Avatar and Nature Spirituality Bron Taylor, 2013-09-30 Avatar and Nature Spirituality explores the cultural and religious significance of James Cameron s film Avatar 2010 one of the most commercially successful motion pictures of all time Its success was due in no small measure to the beauty of the Pandora landscape and the dramatic heart wrenching plight of its nature venerating inhabitants To some audience members the film was inspirational leading them to express affinity with the film s message of ecological interdependence and animistic spirituality Some were moved to support the efforts of indigenous peoples who were metaphorically and sympathetically depicted in the film to protect their cultures and environments To others the film was politically ethically or spiritually dangerous Indeed the global reception to the film was intense contested and often confusing To illuminate the film and its reception this book draws on an interdisciplinary team of scholars experts in indigenous traditions religious studies anthropology literature and film and post colonial studies Readers will learn about the cultural and religious trends that gave rise to the film and the reasons these trends are feared resisted and criticized enabling them to wrestle with their own views not only about the film but about the controversy surrounding it Like the film itself Avatar and Nature Spirituality provides an opportunity for considering afresh the ongoing struggle to determine how we should live on our home planet and what sorts of political economic and spiritual values and practices would best guide us

Endgame: The

Fugitive Archives Volume 2: The Moscow Meeting James Frey, 2017-03-07 This eighth prequel novella continues an all new digital original arc in the Endgame world and follows a forbidden love that threatens Endgame in post World War II Germany. Humanity rests on the shoulders of twelve Players. But when the lives of a Cahokian Player and a Minoan Player intertwine over the search for an ancient weapon in post World War II Berlin, the last thing they expect is to let their guard down and fall in love. Now the fate of the world is threatened as Boone and Ariadne race against the clock to keep the weapon from falling into the wrong hands. But this is Endgame. And only one can win. This heart stopping novella arc takes place prior to the events in the New York Times bestseller Endgame: The Calling.

Time's Up! Keith Farnish, 2009 From the Publisher: People know that the climate is changing for the worse, that species are being driven to extinction at a rapidly increasing rate, and that entire ecosystems are becoming shadows of their former richness. They know, but they do not understand. The global environmental crisis is closing in on humanity from all directions, yet the crisis barely registers on this culture's list of problems. As we stand around, humanity is doomed to a collapse that may leave only a few nomads and a toxic, barely survivable Earth in its wake. So why is nothing being done beyond changing light bulbs, recycling, and buying organic food? It's certainly not for a lack of good reasons. Humans have no motivation stronger than survival, yet the culture that dominates the world we call industrial civilization has created a set of priorities that values financial wealth, the possession of superfluous goods, and short cheap thrills above that most basic need. In short, we are prepared to die in order to live a life that is killing us. *Time's Up!* is about changing our behavior. The book describes how our actions affect the very things on Earth that we depend on for survival at scales that we rarely contemplate. It arms us with the tools to free us from a culture that has blinded us for centuries and which will allow us to live in a way that will give Earth and ourselves a viable future.

Life on the Brink Philip Cafaro, Eileen Crist, 2012-12-01 *Life on the Brink* aspires to reignite a robust discussion of population issues among environmentalists, environmental studies scholars, policymakers, and the general public. Some of the leading voices in the American environmental movement restate the case that population growth is a major force behind many of our most serious ecological problems, including global climate change, habitat loss, and species extinctions, air and water pollution, and food and water scarcity. As we surpass seven billion world inhabitants, contributors argue that ending population growth worldwide and in the United States is a moral imperative that deserves renewed commitment. Hailing from a range of disciplines and offering varied perspectives, these essays hold in common a commitment to sharing resources with other species and a willingness to consider what will be necessary to do so. In defense of nature and of a vibrant human future, contributors confront hard issues regarding contraception, abortion, immigration, and limits to growth that many environmentalists have become too timid or politically correct to address in recent years. Ending population growth will not happen easily. Creating genuinely sustainable societies requires major change to economic systems and ethical values, coupled with clear thinking and hard work. *Life on the Brink* is an invitation to join the discussion about the great work of

building a better future Contributors Albert Bartlett Joseph Bish Lester Brown Tom Butler Philip Cafaro Martha Campbell William R Catton Jr Eileen Crist Anne Ehrlich Paul Ehrlich Robert Engelman Dave Foreman Amy Gulick Ronnie Hawkins Leon Kolankiewicz Richard Lamm Jeffrey McKee Stephanie Mills Roderick Nash Tim Palmer Charmayne Palomba William Ryerson Winthrop Staples III Captain Paul Watson Don Weeden George Wuerthner **CTS and Right-Wing Terrorism and Counterterrorism** Alice Martini, Raquel da Silva, 2023-08-22 This volume is a timely contribution to the current debates and potential efforts to study and counter the phenomena of extreme right violence in a period when the rise of right wing extremism is being witnessed across the globe Against this backdrop the violent radicalisation and extremism of individuals and groups belonging to the extreme right threaten to undermine and destabilize societies and democratic orders leaving a research gap that has only started to be filled in recent years but that is still quite wide when it comes to counter terrorism approaches to extreme right violence Learning from the past and trying to avoid similar mistakes this volume creates a much needed space for open honest and ethical debate around countering extreme right violence answering social and political calls to debate how to counter this kind of violence This volume brings together a group of interdisciplinary scholars to contribute to national and international academic and policy debates about countering extreme right violence from a critical perspective Volume I focuses particularly on exploring how extreme right violence has been approached narrated and made sense of in different spatial and temporal contexts examining how political actors such as media and politicians portray the threat of and actual violence perpetrated by the extreme right deconstructing current counter terrorism approaches and formulating a critical approach to researching extreme right violence It will be of great interest to all students of terrorism studies security studies international relations and political science in general The chapters in this book were originally published in Critical Studies on Terrorism *The Cost of Globalization* Julian E. Kunnie, 2015-03-27 The issues arising from rapid global integration have generally been treated in isolation by most academic works This volume examines the many pitfalls of globalization from the perspective of impoverished and indigenous peoples including the widening wealth gap the struggle for restoration of dispossessed lands and cultural rights global warming and ecological annihilation and the experiences of women in underdeveloped regions The United States growing prison industrial complex is discussed The author concludes with a call for reassessing current ways of living and proposes recreating cultures of conservation and sustainable economies Instructors considering this book for use in a course may request an examination copy here

Anarcho-primitivism , *Beware of the Other Side(s)* Heike Schwarz, 2014-03-15 This interdisciplinary study examines the still vivid phenomenon of the most controversial psychiatric diagnosis in the United States multiple personality disorder now called dissociative identity disorder This syndrome comprehends the occurrence of two or more distinct identities that take control of a person's behavior paired with an inexplicable memory loss Synthesizing the fields of psychiatry and the dynamics of the disorder with its influential representation in American fiction the study researches how psychiatry and

fiction mutually shaped a mysterious syndrome and how this reciprocal process created a genre fiction of its own that persists until today in a very distinct self referential mode *Romans Disarmed* Sylvia C. Keesmaat, Brian J.

Walsh, 2019-05-21 Globalization Homelessness Ecological and economic crisis Conflicts over sexuality Violence These crisis level issues may seem unique to our times but Paul's Letter to the Romans has something to say to all of them Following their successful Colossians Remixed Sylvia Keesmaat and Brian Walsh unpack the meaning of Romans for its original context and for today The authors demonstrate how Romans disarms the political economic and cultural power of the Roman Empire and how this ancient letter offers hope in today's crisis laden world Romans Disarmed helps readers enter the world of ancient Rome and see how Paul's most radical letter transforms the lives of the marginalized then and now Intentionally avoiding abstract debates about Paul's theology Keesmaat and Walsh move back and forth between the present and the past as they explore themes of home economic justice creation care the violence of the state sexuality and Indigenous reconciliation They show how Romans engages with the lived reality of those who suffer from injustice both in the first century and in the midst of our own imperial realities War Ethics: Theory, Practice, and Memoir Brian Orend, 2025-04-23 War Ethics Theory

Practice and Memoir is an extraordinarily diverse collection of over ninety readings on the ethics law morality and justice of armed conflict Each of the foundational theories of war ethics realism pacifism just war theory and international law is examined in depth as are challenging alternative perspectives from feminist thinkers and the world's major religions A substantial section on contemporary issues covers topics ranging from cyberwar AI terrorism and drones to torture war's environmental impacts and the rights of soldiers and veterans Also included is an extensive collection of riveting first person accounts from soldiers civilians and observers which powerfully convey the personal impacts of war Introductory discussions and summary articles from Brian Orend are integrated throughout the text including a closing essay on new technologies and the future of war

Eco-Nihilism Wendy Lynne Lee, 2017-02-22 If we were to ask what is the root cause of our current and unprecedented environmental crisis climate change many particularly on the progressive Left would refer to the excesses of capitalism and they'd be right In *Eco Nihilism The Philosophical Geopolitics of the Climate Change Apocalypse* Wendy Lynne Lee demonstrates that there are no versions of conquest capital compatible with the fact of a finite planet and that a logic whose operating premise is growth is destined to not only exhaust our planetary resources but also generate profound social injustice and geopolitical violence in its pursuit Nonetheless it is clear that the violence and injustice of capital is selective some benefit greatly while others are subjugated to its pathological drive to profit Hence Lee argues that any comprehensive analysis of what Jason Moore has dubbed the Capitalocene must include an equally probing account of human chauvinism that is the axes along which capital is supplied with resources and labor Defined in terms of race sex gender and species these axes come ready made to the advantage of capitalist commodification Without an understanding of how and why humanity will remain doomed to settling for a sustainably unjust world as opposed to realizing a just and desirable one

Indeed on our current trajectory we may not even achieve the sustainable The introduction of climate change into the mix of environmental deterioration the ever widening economic gap between global North and global South and the accelerating violence of terrorism civil war and human slavery make of a warming planet a combustible world The only way out requires ending the myth of endless resources a rejection of climate change denial and a radical re valuation of human centeredness not as a locus of power but as an opportunity to take moral and epistemic responsibility for a world whose biotic diversity and ecological integrity make the struggle to realize it worthwhile This solution demands not only an end to capitalism but the deliberate reclamation of value aesthetic moral and civic and a radical transformation of both personal and collective conscience Lee appeals to the experiential aesthetics of John Dewey and the feminist concept of the standpoint of the subjugated She argues for a version of the precautionary principle informed by an environmentally and socially responsible concept of the desirable future as the clearest path away from the precipice
