Yao, Lynn Diane Dierking, 2006 Comprehensive handbook for starting and running a small science center Communicating Science to the Public Leo Tan Wee Hin, R. Subramaniam, 2014-07-24 This book explores effective approaches for communicating science to the public in developing countries Offering multiple perspectives on this important topic it features 17 chapters that represent the efforts of 23 authors from eight countries Australia Bangladesh India Ireland New Zealand USA Singapore and South Africa Inside readers will find a diversity of approaches to communicate science to the public The book also highlights some of the challenges that science communicators science policy makers science teachers university academics in the sciences and even entrepreneurs may face in their attempts to boost science literacy levels in their countries In addition it shares several best practices from the developed world that may help readers create communication initiatives that can lead to increased engagement with science in communities in the Asia Pacific region and beyond Given the pervasive influence of science and technology in today's society their impact will only increase in the years to come as the world becomes more globalized and the economies of countries become more inter linked This book will be a useful source of reference for developing countries looking to tap into the potential of science for nation building and effectively engage their communities to better understand science and technology Supported by the Pacific Science Association Hawaii **The Museum in**

America Edward P. Alexander, 2000-01-01 The Museum in America captures the life stories of thirteen visionary museum leaders who helped transform the 19th century's collection of curios into today's institution of public service and education. In the lively style of *Museum Masters*, Alexander recounts the stories of pioneers in American history, science, art, and general museums. For anyone interested in the history of the museum, this volume is the place to start. *Exploratorium Cookbook*, 1984 A collection of recipes or instructions for projects designed to demonstrate aspects of topics such as the physics of sound and plant behavior. *The Exploratorium* Hilde S. Hein, 1990 Examines the conceptualization, development, and impact of this San Francisco science museum founded by Frank Oppenheimer, brother and colleague of Robert Oppenheimer. Both a conceptual analysis of art and perception in the explanation of science and a history of Oppenheimer's struggle to gain acceptance for his ideas. Annotation copyrighted by Book News, Inc., Portland, OR. *The Art of Curiosity* Exploratorium, 2019-10-29 Fifty of the world's most creative people share their stories and inspirations in this volume created by the Exploratorium science museum. What do music visionary Brian Eno, kinetic sculptor Theo Jansen, science writer Mary Roach, Mythbuster Adam Savage, and Pulitzer-winning journalist Thomas Friedman have in common? They are all game changers: scientists, artists, entertainers, and activists who revolutionized their fields with bold new perspectives and approaches, and they all had transformative, course-setting experiences at the Exploratorium science museum, the San Francisco landmark visited by a million people a year in person and by millions more online. Join them and forty-five more brilliant thinkers and doers in a wonderfully playful, insightful, and sometimes incredibly moving journey to see how you too can harness your powers of observation, inquiry, and engagement to be the change you want to see in the world, regardless of who you are or what you do. Interviewees and subjects include Oscar-winning Sound Designer Walter Murch on observation, Laurie Anderson on art as a way of knowing, Memory Expert Elizabeth Loftus on how we learn, Oliver Sacks on perception, Mary Roach on how she learned to ask the right questions, Adam Savage on the fun of finding things out, Mickey Hart on the art of playing to learn and learning to play, California Governor Gavin Newsom on the importance of science, Community activist Randy Carter on finding joy in the worst of places, and dozens more interviews, insights, and activities suggested by artists, scientists, poets, and politicians in a book that can help you become more creative and maybe just change the world.
