## **End Of Life Communication In The Icu A Global Perspective:**

**End-of-Life Communication in the ICU** David W. Crippen, 2007-11-27 Talking to patients and their families about end of life issues can be difficult and stressful This book looks at ways different cultures view death and then further explores how health care providers around the world communicate about such sensitive issues as withholding or withdrawing life support and discussing options when the outcome is uncertain By offering a better understanding of cultural differences in attitudes about death and methods of communications about end of life issues the coverage in this important book helps prepare healthcare practitioners to be better communicators both within and outside of their own cultures *ICU Resource*

*Allocation in the New Millennium* David Crippen, 2012-09-14 Intensive care medicine is one of the fastest growing services provided by hospitals and perhaps one of the most expensive Yet in response to the global financial crisis of the last few years healthcare funding is slowing or decreasing throughout the world How we manage health care resources in the intensive care unit ICU now and in a future that promises only greater cost constraints is the subject of this book the third in an informal series of volumes providing a global perspective on difficult issues arising in the ICU Taking 12 developed countries as their focus leading experts provide a country by country analysis of current ICU resource allocation A second group of experts use the chapters as a departure point to analyze current ICU resource allocation at the level of the global medical village The process is repeated but with an eye toward the future first country by country then at the global level that takes into account initiatives and reforms now underway A fictional healthcare plan the Fair Equitable Healthcare Plan is put forth to address weaknesses in existing approaches and healthcare experts and ethicists are invited to respond to its often provocative provisions Itself structured as a dialogue the book is an excellent way to start or to continue serious discussion about the allocation of ICU healthcare resources now and in the years ahead **Palliative Care Conversations**

David Gramling, Robert Gramling, 2019-01-14 This book will be the first of its kind to offer intensive conversation analysis on patient clinician interactions in the context of palliative medicine The book focuses on a series of individual case studies of conversations that revolve in each case around one key critical term that is often evoked or understood differently by clinicians and patients *International Opportunities in the Arts* Mary Sherman, 2019-09-03 This book is a compilation of papers derived from talks presented at TransCultural Exchange s 2018 International Conference on Opportunities in the Arts The aim of these talks was to inspire artists to think across disciplines and cultures and to suggest other career models beyond the typical studio to gallery museum model Much of this content is unique in that it not only addresses the practical needs of artists but even more importantly it does so in the context of today s global reality As artists have noted on post Conference surveys this information is the missing link in the art world the bridge between academic and real world practice between a local and international career in the arts By making this information available long after the Conference s end and to those who could not directly participate in the Conference many more artists will have access to where to find jobs

residency programs and funding for their work information on how to put together successful residency applications how to market their work and other professional development programming In addition they and interested members of the public will have access to the Conference talks on what leading artists are doing across disciplines with new technologies and in the public sphere Journal of the American Medical Association ,2008-10 **End of Life Care in the ICU** Graeme

Rocker,2010-01-28 This book highlights real clinical issues which need to be addressed if quality palliative care within ICUs is to be consistently delivered It is presented in an easily accessible bullet pointed style and is illustrated with case histories from real life patients and drug tables The Oxford Textbook of Palliative Social Work Terry Alttilio, Shirley Otis-Green, John

**Dead Labor** James Tyner, 2019-03-12 A groundbreaking consideration of death from capitalism from the seventeenth to the twenty first century From a 2013 Texas fertilizer plant explosion that killed fifteen people and injured 252 to a 2017 chemical disaster in the wake of Hurricane Harvey we are confronted all too often with industrial accidents that reflect the underlying attitude of corporations toward the lives of laborers and others who live and work in their companies shadows *Dead Labor* takes seriously the myriad ways in which bodies are commodified and profits derived from premature death In doing so it provides a unique perspective on our understanding how life and death drive the twenty first century global economy James Tyner tracks a history from the 1600s through which premature death and mortality became something calculable predictable manageable and even profitable Drawing on a range of examples including the criminalization of migrant labor medical tourism life insurance and health care he explores how today we can no longer presume that all bodies undergo the same processes of life death fertility and mortality He goes on to develop the concept of shared mortality among vulnerable populations and examines forms of capital exploitation that have emerged around death and the reproduction of labor Positioned at the intersection of two fields the political economy of labor and the philosophy of mortality *Dead Labor* builds on Marx s notion that death and truncated life is a constant factor in the processes of labor Considering premature death also as a biopolitical and bioeconomic concept Tyner shows how racialized and gendered bodies are exposed to it in unbalanced ways within capitalism and how bodies are then commodified made surplus and redundant and even disassembled in order to accumulate capital

*Ethics in Intensive Care Medicine* Andrej Michalsen, Nicholas Sadovnikoff, Jozef Kesecioglu, 2023-07-19 In this book part of the European Society of Intensive Care Medicine ESICM textbook series experts

in the field of clinical ethics describe basic principles of clinical ethics and ethical reasoning the fundamental pillars of intensive care medicine as well as the decision making processes necessary to arrive at appropriate decisions for each individual patient Specifically the complex decision making process with regard to limiting life sustaining therapies and integrating palliative care into intensive care are expounded Furthermore the still controversial topics of ethical climate proportionate care and prioritization are elaborated upon The so called soft skills of inter professional communication and co operation are given the attention they deserve in order to overcome the gap between technological progress and interpersonal standstill Finally widely accepted ethical values and principles were challenged by the Covid 19 pandemic forcing clinicians to elaborate recommendations regarding the prioritization of scarce resources The book will be an invaluable tool for clinicians to understand ethical principles and reasoning to contend ethical challenges in intensive care medicine across the boundaries of disciplines and professions in order to provide an appropriate individual plan of treatment for their patients

**The ESC Textbook of Intensive and Acute Cardiovascular Care** Marco Tubaro,Pascal Vranckx,Susanna Price,Christiaan Vrints,Eric Bonnefoy,2021-03-08 The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association ACVC of the ESC Cardiovascular diseases CVDs are a major cause of premature death worldwide and a cause of loss of disability adjusted life years For most types of CVD early diagnosis and intervention are independent drivers of patient outcome Clinicians must be properly trained and centres appropriately equipped in order to deal with these critically ill cardiac patients This new updated edition of the textbook continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care and addresses all those involved in intensive and acute cardiac care not only cardiologists but also critical care specialists emergency physicians and healthcare professionals The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment as well as organisational issues cooperation among professionals and interaction with other specialities in medicine SECTION 1 focusses on the definition structure organisation and function of ICCU s ethical issues and quality of care SECTION 2 addresses the pre hospital and immediate in hospital ED emergency cardiac care SECTIONS 3 5 discuss patient monitoring diagnosis and specific procedures Acute coronary syndromes ACS acute decompensated heart failure ADHF and serious arrhythmias form SECTIONS 6 8 The main other cardiovascular acute conditions are grouped in SECTION 9 Finally SECTION 10 is dedicated to the many concomitant acute non cardiovascular conditions that contribute to the patients case mix in ICCU This edition includes new chapters such as low cardiac output states and cardiogenic shock and pacemaker and ICDs troubleshooting and chapters have been extensively revised Purchasers of the print edition will also receive an access code to access the online version of the textbook which includes additional figures tables and videos to better to better illustrate diagnostic and therapeutic techniques and procedures in IACC The third edition of the ESC Textbook of Intensive and Acute Cardiovascular Care will establish a common basis of knowledge and a uniform and

improved quality of care across the field      *Dehumanization in Intensive Care Medicine* Iacopo Cappellini, Guglielmo Consales, Chiara Nuti, 2025-07-24 A key part of healthcare in addition to technical knowledge is emotional and spiritual support for the person not just treating the disease This holistic approach of to care rather than just to cure has become increasingly important However in emergency situations or when patients can't interact due to their condition or invasive medical devices the lack of interaction can lead to dehumanization of care particularly in critical areas In recent decades patient care in intensive care units ICUs has achieved new clinical milestones and placed greater emphasis on the quality of life during and after hospitalization including family involvement in the care process This shift is reflected in nursing care which can become sterile monotonous and automatic when dealing with non interactive patients Critical care areas are characterized not only by the critical and unstable clinical conditions of patients and the complexity of the medical nursing approach but also by the delicate and professional management of interpersonal relationships with patients and their actively involved families This important new book written by practicing critical care medical professionals looks at the issues around dehumanization of patients defined as denying individuals their humanity and treating them as objects for medical procedures rather than as real people In contrast humanizing the care process and practice requires intellectual and emotional flexibility listening skills and the ability to adapt and modify care and communication styles with patients and their families in addition to professional competence Recommended for those studying teaching and researching in medical and nursing schools healthcare professionals especially nurses and doctors working in critical care and healthcare administrators

*Ethics and Medical Technology* Matthew C. Altman, David Schwan, 2025-08-24 This book provides a comprehensive survey of ethical issues raised by advanced medical technologies The field's leading authorities explore how artificial intelligence telehealth robot caregivers genetic therapies and enhancement stem cell research neurotechnology electronic health records data collection and digital nudging are reshaping the landscape of medical practice Organized around core ethical themes the chapters consider how new and emerging technologies transform personal identity the provider patient relationship privacy and autonomy and social equity Contributors clarify the complex values involved in medical innovation and practice and explore what is at stake in the current ethical debates around these issues While offering a valuable introduction for advanced students professional philosophers medical ethicists and policymakers this book also advances the scholarly discussion by presenting original theses and arguments making it essential reading for specialists
