Teaching New Literacies in Grades 4-6 Barbara Moss, Diane Lapp, 2009-11-24 Upper elementary students encounter a sometimes dizzying array of traditional and nontraditional texts both in and outside of the classroom This practical handbook helps teachers in grades 4-6 harness the instructional potential of fiction poetry and plays informational texts graphic novels digital storytelling Web based and multimodal texts hip hop advertisements math problems and many other types of texts Twenty four complete lessons promote critical literacy skills such as comprehending analyzing and synthesizing information and using writing to communicate new ideas and pose questions Snapshots of diverse classrooms are accompanied by clear explanations of the research base for instruction in each genre Ready to use reproducibles are included **Applied Groundwater Modeling** Mary P. Anderson, William W. Woessner, Randall J. Hunt, 2015-08-13 This second edition is extensively revised throughout with expanded discussion of modeling fundamentals and coverage of advances in model calibration and uncertainty analysis that are revolutionizing the science of groundwater modeling The text is intended for undergraduate and graduate level courses in applied groundwater modeling and as a comprehensive reference for environmental consultants and scientists engineers in industry and governmental agencies Explains how to formulate a conceptual model of a groundwater system and translate it into a numerical model Demonstrates how modeling concepts including boundary conditions are implemented in two groundwater flow codes MODFLOW for finite differences and FEFLOW for finite elements Discusses particle tracking methods and codes for flowpath analysis and advective transport of contaminants Summarizes parameter estimation and uncertainty analysis approaches using the code PEST to illustrate how concepts are implemented Discusses modeling ethics and preparation of the modeling report Includes Boxes that amplify and supplement topics covered in the text Each chapter presents lists of common modeling errors and problem sets that illustrate concepts **Synergy** Eric Dion CD MBA PhD, 2017-12-12 The comprehensive approach has been a new emerging phenomenon within the field of strategic studies national security and international defence Former NATO secretary general Rasmussen posited that this approach not only makes sense it is necessary Yet with the rise of asymmetric warfare and the emergence of new constructs the comprehensive approach is not supported by a necessary framework model or theory Indeed if the military alone is unable to solve the root cause of conflicts then other elements of national and international power must collaborate more closely In Synergy A Theoretical Model of Canada's Comprehensive Approach author senior lecturer and strategic management consultant Eric Dion proposes a theoretical model for this new approach How can such an integrated decision making model be constructed for the comprehensive approach Where and when who and with whom what how why and to what effect can such a model be employed Synergy answers these questions with an integrated theoretical model constructed of six management dimensions the situational context the sociocultural the organisational structure the strategic policies the systemic processes and the synergy dynamics Together these six dimensions

fundamentally represent what would be the basic constructs for a more integrated theoretical model of the comprehensive approach Taking a strategic management perspective on the comprehensive approach can open new perspectives within the field of national security and defence a field traditionally dominated by political science and international relations In the end synergy appears to better explain the complex dynamics at play within the comprehensive approach
