End Of Life Care For Children And Adults With Intellectual And Developmental Disabilities:

End of Life and People with Intellectual and Developmental Disability Roger J. Stancliffe, Michele Y. Wiese, Philip McCallion, Mary McCarron, 2022-06-11 This book on end of life examines how to include people with intellectual and developmental disability in the inevitability of dying and death. Comprising 17 chapters it addresses challenging and under researched topics including suicide, do not resuscitate, advance care planning, death doulas and accessible funerals. Topics reflect everyday community palliative care, hospice and disability services. The book proposes that the rights of people with disabilities should be supported up to and after their death. Going beyond problem identification, the chapters offer positive evidence supported responses that translate research to practice together with practice examples and resources grounded in lived experience. The book is applicable to readers from the disability field and mainstream health professionals who assist people with disability in emergency care, palliative care or end of life planning. *End-of-life Care for Children and Adults with Intellectual and Developmental Disabilities* Sandra L.
