Energy Statistics Oecd Countries 2015:

Energy Statistics of OECD Countries Organization for Economic Cooperation and Development, 2015-07-15 This volume contains data on the supply and consumption of coal oil gas electricity heat renewables and waste presented as comprehensive energy balances expressed in million tonnes of oil equivalent International Energy Outlook Government Publications Office, 2016-08-15 International Outlook 2016 an updated statistical reference with energy projections is provided as a service to energy managers and analysts both in government and in the private sector The projections are used by international agencies federal and state governments trade associations and other planners and decision makers They are published pursuant to the Department of Energy Organization Act of 1977 Public Law 95 91 Section 205 c The report begins with a review of world trends in energy demand and the major macroeconomic assumptions used in deriving the International Energy Outlook 2016 IEO2016 projections along with the major sources of uncertainty in the projections which extend through 2040 In addition to the Reference case projections High Economic Growth and Low Economic Growth cases were developed to consider the effects of higher and lower growth paths for economic activity than are assumed in the Reference case IEO2016 also includes a High Oil Price case and alternatively a Low Oil Price case The resulting projections and the uncertainty associated with international energy projections in general are discussed in Chapter 1 World energy demand and economic outlook Projections for energy consumption and production by fuel petroleum and other liquid fuels natural gas and coal are presented in Chapters 2 3 and 4 along with reviews of the current status of each fuel on a worldwide basis Chapter 5 discusses the projections for world electricity markets including nuclear power hydropower and other marketed renewable energy resources and presents projections of world installed generating capacity Chapter 6 presents a discussion of energy used in the buildings sector residential and commercial Chapter 7 provides a discussion of industrial sector energy use Chapter 8 includes a detailed look at the world's transportation energy use Finally Chapter 9 discusses the outlook for global energy related carbon dioxide emissions IEO 2016 focuses exclusively on marketed energy Non marketed energy sources which continue to play an important role in some developing countries are not included in the estimates Related products Energy Fuels resources collection can be found here <https://bookstore.gpo.gov/catalog/science/technology/energy/fuels> More statistical references can be found here <https://bookstore.gpo.gov/catalog/statistics/data> *Non-Fossil Energy Development in China* Yunzhou Zhang, 2018-11-27 Nonfossil Energy Development in China Goals and Challenges explores the development of non fossil energy sources which is very important for China to protect its energy supply deal with climate change and adjust its energy structure At present the development of energy and electricity is undergoing profound change The core and most prominent feature is the sudden emergence of clean energy exerting a decisive influence on the future energy industry Due to history and resource limitation a series of problems in the energy development of China have existed for a long time such as poor energy structure serious environmental pollution large carbon emissions low

energy efficiency regional supply and demand imbalances The Chinese government has set the development goal for nonfossil energy to 15% in primary energy consumption in 2020 The connotation and interpretation of the goal possible development scenarios feasible implementation paths and corresponding benefit costs are all the major issues this book explains in detail and demonstrates by models Demonstrates how to safely economically and efficiently meet the Chinese government's energy development target for non fossil energy Analyzes energy development scenarios by using the energy demand and supply model electricity demand forecasting model and power system optimization planning models Focuses on practical problems and algorithms

Energy, the Environment, and Sustainability Efsthios E. Michaelides, 2018-04-27

Energy and the Environment explains in simple terms what the energy demand is at the present what the environmental effects of energy use are and what can be accomplished to alleviate the environmental effects of energy use and ensure adequate energy supply Though technical in approach the text uses simple explanations of engineering processes and systems and algebra based math to be comprehensible to students in a range of disciplines Schematic diagrams quantitative examples and numerous problems will help students make quantitative calculations This will assist them in comprehending the complexity of the energy environment balance and to analyze and evaluate proposed solutions

International Energy Outlook, 1996

Energy in Agroecosystems Casado, Manuel Gonzalez de Molina, 2017-01-12

Energy in Agroecosystems A Tool for Assessing Sustainability is the first book on energy analysis that is up to date and specifically dedicated to agriculture It is written from an agroecological perspective and goes beyond the conventional analysis of the efficient use of energy The book provide a methodological guide to assess energy efficiency and sustainability from an eco energetic point of view Case studies from both Europe and America which are representative of today's most used scales of analysis crop farm local or national and the different farm management practices traditional industrialized and contemporary organic apply this methodology This book will be of primary interest to researchers practitioners and students working in the areas of agroecology sustainable agriculture environmental science energy analysis natural resources management rural development and international development

Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates

Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data. On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology.

Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique. Mostly there is no general argument leading from one contribution to the next. However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on organisational performance it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness.

Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.

Chemical Energy from Natural and Synthetic Gas Yatish T. Shah, 2017-03-16. Commercial development of energy from renewables and nuclear is critical to long term industry and environmental goals. However it will take time for them to economically compete with existing fossil fuel energy resources and their infrastructures. Gas fuels play an important role during and beyond this transition away from fossil fuel dominance to a balanced approach to fossil, nuclear and renewable energies. *Chemical Energy from Natural and Synthetic Gas* illustrates this point by examining the many roles of natural and synthetic gas in the energy and fuel industry, addressing it as both a transition and end game fuel. The book describes various types of gaseous fuels and how they are recovered, purified and converted to liquid fuels and electricity generation and used for other static and mobile applications. It emphasizes methane syngas and hydrogen as fuels although other volatile

hydrocarbons are considered. It also covers storage and transportation infrastructure for natural gas and hydrogen and methods and processes for cleaning and reforming synthetic gas. The book also deals with applications such as the use of natural gas in power production in power plants, engines, turbines, and vehicle needs. Presents a unified and collective look at gas in the energy and fuel industry, addressing it as both a transition and end game fuel. Emphasizes methane syngas and hydrogen as fuels. Covers gas storage and transport infrastructure. Discusses thermal gasification, gas reforming, processing, purification, and upgrading. Describes biogas and bio hydrogen production. Deals with the use of natural gas in power production in power plants, engines, turbines, and vehicle needs.

Energy Transitions Vaclav Smil, 2016-12-05. This book provides a detailed global examination of energy transitions, supplying a long term historical perspective, an up to date assessment of recent and near term advances in energy production technology and implementation, and an explanation of why efforts to limit global warming and to shift away from fossil fuels have been gradual. Based on the best international and national statistical sources, the second edition of Energy Transitions: Global and National Perspectives supplies an in depth evaluation of how economies and nations around the world are striving to move away from traditional energy sources, the unfolding decarbonization process, and problems with intermittent energies and national transition plans. It supplies readers with a clear introduction to the basic properties of energy systems and key concepts of their appraisal, puts energy transition patterns in long term historical perspective, and looks at the energy transition in eight of the world's leading economies. The last chapters focus on the advances in the decarbonization of the global energy supply and consider how the energy transition will continue in the coming decades. This fully updated and substantially expanded edition addresses the many new developments affecting energy supply, such as the recent expansion of hydraulic fracturing, oil price fluctuations, the Fukushima nuclear power plant catastrophe, advances in solar and wind generation, adoption of combined cycle gas turbines, and increased availability of electric cars. The coverage highlights the differences in the pace of transitions in various countries, thereby providing a complete and accurate picture of the current state of energy development in different parts of the world. The book serves as an invaluable resource for students as well as for anyone interested in a realistic appraisal of the current state of energy transitions in various nations and regions, and the likely future development of the global energy supply.

GCC Oil in World Energy Markets The Emirates Center for Strategic Studies and Research, 2021-08-16. For decades, the oil produced by the Gulf Cooperation Council (GCC) countries has been a pillar of the global energy market, providing a reliable source of energy which in turn has strengthened the global economy. Acknowledging the international importance of the energy sector, the Emirates Center for Strategic Studies and Research (ECSSR) convened its 21st Annual Energy Conference from November 24 to 25, 2015, titled GCC Oil in World Energy Markets: Continuity and Change. The conference examined the Gulf oil industry in the context of economic, technological, and geopolitical developments. It also analyzed the ways in which the relative importance of Gulf oil may have eroded as a result of recent oil market developments. In addition, the conference highlighted

some of the factors that could revive this prominence in the years to come This book documents key insights from the conference s four panels The first panel focused on the domestic and international factors that determine the nature and scope of GCC oil production and exports while the second assessed the impact that major global energy market developments have had on global oil prices and production rates The third panel examined the influence of technological advancements on the supply and demand side of GCC oil the final panel focused on the interplay between energy production and geostrategic rivalries International Law and Renewable Energy Investment in the Global South Avidan Kent,2021-10-13 This book will

discuss the legal tools offered by international law that can support foreign direct investment FDI in the renewable energy sector in the Global South Promoting and increasing investment in the renewable energy sector is crucial for limiting global temperature rise to 1.5 C and addressing energy poverty in the Global South In this volume Avidan Kent explores the various home country measures HCMs offered by international law that support FDI in the renewable energy sector This book provides a bird s eye evaluation of HCMs from fields such as trade law investment law environmental law development law and more It reveals that while international law indeed offers many legal tools to support investors needs the current legal framework is fragmented most legal instruments were designed in isolation and the potential for mutually supportive synergetic policies has been explored only to a limited extent This fragmented reality is in contradiction to the notion of Policy Coherence for Development which is increasingly gaining support in leading institutions in Europe and elsewhere This book will provide recommendations on the manner in which HCMs can be connected in order to maximise their potential and boost investment in renewable energies in the developing world International Law and Renewable Energy Investment in the Global South will be of great interest to scholars students and practitioners of international law energy studies development studies and IR more broadly *Energy Outlook for Asia and the Pacific 2009* Asian Development Bank,2009-10-01 This

report attempts to project the balance between energy demand and supply for the 48 regional members of the Asian Development Bank However due to the unavailability of energy data the Marshall Islands the Federated States of Micronesia and Tuvalu are not included in the study The outlook results are presented by member by subregion and by region Based on the projected energy demand and supply carbon dioxide emissions and investment requirements are derived These will offer a basis for policy making and development planning geared toward sustainable economic development in the regional members in Asia and the Pacific *The Economics and Econometrics of the Energy-Growth Nexus* Angeliki

Menegaki,2018-03-29 The Economics and Econometrics of the Energy Growth Nexus recognizes that research in the energy growth nexus field is heterogeneous and controversial To make studies in the field as comparable as possible chapters cover aggregate energy and disaggregate energy consumption and single country and multiple country analysis As a foundational resource that helps researchers answer fundamental questions about their energy growth projects it combines theory and practice to classify and summarize the literature and explain the econometrics of the energy growth nexus The book provides

order and guidance enabling researchers to feel confident that they are adhering to widely accepted assumptions and procedures Provides guidance about selecting and implementing econometric tools and interpreting empirical findings Equips researchers to get clearer pictures of the most robust relationships between variables Covers up to date empirical and econometric methods Combines theory and practice to classify and summarize the literature and explain the econometrics of the energy growth nexus The Interconnected Arctic — UArctic Congress 2016 Kirsi Latola,Hannele Savela,2017-06-15 This open access book presents the most current research results and knowledge from five multidisciplinary themes Vulnerability of Arctic Environments Vulnerability of Arctic Societies Local and Traditional Knowledge Building Long term Human Capacity New Markets for the Arctic including tourism and safety The themes are those discussed at the first ever UArctic Congress Science Section St Petersburg Russia September 2016 The book looks at the Arctic from a holistic perspective how the environment both marine and terrestrial and communities can adapt and manage the changes due to climate change The chapters provide examples of the state of the art research bringing together both scientific and local knowledge to form a comprehensive and cohesive volume Except where otherwise noted this book is licensed under a Creative Commons Attribution 4 0 International License To view a copy of this license visit <http://creativecommons.org/licenses/by/4.0/> China's Carbon-Energy Policy and Asia's Energy Transition Akihisa Mori,2021-12-29 This book seeks to examine the impacts associated with China s carbon energy policy in Asia and how coupled with the Belt and Road Initiative these effects prompt foreign direct investments in coal power and exports of renewable energy technologies China shows a co evolution of carbon energy policy and energy transitions from coal to renewables Assessing how the policy intensifies pressures and motivations to Chinese companies chapters in this edited volume analyse how the policy has changed energy and CO2 emissions in Asia through the lens of carbon leakage relocation and halos Contributors present in depth studies on China s investments and exports and also its impacts on Indonesia India Vietnam and Japan Using applied computable general equilibrium and scenario input output analyses chapters investigate if regional electricity connectivity reduces new coal power investments through efficiency gain Arguing that China is shifting from the world s factory to the leading innovator and Asia s demand centre it is ultimately demonstrated that China is likely to achieve climate targets whereas Asia to increase CO2 emissions and economic reliance on China China s Carbon Energy Policy and Asia s Energy Transition will be of significant interest to students and scholars of energy environment and sustainability studies as well as Chinese studies and economics **Financing Sustainable Development in Africa** Uchenna R. Efobi,Simplice Asongu,2018-05-15 This edited volume provides a critical evaluation of financing options for sustainable development in Africa While sustainability has long been the watchword for development programs and while many African countries have taken initiatives to develop integrated frameworks that tackle developmental challenges including poverty education and health financing has remained a challenge In this book an expert team of chapter authors examines new financing options

while also exploring how traditional financing means such as foreign aid and foreign direct investment can be more effective for sustainability The authors discuss how African nations can build adequate structures and productive capacity to create a platform that can meet present economic social and environmental needs without compromising the ability of future generations to meet their own needs Practical case studies and scientific evidence give this book a unique approach that is both qualitative and quantitative This book will be of interest to students practitioners and scholars of development studies public policy and African economics

Energy Efficiency Financing and Market-Based Instruments Yang Liu, Farhad Taghizadeh-Hesary, Naoyuki Yoshino, 2021-09-21 This book is devoted to investigating the policy design and effectiveness of financial and market based instruments to promote energy efficiency financing The concept of this monograph is to present the latest results related to energy efficiency funding schemes energy efficiency obligations voluntary agreements auction mechanisms and Super Energy Services Companies Super ESCOs in major jurisdictions across the world The book focuses on financial and market based instruments as they deliver a price signal which provides an incentive for firms to invest in innovation or implement more energy efficient technologies and deliver energy savings while minimizing costs Such instruments can have significant advantages for the government supporting the fiscal sustainability of the government s energy efficiency efforts requiring less enforcement than regulation and according the market flexibility to select the most cost efficient technologies This book is highly recommended to researchers policy experts and business specialists who seek an in depth and up to date integrated overview of energy efficiency financing

A Guide to Energy Forecasting Graham Duxbury, 2017-09-26 This book explores the purposes methodologies modelling techniques and weaknesses in energy forecasting It provides a rare appraisal of what is generally known as the end use sector approach to global demand forecasting It exposes the fallibilities that are hidden in the seductive power point presentations of forecasters and the false sense of accuracy bestowed upon them It nevertheless stresses that forecasting remains crucial and of value to the industry By raising awareness of the forecasting risks and the often smoke and mirrors nature of the exercise as well as offering commentary on how the process and use of forecasts could be improved although not necessarily the accuracy this book is must read for those in government corporate planning and financing sectors of the energy industry who rely on forecasts to make policy investment and trading decisions

Managing Resource Abundance and Wealth Jonathon W. Moses, Bjørn Letnes, 2017-05-19 *Managing Resource Abundance and Wealth* The Norwegian Experience describes the sundry and significant challenges both economic and political facing petroleum producing countries The volume outlines the pitfalls that policymakers encounter in the aftermath of a major resource discovery and what they can do to protect their countries from the most adverse consequences These lessons are derived from two very different sources The broader if still underdeveloped social science literature that examines the Paradox of Plenty in its disparate forms and the experience of a country that has successfully managed its natural resources over several decades As a small country on the margins of

Europe Norway has stood up to powerful international interests in one of the world's most powerful industries Norway has exerted sovereign control over its natural environment and exploited its resources in a way that has delivered significant wealth to its citizens This volume explains how Norway has largely avoided the Paradox of Plenty It aims to demonstrate the variety of policy tools that are available to states rich in natural resources and how these tools can be adjusted to changing domestic and international contexts It considers a number of questions such as how countries need to administer and regulate the industry to consider the costs and benefits associated with various contract and licensing regimes and fiscal arrangements to maintain competitiveness and avoid becoming too dependent upon the sector to maximize local content and to protect the broader economy from the volatility of petroleum prices The volume shows how the industry can be managed in a democratic just and ethical manner and for the benefit of the general population

Finance, Society and Sustainability
Nick Silver, 2017-08-10 This book is a critical analysis of the impact of the financial system on the economy society and the natural environment It cuts through the noise to look at its purpose its activities and what it does in practice Unlike other books that cover the last financial crisis and the risk of another one this book is about the consequence of the financial system continuing in its current form It argues that the financial system is a construct of flawed economic theories designed in the hope that the market will efficiently allocate society's capital Instead the finance sector allocates savings and investment to maximize its own revenues with resulting collateral damage to the economy society and the environment Although governments try to preserve and regulate the existing system it is being replaced by a new system driven by technological innovation The book describes the opportunities this presents for a renaissance of the financial system to actually meet the needs of society and to re-engineer our economy to avoid environmental crisis The book is for anyone who would like to understand the finance system's purpose what it does in practice and its impact on the real world For those working in the industry it provides an overview of the system their place within it and how to bring about change For students and academics it provides a valuable critique of the financial system and the theories on which it is based For financial policymakers and regulators it identifies key challenges in their activities
