Diane Lapp, Barbara Moss, Maria Grant, Kelly Johnson, 2015-01-29 The Common Core State Standards have put close reading in the spotlight as never before While elementary school teachers are certainly willing to teach students to closely read both literary and informational text many are wondering what exactly this involves Is there a process to follow How is close reading different from guided reading or other common literacy practices How do you prepare students to have their ability to analyze complex texts measured by Common Core assessments Is it even possible for students in grades K 5 to read to learn when

they're only just learning to read. Literacy experts Diane Lapp, Barbara Moss, Maria Grant, and Kelly Johnson answer these questions and more as they explain how to teach young learners to be close readers and how to make close reading a habit of practice in the elementary classroom. Informed by the authors' extensive field experience and enriched by dozens of real-life scenarios and downloadable tools and templates, this book explores text complexity and how to determine if a particular text is a right fit for your learning purposes and your students. Unpacking Fractions Monica Neagoy, 2017-03-10

For years, the teaching and learning of fractions has been associated with rote memorization. But this mechanical approach to instruction, which strips students of an ability to reason or make sense of math, has resulted in a failure of understanding. Author Monica Neagoy, drawing on decades of research, studies, evidence from teacher practice, and 25 years of experience working around the world with teachers, students, and parents, addresses seven big ideas in the teaching and learning of fractions in grades 2-6. Each idea is supported by a vignette from a real classroom, common misconceptions, a thorough unpacking of productive mathematical thinking, and several multi-step and thought-provoking problems for teachers to explore. She offers three fundamental reasons why it's imperative for us to take a closer look at how we teach fractions: Fractions play a key role in students' feelings about mathematics. Fractions are fundamental to school math and daily life. Fractions are foundational to success in algebra. While a solid grounding in algebra is necessary for a STEM career, the worthy goal of algebra for all will not be possible until fractions for all is a reality. Unpacking Fractions provides teachers with concrete strategies for achieving that reality in short, helping all students gain the knowledge they need to feel at ease with fractions.
