Encyclopedia of Architectural Technology

Jacqueline Glass,2002-04-03 Constant technological advancements are opening up dramatic new possibilities for the built form at the same time architects are developing innovative designs which require new techniques to make these ideas reality The Encyclopedia of Architectural Technology is the first book to specifically address these two issues by providing a comprehensive reference to modern architectural technologies encompassing all key aspects of construction structures environmental design and servicing The Encyclopaedia features over 180 entries ranging from materials and techniques to notable innovators in architecture and engineering Each entry includes a brief quick reference summary followed by a more detailed text and suggestions for further reading Besides technological terms entries are included on related topics such as sick building syndrome and sustainability Key engineers Ove Arup and Ted Happold have dedicated entries as do a range of ground breaking architects such as Le Corbusier Norman Foster Walter Gropius Herzog de Meuron Oscar Niemeyer Richard Rogers Carlo Scarpa Frank Lloyd Wright Ken Yeang and many others

Using the Engineering Literature Bonnie A. Osif,2006-08-23 The field of engineering is becoming

increasingly interdisciplinary and there is an ever growing need for engineers to investigate engineering and scientific resources outside their own area of expertise However studies have shown that quality information finding skills often tend to be lacking in the engineering profession Using the Engineerin Architectural Technology ,2001 Using the Engineering Literature, Second Edition Bonnie A. Osif,2011-08-09 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links on a topic engineers need the best information information that is evaluated up to date and complete Accurate vetted information is necessary when building new skyscrapers or developing new prosthetics for returning military veterans While the award winning first edition of Using the Engineering Literature used a roadmap analogy we now need a three dimensional analysis reflecting the complex and dynamic nature of research in the information age Using the Engineering Literature Second Edition provides a guide to the wide range of resources available in all fields of engineering This second edition has been thoroughly revised and features new sections on nanotechnology as well as green engineering The information age has greatly impacted the way engineers find information Engineers have an effect directly and indirectly on almost all aspects of our lives and it is vital that they find the right information at the right time to create better products and processes Comprehensive and up to date with expert chapter authors this book fills a gap in the literature providing critical information in a user friendly format *Encyclopaedia of Architecture and Technological*

Doing Library Research Robert K. Baker,2019-03-13 Many college students remain

puzzled by card catalogs can't find books they need and fail to use many of the important resources of the library despite tours, explanations and much assistance from librarians. In this book a community college librarian provides the direction students need to utilize the resources typically found in a community college.

Balachandran, 1992-03 **Publications of the American Folklife Center**, 1977 *History of Construction Cultures Volume 2* João Mascarenhas-Mateus, Ana Paula Pires, 2021-07-08. Volume 2 of *History of Construction Cultures* contains papers presented at the 7ICCH Seventh International Congress on Construction History held at the Lisbon School of Architecture, Portugal, from 12 to 16 July 2021. The conference has been organized by the Lisbon School of Architecture, FAUL NOVA School of Social Sciences and Humanities, the Portuguese Society for Construction History Studies and the University of the Azores. The contributions cover the wide interdisciplinary spectrum of Construction History and consist of the most recent advances in theory and practical case studies analysis following themes such as epistemological issues, building actors, building materials, building machines, tools and equipment, construction processes, building services and techniques, structural theory and analysis, political, social and economic aspects, knowledge transfer and cultural translation of construction cultures. Furthermore, papers presented at thematic sessions aim at covering important problematics, historical periods and different regions of the globe, opening new directions for Construction History research. We are what we build and how we build, thus

the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind Therefore History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures from ancient times to our century and all over the world

Materials and Meaning in Architecture Nathaniel Coleman, 2020-02-20 Interweaving architecture philosophy and cultural history Materials and Meaning in Architecture develops a rich and multi-dimensional exploration of materials and materiality in an age when architectural practice seems otherwise preoccupied with image and visual representation Arguing that architecture is primarily experienced by the whole body rather than chiefly with the eyes this broad-ranging study shows how the most engaging built works are as tactile as they are sensuous communicating directly with the bodily senses especially touch It explores the theme of material imagination and the power of establishing place identity in an architect's work to consider the enduring expressive possibilities of material use in architecture The book's chapters can be dipped into each individual chapter providing close readings of built works by selected modern masters Scarpa Zumthor Williams and Tsien insights into key texts and theories Ruskin Loos Bachelard or short cultural histories of materials wood brick concrete steel and glass And yet taken together the chapters build to a powerful book-length argument about how meaning accrues to materials through time and about the need to reinsert the bodily experience of materiality into architectural design It is thus also in part a manifesto arguing for architecture to act as a bulwark against the tide of an increasingly depersonalised built environment With insights for a wide range of readers ranging from students through to researchers and professional designers Materials and Meaning in Architecture will cause theorists to rethink their assumptions and designers to see new potential for their projects
