aspects particularly the mutual dependencies between technologies usages and domain competencies calls for a differentiation of roles beyond the classical user designer dichotomy End user development EUD addresses these issues by offering lightweight use time support which allows users to configure adapt and evolve their software by themselves EUD is understood as a set of methods techniques and tools that allow users of software systems who are acting as non professional software developers to 1 create modify or extend a software artifact While programming activities by non professional actors are an essential focus EUD also investigates related activities such as collective understanding and sense making of use problems and solutions the interaction among end users with regard to the introduction and diffusion of new configurations or delegation patterns that may also partly involve professional designers **End-User Development** Simone Barbosa,Panos Markopoulos,Fabio Paternò,Simone Stumpf,Stefano Valtolina,2017-06-01 This book constitutes the refereed proceedings of the 6th International Symposium on End User Development IS EUD 2017 held in Eindhoven The Netherlands in June 2017 The 10 full papers and 3 short papers presented were carefully reviewed and selected from 26 submissions According to the theme of the conference that was business this is personal the papers address the personal involvement and engagement of end users the application of end user programming beyond the professional environment looking also at discretionary use of technologies They also deal with topics covered by the broader area of end user development such as domain specific tools spreadsheets and end user aspects **End-User Development** Carmen Santoro,Albrecht Schmidt,Maristella Matera,Andrea Bellucci,2025-07-14 This book constitutes the refereed proceedings of the 10th International Symposium on End User Development IS EUD 2025 held in Munich Germany during June 16 18 2025 The 13 full papers and 8 short papers included in this book were carefully reviewed and selected from 25 submissions These papers have been organized under the following topical sections Automation Sustainability and Smart Environments Democratizing AI and Programming AI for End User Empowerment Personalization andWellbeing and EUD Principles Methodologies and Participatory Cultures End-User Development Lucio Davide Spano,Albrecht Schmidt,Carmen Santoro,Simone Stumpf,2023-05-29 This book constitutes the refereed proceedings of the 9th International Symposium on End User Development IS EUD 2023 held in Cagliari Italy during June 6 8 2023 The 17 full papers and 2 keynote extended abstracts included in this book were carefully reviewed and selected from 26 submissions They were organized in topical sections as follows Artificial Intelligence for End Users Internet of Things for End Users Privacy Security and Society Supporting End User Development **End User Development** Henry Lieberman,Fabio Paternò,Volker Wulf,2009-09-03 This book makes important aspects of the international discussion on End User Development EUD available to a broader audience It offers a unique set of contributions from research institutes worldwide addressing relevant issues and proposing original solutions This broad look at the emerging paradigm of End User Development will inspire every reader to appreciate its potential for the future Indeed the editors hope that readers end users will themselves become developers **New Perspectives in**

End-User Development Fabio Paternò,Volker Wulf,2017-08-09 This book provides an in depth insight into the emerging paradigm of End User Development EUD discussing the diversity and potential for creating effective environments for end users Containing a unique set of contributions from a number of international researchers and institutes many relevant issues are discussed and solutions proposed making important aspects of end user development research available to a broader audience Most people are familiar with the basic functionality and interfaces of computers However developing new or modified applications that can effectively support users goals still requires considerable programming expertise that cannot be expected of everyone One of the fundamental challenges that lie ahead is the development of environments that enable users with little or no programming experience to develop and modify their own applications The ultimate goal is to empower people to flexibly employ and personalise advanced inform ation and communication technologies
