

# THE EXTENDED RESPONSE TASK

The process for researching and writing an Extended Response task for Senior Physics in the Persuasive Exposition Genre  
These notes were written by Dr Richard Walding, Griffith University

For detailed description of how to complete a Persuasive Exposition ERT in Physics go to "How to Write a Deadly ERT" at [seniorphysics.com/physics/ert.html](http://seniorphysics.com/physics/ert.html)

The Extended Response Task (ERT) requires you to respond to a science question, statement, circumstance or issue. It is essentially non-experimental, but will require research and use of secondary (someone else's) data – although you may have to draw on primary (your own) experimental data.

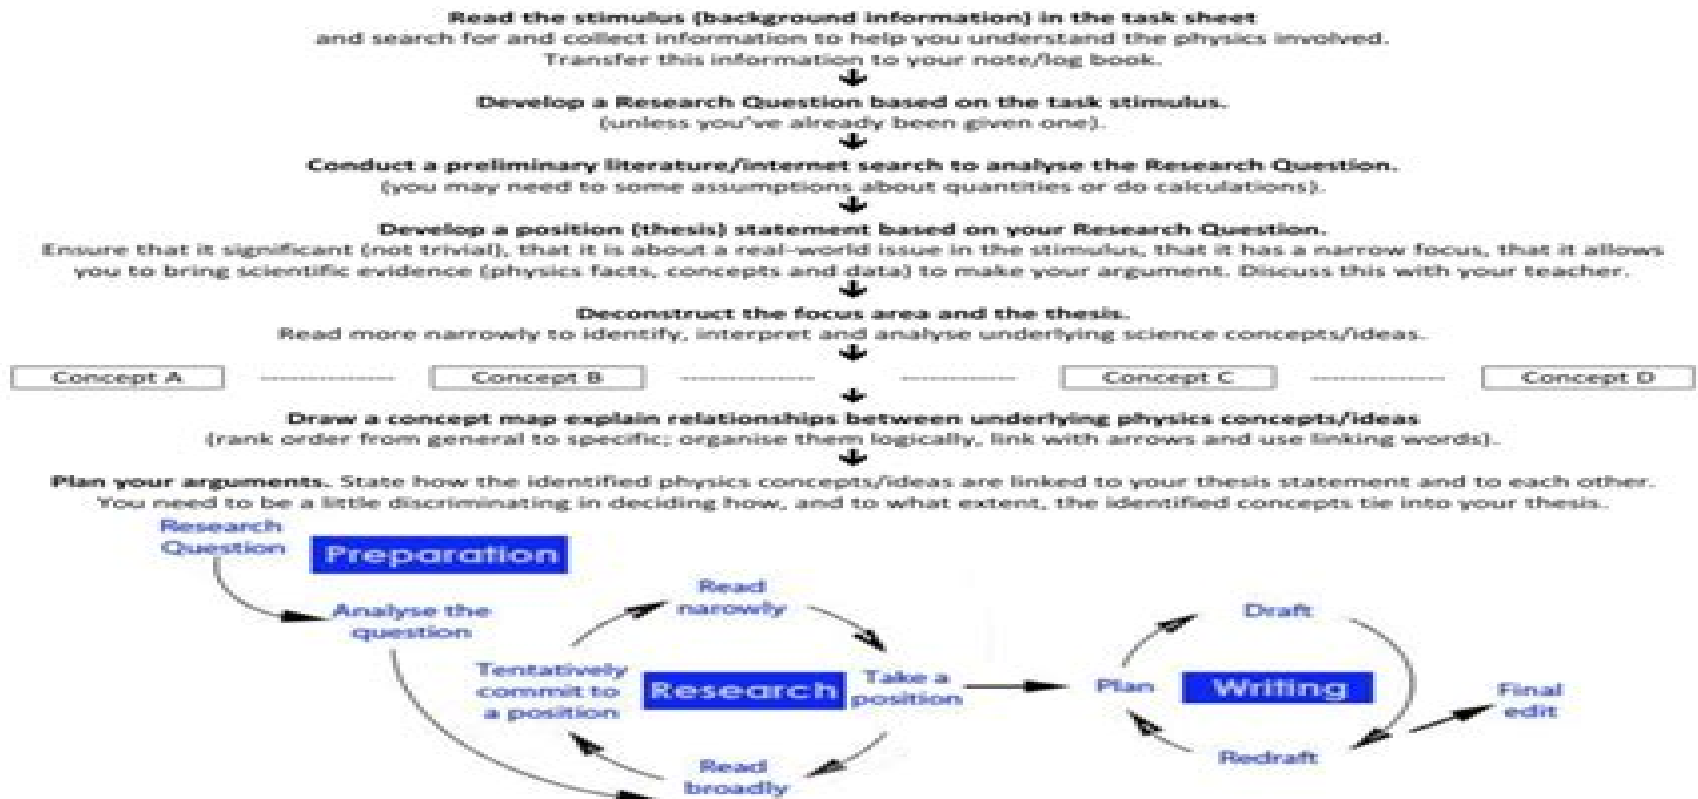

The genre *Persuasive Exposition* requires you to argue for or against a statement, usually called a 'thesis' statement, and provide evidence to justify your claims. In Senior Physics, the evidence will consist mainly of physics principles, concepts, facts, ideas and data.

## THE RESEARCH & WRITING PROCESS

There are two phases to preparing your ERT: The Research Phase, and the Writing Phase.

### 1. RESEARCH PHASE

The following flow chart and schematics give a suggested approach to the completion of the task.
