Analyzing Global Social Media Consumption Wamuyu, Patrick Kanyi, 2020-10-16 Social media has revolutionized how individuals communities and organizations create share and consume information Similarly social media offers numerous opportunities as well as enormous social and economic ills for individuals communities and organizations Despite the increase in popularity of social networking sites and related digital media there are limited data and studies on consumption patterns of the new media by different global communities Analyzing Global Social Media Consumption is an essential reference book that investigates the current trends practices and newly emerging narratives on theoretical and empirical research on all aspects of social media and its global use Covering topics that include fake news detection social media addiction and motivations and impacts of social media use this book is ideal for big data analysts media and communications experts researchers academicians and students in media and communications information

systems and information technology study programs *The Global Encyclopaedia of Informality, Volume 2* Alena Ledeneva, 2018-01-17

Alena Ledeneva invites you on a voyage of discovery to explore society's open secrets, unwritten rules and know-how practices. Broadly defined as ways of getting things done, these invisible yet powerful informal practices tend to escape articulation in official discourse. They include emotion-driven exchanges of gifts or favours and tributes for services; interest-driven know-how from informal welfare to informal employment and entrepreneurship; identity-driven practices of solidarity and power-driven forms of co-optation and control. The paradox or not of the invisibility of these informal practices is their ubiquity. Expertly practised by insiders but often hidden from outsiders, informal practices are, as this book shows, deeply rooted all over the world yet underestimated in policy. Entries from the five continents presented in this volume are samples of the truly global and ever-growing collection made possible by a remarkable collaboration of over 200 scholars across disciplines and area studies. By mapping the grey zones, blurred boundaries, types of ambivalence and contexts of complexity, this book creates the first Global Map of Informality. The accompanying database www.informality.com is searchable by region, keyword or type of practice, so do explore what works, how, where and why.

Praise for Global Encyclopaedia of Informality

The Global Informality Project unveils new ways of understanding how the state functions and ways in which civil servants and citizens adapt themselves to different local contexts by highlighting the diversity of the relationships between state and society. The project is of great interest to policymakers who want to imagine solutions that are beneficial for all but sufficiently pragmatic to ensure a seamless implementation, particularly in the field of cross-border trade in developing countries.

Kunio Mikuriya, Secretary General of the World Customs Organisation, Brussels

An extremely interesting and stimulating collection of papers. Ledeneva's challenging ideas, first applied in the context of Russia's economy of shortage, came to full blossom and are here contextualized by practices from other countries and contemporary systems. Many original and relevant practices were recognized empirically in socialist countries, but this book shows their generality.

János Kornai, Allie S. Freed Professor of Economics Emeritus at Harvard and Professor Emeritus at Corvinus University of Budapest

Alena Ledeneva's Global Encyclopedia of Informality is a unique contribution providing a global atlas of informal practices through the contributions of over 200 scholars across the world. It is far more rewarding for the reader to discover how commonalities of informal behavior become apparent through this rich texture, like a complex and hidden pattern behind local colors, than to presume top-down universal benchmarks of good versus bad behavior. This book is a plea against reductionist approaches of mathematics in social science in general and corruption studies in particular and makes a great read as well as an indispensable guide to understand the cultural richness of the world.

Alina Mungiu-Pippidi, Professor of Democracy Studies, Hertie School of Governance, Berlin

Transformative scholarship in method, object and consequence. Ledeneva and her networked expertise not only enable us to view the informal comparatively but challenge conventionally legible accounts of membership, markets, domination and resistance with these rich accounts from five continents. This project

offers nothing less than a social scientific revolution if the broader scholarly community has the imagination to follow through And by globalizing these informal knowledges typically hidden from view the volumes contributors will extend the imaginations of those business consultants movement mobilizers and peace makers who can appreciate the value of translation from other world regions in their own work Michael D Kennedy Professor of Sociology and International and Public Affairs Brown University and author of *Globalizing Knowledge* Don't mistake these weighty volumes for anything directory like or anonymous This wonderful collection of short essays penned by many of the single best experts in their fields puts the reader squarely in the kinds of conversations culled only after years of friendship trust and with the keen eye of the practiced observer Perhaps most importantly the remarkably wide range of offerings lets us de parochialise corruption and detach it from the usual hyper local and cultural explanations The reader in the end is the one invited to consider the many and striking commonalities Bruce Grant Professor at New York University and Chair of the US National Council for East European and Eurasian Research

Ivory, Sandra Braman, Dorothea Kleine, David J. Grimshaw, 2015-02-17 The International Encyclopedia of Digital Communication and Society offers critical assessments of theoretical and applied research on digitally mediated communication a central area of study in the 21st century Unique for its emphasis on digital media and communication and for its use of business and management perspectives in addition to cultural developmental political and sociological perspectives Entries are written by scholars and some practitioners from around the world with exceptional depth and international scope of coverage in five themes Social Media Commercial Applications Online Gaming Law and Policy and Information and Communicative Technology for Development Features leading research in the fields of Media and Communication Studies Internet Studies Journalism Studies Law and Policy Studies Science Technology and Innovation Studies and many more Organized in an accessible A Z format with over 150 entries on key topics ranging from 2 000 to 10 000 words Part of The Wiley Blackwell ICA International Encyclopedias of Communication series published in conjunction with the International Communication Association Online version available at www.wileyicaencyclopedia.com

Post-Truth Populism Saul Newman, Maximilian Conrad, 2024-10-01 This open access book analyses the convergence between post truth political culture and the politics of populism The premise is that there is an intrinsic link between post truth discourse referring to mis disinformation alternative facts fake news conspiracy theories and the general distrust of expert knowledge and official sources of information and the central narrative of populism which opposes the common sense wisdom of ordinary honest people to the expert knowledge of duplicitous technocratic elites The book investigates the current post truth phenomenon as a distinct feature of contemporary political life and the specific ways in which it intersects with the resurgence of populism While there has been a considerable literature on both post truth and populism they are largely treated as separate phenomena and very little research has been conducted on their actual

connection The original contribution of this book to an emerging field of study is to develop a strong coherent and empirically informed theoretical framework for understanding the specific paradigm of post truth populism The authors propose this paradigm as a way of interpreting different contemporary political phenomena such as conspiracy theories political destabilisation and debates around immigration the role of journalists and the media climate change gender and sexuality Islam and minority rights as well as a way of understanding the threats and challenges this poses to the liberal democratic model and way of life

Constitutionalising Social Media Edoardo Celeste, Amélie Heldt, Clara Iglesias Keller, 2022-06-30 This book explores to what extent constitutional principles are put under strain in the social media environment and how constitutional safeguards can be established for the actors and processes that govern this world in other words how to constitutionalise social media Millions of individuals around the world use social media to exercise a broad range of fundamental rights However the governance of online platforms may pose significant threats to our constitutional guarantees The chapters in this book bring together a multi disciplinary group of experts from law political science and communication studies to examine the challenges of constitutionalising what today can be considered the modern public square The book analyses the ways in which online platforms exercise a sovereign authority within their digital realms and sheds light on the ambiguous relationship between social media platforms and state regulators The chapters critically examine multiple methods of constitutionalising social media arguing that the constitutional response to the global challenges generated by social media is necessarily plural and multilevel All topics are presented in an accessible way appealing to scholars and students in the fields of law political science and communication studies The book is an essential guide to understanding how to preserve constitutional safeguards in the social media environment

Proceedings of the 2nd International Conference on Democracy and Social Transformation (ICON-DEMOST 2023) Naili Ni'matul Illiyyun, Endang Supriadi, Ririh Megah Safitri, Masrohatun Masrohatun, 2024-01-05 This is an open access book Faculty of Social and Political Science State Islamic University Walisongo Semarang has been playing significant roles in building global peace and justice by conducting scientific research and creating a space for academic dialogue and discussion This goal is in line with our vision to be a Research Faculty based on the unity of sciences for humanity and civilization As part of the efforts to create a space for academic dialogue at a global level we organize an international conference which aims to develop scientific knowledge build institutional capacity and strengthen international networking The conference is also held to support State Islamic University Walisongo Semarang in achieving its vision to be an Islamic world class university The conference raises the issue of democracy and social transformation to capture the social and political dynamics The selection of this topic is based on the idea that technological development is becoming a crucial issue within modern society in which people tend to experience alienation within the rapid social and political transformation Democracy as a political system that ensures transparency citizen participation and human rights protection is now under threat Having the fact that there is a growing tendency of using transactional politics to win political interests such as the use of money and identity in political processes therefore political analysts consider this situation as the regression of democracy Rapid social and cultural transformation as a consequence of advanced technology creates problems in modern society On one hand technology has made the life of people easier However on the other hand the sense of humanity's values and principles is declining This situation can be observed in the decrease in social solidarity and the rise of individualism Modernity that values productivity and economic growth has brought a negative impact on the life of human being and nature The exploitative character of industrialization has created an ecological crisis Advanced information technology has loosened social cohesivity and the rise of instrumental rationality has removed local genius or local wisdom from the life of society Since the ultimate goal of humanity is respecting the dignity of human beings hence

bringing back humanity to the center of the development program is crucial especially in the current social and political dynamics In the political context humanity means respecting the basic rights of the citizen and putting them as a subject of political development and not perceiving citizens as only an instrument to win political power Based on the above background this conference is organized The overall goal of the conference is to mainstream humanity in the current social and political change The conference is also expected to be an arena for scholars and experts in social and political science as well as practitioners and policymakers to meet and exchange ideas and perspectives for a better future of our society
