Worrall, 2021-01-02 Houston and Southeast Texas have an ancient storied prehistory Using data from hundreds of archeological site reports a changing coastal landscape modeled through time in 3D historical information on Native Americans taken from the accounts of the earliest European visitors and digital GIS mapping to weave it all together this book recounts the development of the physical landscape of this region and the cultures of its Native American inhabitants from the peak of the last ice age until the Spanish colonial era Its 504 pages are illustrated with nearly 350 full color maps charts drawings and photographs *Social Complexity and Complex Systems in Archaeology* Dries Daems, 2021-02-22 Social Complexity and Complex Systems in Archaeology turns to complex systems thinking in search of a suitable framework to explore social complexity in Archaeology Social complexity in archaeology is commonly related to properties of complex societies such as states as opposed to so

called simple societies such as tribes or chiefdoms. These conceptualisations of complexity are ultimately rooted in Eurocentric perspectives with problematic implications for the field of archaeology. This book provides an in-depth conceptualisation of social complexity as the core concept in archaeological and interdisciplinary studies of the past, integrating approaches from complex systems thinking, archaeological theory, social practice theory, and sustainability and resilience science. The book covers a long-term perspective of social change and stability, tracing the full cycle of complexity trajectories from emergence and development to collapse, regeneration, and transformation of communities and societies. It offers a broad vision on social complexity as a core concept for the present and future development of archaeology. This book is intended to be a valuable resource for students and scholars in the field of archaeology and related disciplines such as history, anthropology, sociology, as well as the natural sciences studying human-environment interactions in the past.
