Exploring Digital Communication Language In Action Routledge Introductions To Applied Linguistics:

Exploring Digital Communication Caroline Tagg, 2015-04-10 Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics primarily designed for those beginning postgraduate studies or taking an introductory MA course as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative practice to theory approach with a back to front structure. This leads the reader from real world problems and issues through a discussion of intervention and how to engage with these concerns before finally relating these practical issues to theoretical foundations. Exploring Digital Communication aims to discuss real world issues pertaining to digital communication and to explore how linguistic research addresses these challenges. The text is divided into three sections: Problems and practices, Interventions and Theory, each of which is further divided into two subsections which reflect linguistic issues relating to digital communication. The author seeks to demystify any perceived divide between online and offline communication, arguing that issues raised in relation to digital communication throw light on language use and practices in general and thus linguistic interventions in this area have implications not only for users of digital communication but for linguists' general understanding of language and society. Including relevant research examples, tasks and a glossary, this textbook is an invaluable resource for postgraduate and upper undergraduate students taking New Media or Communication Studies modules within Applied Linguistics and English Language courses.

Indexing 'Chav' on Social Media Emilia Di Martino,2022-09-15 The book sets out to examine the concept of chav providing a review of its origins its characterological figures the process of enregisterment whereby it has come to be recognized in public discourse and the traits associated with it in traditional media representations The author then discusses the chav label in light of recent re appropriations in social network activity particularly through the video sharing app TikTok and subsequent commentary in the public sphere She

traces the evolution of the term from its use during the first decade of the twenty first century to make sense of class status and cultural capital to its resurgence and the ways in which it is still associated with appearance in gendered and classed ways She then draws on recent developments in linguistic anthropology and embodied sociocultural linguistics to argue that social media users draw on communicative resources to perform identities that are both situated in specific contexts of discourse and dynamically changing challenging the idea that geo sociocultural varieties and mannerisms are the sole way of indexing membership of a community This volume contends that equating chav with underclass in the most recent uses of the concept on social networks may not be the whole story and the book will be of interest to sociocultural linguistics and identity researchers as well as readers in anthropology sociology British studies cultural studies identity studies digital humanities and sociolinguistics
