Extreme Environmental Events ,2011 Extreme Environmental Events ,2011 *Extreme Environmental Events*
Robert A. Meyers,2010-11-03 *Extreme Environmental Events* is an authoritative single source for understanding and applying the basic tenets of complexity and systems theory as well as the tools and measures for analyzing complex systems to the prediction monitoring and evaluation of major natural phenomena affecting life on earth These phenomena are often highly destructive and include earthquakes tsunamis volcanoes climate change and weather Early warning damage and the immediate response of human populations to these phenomena are also covered from the point of view of complexity and nonlinear systems In 61 authoritative state of the art articles world experts in each field apply such tools and concepts as fractals cellular automata solitons game theory network theory and statistical physics to an understanding of these complex geophysical phenomena Discontinuity, Nonlinearity, and Complexity Lev Ostrovsky,Dimitry Volchenkov,2018-07-01 The interdisciplinary journal publishes original and new results on recent developments discoveries and progresses on Discontinuity Nonlinearity and Complexity in physical and social sciences The aim of the journal is to stimulate more research interest for exploration of discontinuity complexity nonlinearity and chaos in complex systems The manuscripts in dynamical systems with nonlinearity and chaos are solicited which includes mathematical theories and methods physical principles and laws and computational techniques The journal provides a place to researchers for the rapid exchange of ideas and techniques in discontinuity complexity nonlinearity and chaos in physical and social sciences No length limitations for contributions are set but only concisely written manuscripts are published Brief papers are published on the basis of Technical Notes Discussions of previous published papers are welcome Topics of Interest Complex and hybrid dynamical systemsDiscontinuous dynamical systems i e impulsive time delay flow barriers Nonlinear discrete systems and symbolic dynamicsFractional dynamical systems and controlStochastic dynamical systems and randomnessComplexity self similarity and synchronization in nonlinear physicsNonlinear phenomena and physical mechanismsStability bifurcation and chaos in complex systemsHydrodynamics turbulence and complexity mechanismNonlinear waves and solitonDynamical networksCombinatorial aspects of dynamical systemsBiological dynamics and biophysics *Climate Change and Mycotoxins*
Luis M. Botana,María J. Sainz,2015-09-25 *Climate Change and Mycotoxins* highlights the importance of the continuous study of climate change impacts on mycotoxigenic fungi and their toxins in food and feed crops Changing climate conditions across every geographical zone greatly affect rainfall temperature and concentration of greenhouse gases leading to loss in yield and quality of food crops In outstanding contributions the authors compile current evidence on the influence of climate change on mycotoxigenic fungi and mycotoxins in food crops pre and postharvest and during storage of food and animal feed The chemistry and biology of toxin production is revised and an outlook on control and prevention of the toxin s impact on food and animal feed is given The editors recommend this book to mycologists mycotoxicologists pathologists epidemiologists

toxicologists physicians veterinarians nutritionists the food and feed industries legislators analytical chemists microbiologists or students of these fields Unique compilation on the impact of climate change on mycotoxins based on observed trends over the last 10 years Special focus on the implications for food and feed safety Latest advances on prediction and prevention of mycotoxin threats to human and animal health About the Editors Luis M Botana Is a full Professor of Pharmacology at the University of Santiago from 2004 2012 director of the Department of Pharmacology and former Fogarty Fellow at the School of Medicine of the Johns Hopkins University He has been director of the European Reference Laboratory for Marine Toxins from 2004 to 2009 He is author of 25 international patents over 300 scientific papers and editor of 10 international books Mar a J Sainz Is an associate Professor of Agriculture and Forage Production and Conservation at the University of Santiago de Compostela She has been a visiting scientist at the Rothamsted Experimental Station and for ten years head of the department of Plant Production Her research interests focus on fungal pathogen detection and diagnostics mycorrhizal fungi in crop protection and production and mycotoxigenic fungi and mycotoxins on forage crops and animal feed

Mycotoxins in Food and Feed Pradeep Kumar, Madhu Kamle, Dipendra Kumar Mahato, 2023-01-20 Mycotoxins represent an assorted range of secondary fungal metabolites that extensively occur in numerous food and feed ingredients at any stage during pre and post harvest conditions Mycotoxin contamination in food and feed cause acute and chronic mycotoxicosis including teratogenic carcinogenic oestrogenic neurotoxic and immunosuppressive effects and several others health issues Mycotoxins in Food and Feed presents an overview of all the major mycotoxins sources of production chemistry and biosynthesis occurrence in food and feed effect on agriculture effect on human health detection technique masked mycotoxins and management and control strategies Key Features Provides broad coverage of mycotoxins and their effects on food and feed Includes comprehensive information of occurrence chemistry detections methods and management strategies for each toxin Discusses the recent development in detection technologies for major mycotoxins Explores agricultural practices and post harvest management strategies for managing mycotoxin infestations

From Science to Society Benoît Otjacques, Patrik Hitzelberger, Stefan Naumann, Volker Wohlgemuth, 2017-08-23 This book presents the latest findings and ongoing research in connection with green information systems and green information communication technology ICT It provides valuable insights into a broad range of cross cutting concerns in ICT and the environmental sciences and showcases how ICT can be used to effectively address environmental and energy efficiency issues Offering a selection of extended contributions to the 31st International Conference EnviroInfo 2017 it is essential reading for anyone looking to expand their expertise in the area

Modeling and Monitoring Extreme Hydrometeorological Events Maftai, Carmen, Muntean, Radu, Vaseashta, Ashok, 2024-01-10 In a world experiencing increasingly intense hydrometeorological events driven by climate change the need for effective solutions is paramount Modeling and Monitoring Extreme Hydrometeorological Events presents a cutting edge exploration of the challenges posed by flash droughts and floods offering innovative methodologies and tools to address

these global issues Through a combination of computer modeling remote sensing artificial intelligence and case studies this book provides a comprehensive framework for understanding and mitigating the impacts of extreme hydrometeorological events It examines the rapid emergence of flash droughts which bring devastating consequences to agriculture water resources ecosystems and public health The book also delves into the complex dynamics of flash floods exploring their causes impacts and potential solutions With a focus on water management the book addresses knowledge gaps provides adaptation and mitigation strategies and emphasizes the importance of climate change considerations It aims to empower scientists policymakers professionals and educators to develop effective policies and decision making frameworks to combat the increasing risks posed by extreme hydrometeorological events Written by a diverse team of experts in hydrology hydrometeorology emergency management civil engineering and related fields this book offers valuable insights and practical tools for researchers professors graduate students policymakers and professionals

Disaster Management in the Complex Himalayan Terrains Shruti Kanga,Gowhar Meraj,Majid Farooq,Suraj Kumar Singh,Mahendra Singh Nathawat,2022-02-02 South Asia harboring the complex Himalayan terrains has over one fifth of the world s population and is recognized as the most hazard prone region of the world The exponential increase in population with the consequent pressure on natural resources and continued high rates of poverty and food insecurity also makes this region the most vulnerable region to hazards in the world as far as the impacts of climate change are concerned Over the last century the climatic trends in South Asia have been observed to be characterized by increasing air temperatures and an increasing trend in the intensity and frequency of extreme events IPCC 2014 has reported that the Himalayan highlands shall face significant warming over the next century The increasing frequency of natural hazards due to the impacts of climate change in the Himalayas calls for efficient management and policymaking in these regions which can only be implemented by the local governments through an established science based robust action plan This edited volume focuses on the management of natural hazards using innovative techniques of spatial information sciences and satellite remote sensing It contains chapters from eminent researchers and experts in the field of hazard management remote sensing and GIS The primary focus of this book is to replenish the gap in the available literature on the subject by bringing the concepts theories and practical experiences of the specialists and professionals in this field together in one volume to help students researchers and policymakers to address issues concerning management and policy implications of natural hazards in the complex Himalayan region

Safety and Reliability of Complex Engineered Systems Luca Podofillini,Bruno Sudret,Bozidar Stojadinovic,Enrico Zio,Wolfgang Kröger,2015-09-03 Safety and Reliability of Complex Engineered Systems contains the Proceedings of the 25th European Safety and Reliability Conference ESREL 2015 held 7 10 September 2015 in Zurich Switzerland Including 570 papers on theories and methods in the area of risk safety and reliability and their applications to a wide range of industrial civil and social sectors this book will be of interest to academics and professionals involved or

interested in aspect of risk safety and reliability in various engineering areas **Frontiers in Environmental Science - Editor's Picks 2021** Martin Siegert,2021-11-24 *The Rise of Quantum Computing in Industry 6.0 Towards Sustainability* C Kishor Kumar Reddy,Anindya Nag,Mariya Ouaisa,Bharat Bhushan,Marlia Mohd Hanafiah,2024-12-13 This book offers a thorough examination of the revolutionary capabilities of quantum computing in the context of Industry 6 0 with a specific emphasis on its use in disaster management The aim of this proposed book is to clarify how quantum computing in conjunction with other Industry 6 0 technologies might profoundly transform our comprehension preparedness and response to natural disasters In the era of Industry 6 0 there is a pressing need for creative solutions to tackle the increasing difficulties caused by natural disasters This proposed book explores the distinctive characteristics and capacities of quantum computing that make it especially suitable for improving disaster management procedures The proposed book examines the potential of quantum algorithms to enhance resource allocation enhance forecasting precision and facilitate real time decision making in the context of rapidly changing crisis scenarios This proposed book proposes a comprehensive strategy for catastrophe management that is adaptable robust and efficient by utilizing quantum computing in conjunction with other advanced technologies This proposed book offers a comprehensive analysis of the specific ways in which quantum computing can be utilized in different areas of disaster management It covers topics such as risk assessment early warning systems and infrastructure resilience By examining real world case studies and examples readers can acquire valuable insights into the practical implementation and effectiveness of quantum powered crisis management solutions showcasing their potential impact This proposed book acknowledges the ethical consequences of implementing sophisticated technologies in disaster management It focuses on important ethical and societal factors including data privacy algorithmic bias and fair access to technology The aim is to ensure that quantum powered solutions prioritize ethical principles and cater to the requirements of all communities This proposed book provides readers with a clear understanding of the potential areas for future study innovation and collaboration in the field of quantum powered crisis management systems *Innovative Approaches in Environmental Health Management* Sylvester Chibueze Izah,Matthew Chidozie Ogwu,2025-03-25 This book aims at professionals and academics in the fields of environmental science public health sustainable development and policy studies It also serves as a reference for policymakers and industry experts working on environmental and health related issues

Natural and Anthropogenic Disasters M.K. Jha,2010-07-20 The major challenges of the 21st century faced by human beings are how to achieve water security food security energy security and environmental security Owing to enhanced natural anthropogenic disasters worldwide these challenges become much more complicated and daunting especially for developing countries Therefore it is important to highlight the risk of different disasters as well as the modern tools and techniques for minimizing disaster incidence and losses Disaster management being highly multidisciplinary in nature a comprehensive book dealing with different aspects of disaster management and encompassing important disasters faced by

humankind is presently not available This book is an attempt to fulfill this gap It provides clear comprehensive and up to date information about different facets of disaster management along with salient case studies The book highlights the current status of disaster management focusing on developing nations discusses vital issues such as climate change and sustainable development modern approaches and tools techniques and the challenges of and future R D needs for sustainable disaster management
