Death on the Small Screen Jonathan F. Bassett,2022-10-17 Mortality remains a taboo topic in much of Western society but death and violence continue to be staples of popular television We can better understand the appeal of violence by investigating psychological theories surrounding anxiety about death and the defenses we use to manage that anxiety This book examines five recent television series Game of Thrones The Punisher Jessica Jones Sons of Anarchy and Hannibal and shows how fictional characters motivations teach viewers about both the constructive and destructive ways we try to deal with our own mortality Instead of dismissing violent television as harmless entertainment or completely condemning it as a dangerous trigger of hostile behavior this book shows its effects on viewers in a more nuanced manner It provides a new perspective on the enjoyment of violent television enhancing fans appreciation and sparking ongoing discussions about their value to both the individual and society

portray individuals along the lines of gender racial and ethnic stereotypes offer us villains that are one dimensional characters driven by evil and show us politicians who are almost always corrupt self serving and or incompetent They offer up models for how to deal with oppressive authority and they typically portray worlds that are just where those who do the right thing come out on top Entire entertainment genres with their shared story telling conventions and common plot devices provide lessons and perspectives that are relevant to how the public sees political issues The stories that entertain us show us all these things and more but to what effect Does the pervasive politically relevant content that can be found not just in political entertainment shows like House of Cards but also in entertainment like Game of Thrones that on the surface has nothing to do with modern politics affect people s perspectives on the political world That is the central question of this volume This book discusses the type of content in entertainment media that has the best chance of influencing political beliefs draws from the work of scholars in a number of disciplines in order to forge a theory explaining how and when entertainment media will affect political perspectives and presents a series of empirical studies using experiments and surveys that demonstrate the effect of politically relevant content in shows such as Game of Thrones House of Cards The Daily Show and The Colbert Report in genres such science fiction and through pervasive villain and leader character types

Becoming Bestsellers: John Grisham and Danielle Steel (Sample from Chapter 2 of THE BESTSELLER CODE) Jodie Archer, Matthew L. Jockers, 2016-08-16 This sneak peek teaser featuring literary giants John Grisham and Danielle Steele from Chapter 2 of *The Bestseller Code* a groundbreaking book about what a computer algorithm can teach us about blockbuster books stories and reading reveals the importance of topic and theme in bestselling fiction according to percentages assigned by what the authors refer to as the bestseller ometer Although 55 000 novels are published every year only about 200 hit the lists a commercial success rate of less than half a percent When the computer was asked to blindly select the most likely bestsellers out of 5 000 books published over the past thirty years based only on theme it discovered

two possible candidates *The Accident* by Danielle Steel and *The Associate* by John Grisham. The computer recognized quantifiable patterns in their seemingly opposite but undeniably successful writing careers with legal thrillers and romance. In Chapter 2, Archer and Jockers analyze this data and divulge the most and least likely to best sell topics and themes in fiction with a human discussion of the why behind these results. *The Bestseller Code* is a big idea book about the relationship between creativity and technology. At heart it is a celebration of books for readers and writers, a compelling investigation into how successful writing works.

The Bestseller Code Jodie Archer, Matthew L. Jockers, 2016-09-20. When a story captures the imagination of millions, that's magic. Can you qualify magic? Archer and Jockers just may have done so. Sylvia Day, New York Times bestselling author. Ask most people about massive success in the world of fiction and you'll typically hear that it's a game of hazy crystal balls. The sales figures of E. L. James or Dan Brown seem to be freakish random occurrences in an unknowable market. But what if there were an algorithm that could reveal a secret DNA of bestsellers regardless of their genre? What if it knew just from analyzing the words alone, not just why genre writers like John Grisham and Danielle Steel belong on the lists but also that authors such as Junot Diaz, Jodi Picoult, and Donna Tartt had telltale signs of success all over their pages? Thanks to Jodie Archer and Matthew Jockers, the algorithm exists: the code has been cracked, and the results bring fresh new insights into how fiction works and why we read. *The Bestseller Code* offers a new theory for why *Fifty Shades of Grey* sold so well. It sheds light on the current craze for dark heroines. It reveals which themes tend to sell best. And all with fascinating supporting data taken from a five-year study of twenty thousand novels. Then there is the hunt for the one, the paradigmatic example of bestselling writing according to a computer's analysis of thousands of points of data. The result is surprising, a bit ironic, and delightfully unorthodox. This book explains groundbreaking text mining research in accessible terms and offers a new perspective on the New York Times bestseller list. It's a big idea book about the relationship between creativity and technology that will be provocative to anyone interested in how analytics have already transformed the worlds of finance, medicine, and sports. But at heart it is a celebration of books for readers and writers, a compelling investigation into how successful writing works, and a fresh take on our intellectual and emotional response to stories.

Cognition, Emotion, and Aesthetics in Contemporary Serial Television Ted Nannicelli, Héctor J. Pérez, 2021-11-25. The chapters explore a number of questions, including: How do the particularities of form and style in contemporary serial television engage us cognitively, emotionally, and aesthetically? How do they foster cognitive and emotional effects such as feeling, suspense, anticipation, surprise, satisfaction, and disappointment? Why and how do we value some serials while disliking others? What is it about the particularities of serial television form and style in conjunction with our common cognitive, emotional, and aesthetic capacities that accounts for serial television's cognitive, socio-political, and aesthetic value and its current ubiquity in popular culture?
