actually becomes part of that plan Designed to save you hundreds of hours and many thousands of dollars the Compendium Workbook pairs hundreds of devices with device evaluation forms dramatically streamlining the task of considering and evaluating workplace engineering controls Combined with a free membership to our unique website [www MedicalSafetyBook com](http://www.MedicalSafetyBook.com) which gives you hundreds of one click links for ordering device samples and evaluation materials the Compendium is not just a book it is a comprehensive safer device evaluation system Preventing transmission of infection in the workplace has become one the most important considerations of the current work environment According to the CDC exposures to blood and other bodily fluids occur across a wide variety of occupations Health care workers emergency response public safety personnel and other workers can be exposed to blood and other potentially infectious materials OPIM through needlestick and other sharps injuries mucous membrane and skin exposures The pathogens of primary concern are the human immunodeficiency virus HIV hepatitis B virus HBV and hepatitis C virus HCV Workers and employers are urged no required to take advantage of available engineering controls and work practices to prevent exposure to blood and other body fluids On Nov 6 2000 President Bill Clinton signed into law the bloodborne pathogens standard BBP by way of the Needlestick Safety and Prevention Act The law was necessitated by both the lack of adequate engineering controls and the failure of the healthcare industry to take advantage of those controls that did exist Workers and employers are not actually urged to comply they are truly and legally required to comply yet many still don t It is just too difficult and time consuming and expensive But failure to comply can be extraordinarily expensive In 2000 when the bill was signed the Bloodborne Pathogen Standard initially compiled 1991 was brought into the 21st century strengthened and given teeth OSHA which provided the BBP is also responsible for its enforcement All facilities with even a single at risk employee are required to adhere to the standard which includes creation and annual revision of an exposure control plan a comprehensive customized plan for each of those facilities which includes evaluation or consideration of every available engineering control designed to prevent such an exposure Failure to comply can be catastrophic not only to an injured employee but to the facility itself In 2010 OSHA levied fines exceeding 100 000 on 164 facilities that were out of compliance The number one defect cited by OSHA in these cases was failure to have a complete and up to date exposure control plan This publication makes adherence to one of the most grotesquely difficult parts of the standard relatively easy Recent talk in the industry has rumored that as tools like this one facilitating compliance become universally available OSHA will become even less tolerant of those who fail to comply Add this Compendium edition to your library and to your exposure control now Bring your exposure control plan up to date The Compendium of Infection Control Technologies Workbook Introduction [ADA OSHA Training](#) American Dental Association,2023-08-08 Navigating OSHA training requirements can be daunting This book outlines the OSHA standards pertinent to dental health care personnel and details the training necessary to comply with them It outlines the history of the Occupational Safety and Health Administration what happens when they visit your office and how to select a safety
