Advanced System Modelling and Simulation with Block Diagram Languages Nicholas M. Karayanakias, 1995-06-09 Advanced System Modelling and Simulation with Block Diagram Languages explores and describes the use of block languages in dynamic modelling and simulation The application of block diagrams to dynamic modelling is reviewed not only in terms of known components and systems but also in terms of the development of new systems Methods by which block diagrams clarify the dynamic essence of systems and their components are emphasized throughout the book and sufficient introductory material is included to elucidate the book's advanced material Widely used continuous dynamic system simulation CDSS languages are analyzed and their technical features are discussed This self contained resource includes a review section on block diagram algebra and applied transfer functions both of which are important mathematical subjects relevant to the understanding of continuous dynamic system simulation

MATLAB Simulations for Radar Systems Design Bassem R. Mahafza, Atef Elsherbeni, 2003-12-17

Simulation is integral to the successful design of modern radar systems and there is arguably no better software for this purpose than MATLAB But software and the ability to use it does not guarantee success One must also Understand radar operations and design philosophy Know how to select the radar parameters to meet the design requirements Be able to perform detailed trade off analysis in the context of radar sizing modes of operation frequency selection waveforms and signal processing Develop loss and error budgets associated with the design MATLAB Simulations for Radar Systems Design teaches all of this and provides the M files and hands on simulation experience needed to design and analyze radar systems Part I forms a comprehensive description of radar systems their analysis and the design process The authors unique approach involves a design case study introduced in Chapter 1 and followed throughout the text As the treatment progresses the complexity increases and the case study requirements are adjusted accordingly Part II presents a series of chapters some authored by other experts in the field on specialized radar topics important to a full understanding of radar systems design and analysis A comprehensive set of MATLAB programs and functions support both parts of the book and are available for download from the CRC Press Web site

Radar Systems Analysis and Design Using MATLAB

Bassem R. Mahafza, 2022-03-29 The first edition of this ground breaking and widely used book introduced a comprehensive textbook on radar systems analysis and design providing hands on experience facilitated by its companion MATLAB software The book very quickly turned into a bestseller Based on feedback provided by several users and drawing from the author's own teaching experience the 4th edition adopts a new approach The presentation in this edition takes the reader on a scientific journey whose major landmarks comprise the different radar sub systems and components Along the way the

different relevant radar subsystems are analyzed and discussed in great level of detail Understanding the radar signal types and their associated radar signal processing techniques are key to understating how radar systems function Each chapter provides the necessary mathematical and analytical coverage required for a sound understanding of radar theory Additionally dedicated MATLAB functions programs enhance the understanding of the theory and establish a means to perform radar system analysis and design trades The software provides users with numerous varieties of graphical outputs Additionally a complete set of MATLAB code that generates all plot and graphs found within the pages of this textbook are also available All companion MATLAB code can be downloaded from the book s web page The 4th Edition Takes advantage of the new features offered by MATLAB 2021 release Brings the text to a current state of the art Incorporates much of the feedback received from users using this book as a text and from practicing engineers accordingly several chapters have been rewritten Presents unique topics not found in other books Maintains a comprehensive and exhaustive presentation Restructures the presentation to be more convenient for course use Provides a post course reference for engineering students as they enter the field Offers a companion solutions manual for instructors The 4th edition will serve as a valuable tool to students and radar engineers by helping them better analyze and understand the many topics of radar systems This book is written primarily as a graduate level textbook although parts of it can be used as a senior level course A companion solutions manual has been developed for use by instructors

Radar Systems Analysis and Design Using MATLAB Second Edition

Bassem R. Mahafza,2005-03-09 An introduction to radar systems should ideally be self contained and hands on a combination lacking in most radar texts The first edition of Radar Systems Analysis and Design Using MATLAB provided such an approach and the second edition continues in the same vein This edition has been updated expanded and reorganized to include advances in the field and to be more logical in sequence Ideal for anyone encountering the topic for the first time or for professionals in need of on the job reference this book features an abundance of MATLAB programs and code Radar Systems Analysis and Design Using MATLAB Second Edition presents the fundamentals and principles of radar along with enough rigorous mathematical derivations to ensure that you gain a deep understanding The author has extensively revised chapters on radar cross section and polarization matched filter and radar ambiguity function and radar wave propagation He also added information on topics such as PRN codes multipath and refraction clutter and MTI processing and high range resolution With all MATLAB functions updated to reflect version 7 0 and an expanded set of self test problems you will find this up to date text to be the most complete treatment of radar available providing the hands on tools that will enrich your learning
