Can Science End War Everett Dolman, 2015-10-19 Free roaming killer drones stalk the battlespace looking for organic targets Human combatants are programmed to feel no pain Highpower microwave beams detonate munitions jam communications and cook internal organs Is this vision of future war possible or even inevitable In this timely new book Everett Carl Dolman examines the relationship between science and war Historically science has played an important role in ending wars think of the part played by tanks in breaching trench warfare in the First World War or atom bombs in hastening the Japanese surrender in the Second World War but to date this has only increased the danger and destructiveness of future conflicts Could science ever create the conditions of a permanent peace either by making wars impossible to win or so horrific that no one would ever fight Ultimately Dolman argues that science cannot on its own end war without also ending what it means to be human
