Extraction Ecologies and the Literature of the Long Exhaustion Elizabeth Carolyn Miller, 2021-10-12 How literature of the British imperial world contended with the social and environmental consequences of industrial mining The 1830s to the 1930s saw the rise of large scale industrial mining in the British imperial world Elizabeth Carolyn Miller examines how literature of this era reckoned with a new vision of civilization where humans are dependent on finite nonrenewable stores of earthly resources and traces how the threatening horizon of resource exhaustion worked its way into narrative form Britain was the first nation to transition to industry based on fossil fuels which put its novelists and other writers in the remarkable position of mediating the emergence of extraction based life Miller looks at works like *Hard Times* *The Mill on the Floss* and *Sons and Lovers* showing how the provincial realist novel's longstanding reliance on marriage and inheritance plots transforms against the backdrop of exhaustion to withhold the promise of reproductive futurity She explores how adventure stories like *Treasure Island* and *Heart of Darkness* reorient fictional space toward the resource frontier And she shows how utopian and fantasy works like *Sultana's Dream* *The Time Machine* and *The Hobbit* offer imaginative ways of envisioning energy beyond extractivism This illuminating book reveals how an era marked by violent mineral resource rushes gave rise to literary forms and genres that extend extractivism as a mode of environmental understanding

The Absent Presence of the State in Large-Scale Resource Extraction Projects Nicholas A. Bainton, Emilia E. Skrzypek, 2021-08-03

Standing on the broken ground of resource extraction settings the state is sometimes like a chimera its appearance and intentions are misleading and for some actors it is unknowable and incomprehensible It may be easily mistaken for someone or something else like a mining company for example With rich ethnographic material this volume tackles critical questions about the nature of contemporary states studied from the perspective of resource extraction projects in Papua New Guinea Australia and beyond It brings together a sustained focus on the unstable and often dialectical relationship between the presence and the absence of the state in the context of resource extraction Across the chapters contributors discuss cases of proposed mining ventures existing large scale mining operations and the extraction of natural gas Together they illustrate how the concept of absent presence can be brought to life and how it can enhance our understanding of the state as well as relations and processes forming in extractive contexts thus providing a novel contribution to the anthropology of the state and the anthropology of extraction The Absent Presence fills a major gap in our knowledge about the relationship between states and companies at a time when resource extraction seems to be more contested than ever Bainton and Skrzypek have curated an incredibly impressive volume that should be read by all those interested in exploring corporate and state power and the ever present impacts of extraction A highly recommended read Professor Deanna Kemp Director of the Centre for Social Responsibility in Mining The University of Queensland Countless books have been written on the sovereign state and how it imposes a particular kind of order on economic and social interactions What is original and compelling about this collection is the portrait of how two very different states converge when it comes to extractive ventures From the presumption of exclusive sovereignty over mineral resources to the bargains that are struck with major often global corporations and the relative indifference to environmental impacts there is a remarkable consistency in the patterns that are referred to as state effects These effects are brought from the background to the foreground in this book through the blending of creative and critical thinking with detailed empirical research Tim Dunne Pro Vice Chancellor and Professor of International Relations The University of Queensland This brilliant and intriguing title provides a timely contribution to understanding the actual functions and strategies of state and state like institutions in resource arenas The dialectics of presence absence and its

refractions at different levels and scales of government allow the authors to go beyond stereotypes about the strong weak failed or corrupt state highlighting more commonalities than expected between Papua New Guinea and Australia and even New Caledonia Dr Pierre Yves Le Meur Anthropologist Senior Researcher French National Research Institute for Sustainable Development Joint Research Unit SENS Knowledge Environment Society **Science Progress in the Twentieth Century**,1906 Knowledge-Based Systems in Biomedicine and Computational Life Science Tuan D. Of Modern Extraction Terra Schwerin Rowe,2022-10-20 Predominant climate change narratives emphasize a global emissions problem while diagnoses of environmental crises have long focused a modern loss of meaning value and enchantment in nature Yet neither of these common portrayals of environmental emergency adequately account for the ways climate change is rooted in extractivisms that have been profoundly enchanted The proposed critical petro theology analyzes the current energy driven climate crisis through critical gender race decolonial and postsecular lenses Both predominant narratives obscure the entanglements of bodies and energy how energy concepts and practices have consistently delineated genres of humanity and how energy systems and technologies have shaped bodies Consequently these analytical and ethical aims inform an exploration of alternative embodied energies that can be attended to in the disrupted time space of energy intensive extractive capitalism **Open Science by Design** National Academies of Sciences, Engineering, and
