom and greatness that ruled seventeenth century New England are seeping back into national consciousness Sunday observance is central to these conceptions It's Sunday in America is a timely warning about the emerging threats to religious liberty in the world's greatest democracy *Encyclical Letter Laudato Si' of Holy Father Francis on Care of Our Common Home*, 2015-10-05 Humans are causing climate change and there will be Grave Consequences if we don't act fast *Recovering Environmental and Economic Traditions in the Islamic World*, 2024-10-21 Recovering Environmental and Economic Traditions in the Islamic World is an interdisciplinary volume that interrogates varied approaches to environmental and economic thought in classical Islam and in a few contemporary case studies The contributions in this volume critique the dominant economic system and its perspective on the environment as a commodity across the boundaries of multiple intellectual traditions and academic fields The book analyses both historical trajectories and modern schools of thought while simultaneously exploring ethical applications to environmental and economic discourses as a tool of critique In this context the authors conceptualize and treat these discourses as polyvalent and enmeshed with various political ethical and cosmological perspectives and vistas *Our Future in Nature*: Edmund Barrow, 2019-05-21 Who has not felt a sense of awe silence stillness and presence in an ancient woodland or forest or in front of a sacred tree Humankind has held trees and woodlands in awe and reverence since the dawn of time We depend on nature for the air we breathe the water we drink and the services nature provides This book is about the

importance of sacred trees and groves in our stress filled and increasingly urban world Note that over 50 percent of the world is urban Sacred trees and sacred groves transcend race color and creed They are found all over our fragile planet Where there is a tree there is a sacred tree This book will appeal to religious and spiritual traditions as well as to conservation and environmental movements It will offer its reader means to take better care of our only home planet Earth Often undervalued unrecognized or disrespected sacred trees and groves are conserved against mind boggling pressures For example there is a sacred fig tree between two shops in one of the main streets in Hanoi Vietnam There is also a one hectare sacred grove in the center of Kumasi a city of 2.5 million people in Ghana the over 150,000 sacred groves in India and the sacred hill forests of every village in Yunnan South China Sacred trees and groves often conserve unique biodiversity which can help create or recreate connectivity in the landscape As such sacred trees and groves may be relic survivors of bygone ages and are an important resource for restoring degraded natural landscapes This book offers ways for those involved with religion and spirituality and for those working with conservation and land use to jointly engage in repairing the damage we have done to Earth

The Eucharistic Vision of Laudato Si Lucas Briola, 2022-12-28 No other encyclical has generated as much conversation both Catholic and non Catholic as Laudato si Often forgotten in these conversations is the theological heart and eucharistic vision of the encyclical and its integral ecology Even the title of Laudato si Praised be signals the centrality of right praise in caring for our common home Using Bernard Lonergan's theology of history this book unearths the doxological eucharistic vision that shapes the encyclical's integral presentation of social and ecological conversion It offers the first book length study that recovers the eucharistic nature of Laudato si In drawing out the eucharistic vision of Laudato si the book accomplishes several feats for the reader It roots the eucharistic dimensions of the encyclical in the writings of Popes John Paul II and Benedict XVI showing how Pope Francis develops their thought in notable ways It introduces Bernard Lonergan's theology of history showing how his framework can capture the eucharistic contours of caring for our common home so too in light of Laudato si does the book expand his theology of history to incorporate both ecological concern and the doxological eucharistic essence of the church The book assembles a liturgically shaped systematic account of the church's social mission It joins poles otherwise sundered in a polarized church and world between worship and justice between concerns for human life and concerns for the natural world Realizing the eucharistic vision of Laudato si promises much for our contemporary moment Pope Francis recently observed that the integral ecology of Laudato si holds the key for the world's recovery from the COVID 19 pandemic The U.S. Catholic Bishops recently launched a Eucharistic Revival that aims to rekindle eucharistic devotion and praxis The Eucharistic Vision of Laudato Si Praise Conversion and Integral Ecology supplies a timely study that helps fulfill these intertwined calls
