Jagannath P. Panda, 2020-03-03 This book assesses the strategic linkages that the Korean Peninsula shares with the Indo-Pacific and provides a succinct picture of issues which will shape the trajectory of the Korean Peninsula in the future. This book analyses how critical actors such as the United States, China, Russia and Japan are caught in a tightly balanced power struggle affecting the Korean Peninsula. It shows how these countries are exerting control over the Korean Peninsula while also holding on to their status as critical actors in the broader Indo-Pacific. The prospects of peace, stability and unity in the Korean Peninsula and the impact of this on Indo-Pacific power politics are explored as well as the contending and competing interests in the region. Chapters present country-specific positions and approaches as case studies and review the impact of power politics on stakeholders' relationships in the Indo-Pacific. The book also argues that the Korean Peninsula and the issue of denuclearization is of primary importance to any direction an Indo-Pacific Partnership may take. Bringing together scholars, journalists and ex-diplomats, this book will be of interest to academics working in the field of international relations, foreign policy, security studies and Asian studies as well as audiences interested.

Constantinos Yiallourides, 2019-05-20 The settlement of the maritime boundary disputes between China and Japan in the East China Sea and between Greece and Turkey in the Aegean Sea is politically deadlocked. While diplomatic settlement efforts have been ongoing for the past several decades, neither side in each case appears prepared to back down from its respective maritime and territorial claims. Several incidents at sea have occurred, prompting diplomatic protests, military standoffs, even exchange of fire. The existing status quo is inherently unstable and does not favour either side to the extent that it holds hostage the multiple benefits that could otherwise be generated from the exploitation of the seabed energy and mineral resources in the

disputed waters creating an urgent need for a meaningful discussion on finding a practical way forward This monograph undertakes a comprehensive analysis of these disputes based on the rules and principles of international law critically evaluating possible institutional designs of inter State cooperation over seabed activities in disputed maritime areas and makes recommendations for the prospect of realising joint development regimes in the East China Sea and the Aegean to coordinate the exploration for and exploitation of resources without having resorted previously to boundary delimitation settlement Subject Guide to Books in Print ,1971 **Encyclopedia of the United Nations and International**

Agreements: T to Z Edmund Jan Osmańczyk,2003 This thoroughly revised and updated edition is the most comprehensive and detailed reference ever published on United Nations The book demystifies the complex workings of the world's most important and influential international body Energy Security in Asia and Eurasia Mike M. Mochizuki,Deepa M.

Ollapally,2016-12-01 Many states appear to have strong sentiment on energy security and energy transit vulnerability Some analysts see the rapidly increasing demand for energy and competition for energy resources leading to nationalistic energy policies Others argue that global trends with efficient energy markets and growing options on renewables suggest more relaxed energy outlooks This book focuses on Asia where global demand for energy is now concentrated in the aspiring and rising powers of the region China India Japan and South Korea and also recognises the importance of Russia as a growing energy supplier Contributions by experts in the field provide detailed and parallel case studies Shedding light on the ongoing debate in the literature regarding energy outlooks of major Asian states they analyse whether energy policies are expected to evolve along market oriented cooperative lines or more competitive and even destructive mercantile nationalist lines The book argues that states are not unitary actors even in the key energy security arena and there are competing and contrasting viewpoints in Asian states on energy security It suggests that domestic debates structure thinking on energy security making energy policy more contingent than assumed by purely market or geopolitical logics Providing a strong contribution to comparative energy security studies the book fills an important gap in the literature on energy and national security and offers a basis for conducting further inter state interactive analysis It will be of interest to researchers on Asian Studies energy politics and international relations *The Environmental Dimension of Asian Security* In-t'aek Hyŏn,Miranda Alice Schreurs,2007 Northeast Asia is a region with highly disparate levels of industrialization and political systems It also contains some very troubling security flashpoints the Taiwan Strait the Korean Peninsula and the East China Sea China's rapacious quest for energy and rapid industrial expansion have led to intense international competition with Japan and the United States and internal instability as well North Korea poses two distinct environmental security threats famine refugees and the regime's use of nuclear blackmail for subsidized energy Yet there is very little regional cooperation despite the need to manage disputes over energy natural resources and pervasive pollution The Environmental Dimension of Asian Security examines these issues through a regional environmental security complex that explores the potential for greater
