provides 15 problem solving group activities *Mathematics for Dyslexics* Steve Chinn, Richard Edmund Ashcroft, 2006-11-02 *Mathematics for Dyslexics Including Dyscalculia* 3rd Edition discusses the factors that contribute to the potential difficulties many dyslexic learners may have with mathematics and suggests ways of addressing these difficulties. The first chapters consider the theoretical background. The later chapters look at practical methods which may help dyslexic learners. The book is designed to be comprehensive and to help teachers support assistants and parents understand the learner and to learn a range of skills and thus develop confidence and competence in working with dyslexic pupils.

Teaching and Learning Early Number Ian Thompson, 2008-10-16 This richly varied text offers generous support for every aspect of the teacher's role while constantly reminding us that mathematical activity is not a de-contextualised skill that children possess but part of their identity, their way of being in the world, engaged with the world energetically and playfully, trying to make sense of it. Mary Jane Drummond, formerly of the Faculty of Education, University of Cambridge, UK. *Teaching and Learning Early Number* is a bestselling guide for all trainee and practising Early Years teachers and classroom assistants. It provides an accessible guide to a wide range of research evidence about the teaching and learning of early number. Major changes in the primary mathematics curriculum over the last decade, such as the National Numeracy Strategy, the Primary National Strategy, the Early Years Foundation Stage and the Williams Review, have greatly influenced the structure of this new edition. The book includes a new introductory chapter to set the scene, six further new chapters including *Mathematics through play*, *Children's mathematical graphics* and *Interview based assessment of early number knowledge*. Six completely rewritten chapters and two updated chapters. A new concluding chapter looking to the future. The chapters can be read in a standalone fashion and many are cross-referenced to other parts of the book where specific ideas are dealt with in a different manner. Issues addressed include new research on the complex process of counting and on children's written mathematical marks, counting in the home environment and play in the school setting, the importance of mathematical representations and of ICT in children's understanding of number, errors and misconceptions and the assessment of children's number knowledge.

Folens Maths for the Less Able Juliet Lewin, 2001 *Primary Mathematics Curriculum Guide* Harvey Blair, Pat Hughes, 2014-04-08 This is a curriculum guide that gives trainee teachers the opportunity to follow a tried and tested primary mathematics curriculum course. The text is easy to follow, up to date with good current practice and utilizes materials produced by the DfEE for teachers. It includes interactive tasks to enhance understanding, tasks to consolidate learning at the reader's own level and pace, a full bibliography for further reading, common misconceptions which the reader will find in children's work and a detailed look at the National Numeracy Strategy (NNS) and the mathematics National Curriculum. The text will provide a firm foundation for teaching mathematics to primary school children and give the reader genuine confidence in their teaching. The text has been piloted by students following a distance learning primary PGCE and revised in line with their comments. The intention of the book is to provide secure subject knowledge for mathematics alongside an

understanding of the ways in which children learn mathematics *The Really Useful Maths Book* Tony Brown, Henry Liebling, 2005-05-06 The Really Useful Maths Book is for all those who want children to enjoy the challenge of learning mathematics With suggestions about the best ways to use resources and equipment to support learning it describes in detail how to make learning the easy option for children An easy to follow comprehensive guide packed with ideas and activities it is the perfect tool to help teachers who wish to develop their teaching strategies This accessible and comprehensive book covers both the practical side of mathematics and the theory and practice of mathematics teaching Packed with ideas and activities it is the perfect tool to help you to improve your teaching strategies Topics covered include numbers and the number system what teachers need to know about interactive teaching calculating consolidating new ideas and developing personal qualities shape and space measures statistics and data handling consolidation and practice for accuracy speed and fluency The Really Useful Maths Book makes mathematics meaningful challenging and interesting It will be invaluable to practicing primary teachers subject specialists maths co ordinators student teachers mentors tutors home educators and others interested in mathematics education programmes Tony Brown was formerly the Director of ESCalate the UK Centre for Education in HE at the Graduate School of Education University of Bristol UK Henry Liebling formerly led Primary Mathematics Education at University College Plymouth Marjon UK **Meeting the Standards in Primary Mathematics**

Tony Brown, 2003-09-02 Written in response to the new ITT NC requirements for student teachers Comprehensive guide covering all aspects of primary teacher training relating to mathematics and the Standards required to reach qualified teacher status A strong and adoptable series for all ITT courses Informs teachers of exactly what they need to know to teach the subject and provides further information in continuing professional development issues There is increasing pressure on student teachers to develop their subject classroom competence in a short space of time this should help relieve the burden Part of the successful Meeting the Standards Series which students on BEd and PGCE courses and teachers will already be familiar with Includes a chapter dealing with the transition from teacher training to being a Newly Qualified Teacher

Making Connections in Primary Mathematics Sylvia Turner, Judith McCulloch, 2017-02-27 First published in 2004 Routledge is an imprint of Taylor Francis an informa company **The Trouble with Maths** Steve Chinn, 2004-03-25 This book will be invaluable to teachers classroom assistants and SENCos dealing with pupils who are underachieving in maths

Children's Mathematics Elizabeth Carruthers, Maulfry Worthington, 2006-08-07 In Case Study 5 a grassroots Children's Mathematics Network group the initiative supported the participants in their professional change by giving them a space for the detailed and joint consideration of children's mathematical thinking Another significant feature of this initiative is its focus on careful consideration and analysis of children's mathematics and the ways in which professionals can support and encourage the children's mathematical thinking and reasoning The standard of the mathematical understanding thinking and reasoning that the displays revealed was far higher than the specified curriculum objectives for children of this age

Researching Effective CPD in Mathematics Education RECME project NCETM 2009 The review also plays great score by play based learning of a mathematical nature and makes specific recommendations regarding early mark making as a precursor to abstract mathematical symbolism Section 115 features children s mathematical graphics and emphasises The role of mark making in children s cognitive development is set out in the taxonomy Carruthers and Worthington 2006 The report recommends that local authorities leaders managers and head teachers should provide a culture with a significant focus on mathematical mark making and a learning environment that encourages children to choose to use their own mathematical graphics to support their mathematical thinking and processes The Williams Maths Review DCSF 2008 At the very heart of the success of the book is the authors ability to see mathematics through young children s eyes by listening to and reflecting on the constant efforts made by children to make sense of their world This is a liberating book which proposes that the teaching of mathematics could and should be a highly creative and enjoyable process Branwen Llewelyn Jones Early Years Consultant at PACE Ltd TACTYC Ground breaking To single out any one chapter would be unfair because there is something thought provoking and inspirational throughout If you want to expand your understanding upwards and outwards then get a copy soon Times Educational Supplement I first read Children s Mathematics Making Marks Making Meaning a couple of years ago and it had an immediate impact on my own thinking and teaching and the work I do with trainee teachers I m sure you will find it compelling reading too I think it has the potential to change in a fundamental way how we think about early mathematical development Lynne McClure Editor Math Coordinator s File Mathematics Association In their exceptionally readable and informative book Children s Mathematics Making Marks Making Meaning Carruthers and Worthington 2006 draw attention to one of the main goals of early years teaching that is to help children make links between the mathematics they have already encountered and continue to engage with at home and the more abstract mathematics of the school These authors suggest that by encouraging children to represent mathematical ideas in their own ways and crucially by talking to the pupils about the marks they have made we are given a window onto their thinking that may otherwise be inaccessible Liz Pumphrey NRICH This book draws on the authors many years of teaching children aged three to eight years and also on their extensive research with children in the home nursery and school The authors explain the development and range of young children s mathematical marks and visual representations showing how children make mental connections between their own early marks and subsequent abstract mathematical symbolism and go on to develop their own written methods Combining theory and practice this acclaimed book demonstrates how children s own mathematical graphics are highly creative and show deep levels of thinking The authors show how this is the key to success in school mathematics and to higher levels of achievement The authors are winners of TACTYC s 2003 Jenefer Joseph Award for the Creative Arts 3 8 awarded for their innovative work with children on mathematical graphics
