Energy Technology Innovation Learning From Historical Successes And Failures:

Energy Technology Innovation Arnulf Grubler, Charlie Wilson, 2014 An edited volume on factors determining success or failure of energy technology innovation for researchers and policy makers *Energy Technology Innovation* Arnulf Grubler, Charlie Wilson, 2014

Low Carbon Energy Transitions Kathleen M. Araújo, 2017 Examines four long term cases of nations shifting to low carbon energy sources from dependence on fossil fuels in order to discuss better ways for a nation to make such a transition

The Big Fix Hal Harvey, Justin Gillis, 2022-09-20 A smart honest and down to earth Elizabeth Kolbert citizen s guide to the seven urgent changes that will really make a difference for our climate If you think the only thing you can do to combat climate change is to install a smart thermostat or cook plant based meat you re thinking too small In *The Big Fix* energy policy advisor Hal Harvey and longtime New York Times reporter Justin Gillis offer a new hopeful way to engage with one of the greatest problems of our age Writing in a lively accessible style the pair illuminate how the really big decisions that affect our climate get made whether by the most obscure public utilities commissions or in the lofty halls of state capitols and reveal how each of us can influence these decisions to deliver change The pair focus on the seven areas of our political economy where ambitious but practical changes will have the greatest effect from what kind of power plants to build to how much insulation new houses require to how efficient cars must be before they re allowed on the road Equal parts pragmatic and inspiring and full of illustrative stories and compelling evidence Al Gore *The Big Fix* provides an action plan for anyone serious about holding our governments accountable and saving our threatened planet

Burning Up Simon Pirani, 2018-08-20 Coal gas and oil have been capitalism s main fuels since the industrial revolution And yet of all the fossil fuels ever consumed more than half were burned in the last 50 years Most alarming of all fossil fuel consumption has grown fastest in the last three decades since scientists confirmed that it is the main cause of potentially devastating global warming In *Burning Up* Simon Pirani recounts the history of fossil fuels relentless rise since the mid twentieth century Dispelling explanations foregrounding Western consumerism and arguments that population growth is the main problem Pirani shows how fossil fuels are consumed through technological social and economic systems and that these systems must change This is a major contribution to understanding the greatest crisis of our time

Handbook Of Energy Finance: Theories, Practices And Simulations Stephane Goutte, Duc Khuong Nguyen, 2020-01-30 Modeling the dynamics of energy markets has become a challenging task The intensification of their financialization since 2004 had made them more complex but also more integrated with other tradable asset classes More importantly their large and frequent fluctuations in terms of both prices and volatility particularly in the aftermath of the global financial crisis 2008 2009 posit difficulties for modeling and forecasting energy price behavior and are primary sources of concerns for macroeconomic stability and general economic performance This handbook aims to advance the debate on the theories and practices of quantitative energy finance while shedding light on innovative results and technical methods applied to energy markets Its primary focus is on the recent

development and applications of mathematical and quantitative approaches for a better understanding of the stochastic processes that drive energy market movements The handbook is designed for not only graduate students and researchers but also practitioners and policymakers *Handbook of Energy Economics and Policy* Alessandro Rubino, Alessandro Sapio, Massimo La Scala, 2021-05-10 Handbook of Energy Economics and Policy Fundamentals and Applications for Engineers and Energy Planners presents energy engineers and managers with analytical skills and concepts that enable them to apply simple economic logic to understand the interrelations between energy technologies economics regulation and governance of the industry Sections cover the origins types and measurement of energy sources transportation networks and regulatory and policy issues on electricity and gas at a global level new economic and policy issues including innovation processes in the energy industry and economic and policy implications Final sections cover state of the art methods for modeling and predicting the dynamics of energy systems Its unique approach and learning path makes this book an ideal resource for energy engineering practitioners and researchers working to design develop plan or deploy energy systems Energy planners and policymakers will also find this to be a solid foundation on which to base decisions Presents key concepts and their interrelation with energy technologies and systems in a clear way for ready application during planning and deployment of energy technologies and systems Includes global case studies covering a wide array of energy sources and regulatory models Explores methodologies for modeling and forecasting the impacts of energy technologies and systems as well as their costs and possible business models *Routledge Handbook of Energy Transitions* Kathleen Araújo, 2022-12-30 The Routledge Handbook of Energy Transitions draws upon a unique and multidisciplinary network of experts from around the world to explore the expanding field of energy transitions This Handbook recognizes that considerable changes are underway or are being developed for the modes in which energy is sourced delivered and utilized Employing a sociotechnical approach that accounts for economics and engineering as well as more cross cutting factors including innovation policy and planning and management the volume considers contemporary ideas and practices that characterize the field The book explores pressing issues including choices about infrastructure the role of food systems and materials sustainability and energy democracy Disruption is a core theme throughout with the authors examining topics such as digitalization extreme weather and COVID 19 along with regional similarities and differences Overall the Routledge Handbook of Energy Transitions advances the field of energy transitions by connecting ideas taking stock of empirical insights and challenging how we think about the theory and practice of energy systems change This innovative volume functions as an authoritative roadmap with both regional and global relevance It will be an essential resource for students policymakers researchers and practitioners researching and working in the fields of energy transitions planning environmental management and policy sustainable business engineering science and technology studies political science geography design anthropology and environmental justice With the exception of Chapter 26 no part of this book may be reprinted or reproduced or utilised in any form or by any electronic

mechanical or other means now known or hereafter invented including photocopying and recording or in any information storage or retrieval system without permission in writing from the publishers Chapter 26 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Global Warming of 1.5°C Intergovernmental Panel on Climate Change (IPCC), 2022-06-09 The Intergovernmental Panel on Climate Change IPCC is the leading international body for assessing the science related to climate change It provides regular assessments of the scientific basis of climate change its impacts and future risks and options for adaptation and mitigation This IPCC Special Report is a comprehensive assessment of our understanding of global warming of 1.5°C future climate change potential impacts and associated risks emission pathways and system transitions consistent with 1.5°C global warming and strengthening the global response to climate change in the context of sustainable development and efforts to eradicate poverty It serves policymakers decision makers stakeholders and all interested parties with unbiased up to date policy relevant information This title is also available as Open Access on Cambridge Core

The Palgrave Handbook of the International Political Economy of Energy Thijs Van de Graaf, Benjamin K. Sovacool, Arunabha Ghosh, Florian Kern, Michael T. Klare, 2016-08-05 This Handbook is the first volume to analyse the International Political Economy the who gets what when and how of global energy Divided into five sections it features 28 contributions that deal with energy institutions trade transitions conflict and justice The chapters span a wide range of energy technologies and markets including oil and gas biofuels carbon capture and storage nuclear and electricity and it cuts across the domestic international divide Long standing issues in the IPE of energy such as the role of OPEC and the resource curse are combined with emerging issues such as fossil fuel subsidies and carbon markets IPE perspectives are interwoven with insights from studies on governance transitions security and political ecology The Handbook serves as a potent reminder that energy systems are as inherently political and economic as they are technical or technological and demonstrates that the field of IPE has much to offer to studies of the changing world of energy

Energy Innovation for the Twenty-First Century Jim Skea, Renée van Diemen, Matthew Hannon, Evangelos Gazis, Aidan Rhodes, 2019 This book addresses the question how effective are countries in promoting the innovation needed to facilitate an energy transition At the heart of the book is a set of empirical case studies covering supply and demand side technologies at different levels of maturity in a variety of countries The case studies are set within an analytical framework encompassing the functions of technological innovation systems and innovation metrics The book concludes with lessons and recommendations for effective policy intervention

Uncertain Futures Jens Beckert, Richard Bronk, 2018-07-11 *Uncertain Futures* considers how economic actors visualize the future and decide how to act in conditions of radical uncertainty It starts from the premise that dynamic capitalist economies are characterized by relentless innovation and novelty and hence exhibit an indeterminacy that cannot be reduced to measurable risk The organizing question then becomes how economic actors form expectations and make

decisions despite the uncertainty they face This edited volume lays the foundations for a new model of economic reasoning by showing how in conditions of uncertainty economic actors combine calculation with imaginaries and narratives to form fictional expectations that coordinate action and provide the confidence to act It draws on groundbreaking research in economic sociology economics anthropology and psychology to present theoretically grounded empirical case studies These demonstrate how grand narratives central bank forward guidance economic forecasts finance models business plans visions of technological futures and new era stories influence behaviour and become instruments of power in markets and societies The market impact of shared calculative devices social narratives and contingent imaginaries underlines the rationale for a new form of narrative economics

Technology and Innovation for Sustainable Development Rob Vos,2015-12-17

Continuation along current development pathways is not sustainable Available technology and production practices and the consumption patterns of modern societies are leading to global warming and ecological destruction Business as usual is not an option There is an urgent need to find a new development paradigm that ensures environmental sustainability while managing to provide now and in the future a decent livelihood for all of humankind In Technology and Innovation for Sustainable Development experts in the area provide a variety of insights about the technical transformation needed for sustainable development It spells out the behavioural and policy changes that would need to accompany the next technological transformation taking into account the complexity of inducing technological change in the energy and agricultural sectors The assessment suggests that this will require major but doable improvements in national innovation systems and major but affordable shifts in investment patterns and related macroeconomic adjustments

Technology and Innovation for Sustainable Development Rob Vos,2015-12-17 This book is available as open access through the Bloomsbury Open Access programme and is available on bloomsburycollections.com Continuation along current development pathways is not sustainable Available technology and production practices and the consumption patterns of modern societies are leading to global warming and ecological destruction Business as usual is not an option There is an urgent need to find a new development paradigm that ensures environmental sustainability while managing to provide now and in the future a decent livelihood for all of humankind In Technology and Innovation for Sustainable Development experts in the area provide a variety of insights about the technical transformation needed for sustainable development It spells out the behavioural and policy changes that would need to accompany the next technological transformation taking into account the complexity of inducing technological change in the energy and agricultural sectors The assessment suggests that this will require major but doable improvements in national innovation systems and major but affordable shifts in investment patterns and related macroeconomic adjustments

The Global Innovation Index 2018 Cornell University,INSEAD,World Intellectual

Property Organization,2018-07-10 The Global Innovation Index 2018 provides detailed metrics about the innovation performance of 126 countries and economies around the world Its 80 indicators explore a broad vision of innovation

including political environment education infrastructure and business sophistication The GII 2018 analyses the energy innovation landscape of the next decade and identifies possible breakthroughs in fields such as energy production storage distribution and consumption It also looks at how breakthrough innovation occurs at the grassroots level and describes how small scale renewable systems are on the rise

Metropolitan Landscapes Antonella Contin, 2021-08-24 This edited volume covers many aspects of the Metropolitan Landscapes Solutions are needed to meet the demand of the citizens of a renewed metropolitan region landscape It opens up discussions about possible toolkits for strategic actions based on understanding the territory from geographical urban architectural economic environmental and public policy perspectives This book intends to promote the Metropolitan dwelling quality ensuring human well being proposing a discussion on the resilient articulation of the interface space among the city s infrastructure agriculture and nature This book results from the Symposium Metropolitan Landscapes that MSLab of the Politecnico di Milano and ETSA Sevilla organized at the IALE 2019 Conference Milan July 2019 to manage radical territory transformation with a strategic vision The widespread growth of urban areas indicates the importance of building resilient sustainable cities capable of minimizing climate change impact production The Symposium aimed to discuss the Urban Metabolism approach considering the combination of Landscapes set in a single Metropolitan Ecosystem Accordingly new design strategies of transformation replacement or maintenance can compose Urban Rural Linkage patterns and a decalage of different landscape contexts Ecological interest in environmental sustainability compatibility and resilience is not tied exclusively to the balance between production and energy consumption Thus it is the integration over time and at several scales of the urban and rural landscapes and their inhabitants that nourish the Metropolitan Bioregion Moreover the Metropolitan Landscape Book s research hypothesis is the need for a Glossary strengthening the basis of understanding Metropolitan Landscape s complexity This book s topic is particularly relevant to Landscape Urbanism Architecture Urban disciplines Scholars Students and Practitioners who want to be connected in a significant way with Metropolitan Discipline s research field

Energy Transition of the Electricity Sectors in the European Union and Japan Maciej M. Sokołowski, 2022-07-08 This book provides a comprehensive overview of the energy policies in the European Union and Japan in terms of electricity markets and climate action including energy efficiency renewable energy sources and the reduction of emissions The book evaluates and compares the regulatory frameworks for achieving energy transitions by answering a number of questions focused on the essence and range of the regulatory models used by leading global economies which herald carbon neutrality by 2050 The book provides a useful framework that systematises Japanese and European energy policies and legislation including electricity related policies plans and programmes Discussing these issues in relation to the European and Japanese 2050 energy transition the author delves into the four pillars of the transition market reform reduction of emissions promotion of renewables and enhancing energy efficiency Each chapter demonstrates the timing of the actions undertaken both in Europe and Japan analyses the character of the conducted actions evaluates the

stakeholders of the realised agenda and presents the technologies involved in the energy transition

Classic Papers in Natural Resource Economics Revisited Chennat Gopalakrishnan, 2018-02-02 Classic Papers in Natural Resource Economics Revisited is the first attempt to bring together a selection of classic papers in natural resource economics alongside reflections by highly regarded professionals about how these papers have impacted the field The seven papers included in this volume are grouped into five sections representing the five core areas in natural resource economics the intertemporal problem externalities and market failure property rights institutions and public choice the economics of exhaustible resources and the economics of renewable resources The seven papers are written by distinguished economists five of them Nobelists The papers originally published between 1960 and 2000 addressed key issues in resource production pricing consumption planning management and policy The original insights fresh perspectives and bold vision embodied in these papers had a profound influence on the readership and they became classics in the field This is the first attempt to publish original commentaries from a diverse group of scholars to identify probe and analyse the ways in which these papers have impacted and shaped the discourse in natural resource economics Although directed primarily at an academic audience this book should also be of great appeal to researchers policy analysts and natural resource professionals in general This book was published as a series of symposia in the Journal of Natural Resources Policy Research

New Approaches to Economic Challenges Systemic Thinking for Policy Making The Potential of Systems Analysis for Addressing Global Policy Challenges in the 21st Century OECD, International Institute for Applied Systems Analysis, 2020-02-27 In Systemic Thinking for Policy Making world experts from the OECD and International Institute for Applied Systems Analysis IIASA pool their expertise and experience to propose new approaches to analysing the interconnected trends and issues shaping today's and tomorrow's world

The Technological and Economic Future of Nuclear Power Reinhard Haas, Lutz Mez, Amela Ajanovic, 2019-04-26 This open access book discusses the eroding economics of nuclear power for electricity generation as well as technical legal and political acceptance issues The use of nuclear power for electricity generation is still a heavily disputed issue Aside from technical risks safety issues and the unsolved problem of nuclear waste disposal the economic performance is currently a major barrier In recent years the costs have skyrocketed especially in the European countries and North America At the same time the costs of alternatives such as photovoltaics and wind power have significantly decreased
