Lost in Transition Aaron D. Purcell, 2023-08-18 In *Lost in Transition* Removing Resettling and Renewing Appalachia Aaron D Purcell presents a thematic and chronological exploration of twentieth century removal and resettlement projects across southern Appalachia The book shares complex stories of loss and recollection that have grown and evolved over time This edited volume contains seven case studies of public land removal actions in Virginia Kentucky the Carolinas and Tennessee from the 1930s through the 1960s Some of the removals include the Tennessee Valley Authority and the Norris Basin Shenandoah National Park and the New River the Great Smoky Mountains National Park and the Keowee Toxaway Project in northwestern South Carolina Each essay asks key questions How did governmental entities throughout the twentieth century deal with land acquisition and removal of families and communities What do the oral histories of the families and communities particularly from different generations tell us about the legacies of these removals This collection reveals confrontations between past and present federal agencies and citizens and the original accounts of removal and resettlement and contemporary interpretations The result is a blending of practical historical concerns with

contemporary nostalgia and romanticism which often deepen the complexity of Appalachian cultural life *Lost in Transition* provides a nuanced and insightful study of removal and resettlement projects that applies critical analysis of fact mythology and storytelling It illustrates the important role of place in southern Appalachian history This collection is a helpful resource to anthropologists folklorists and Appalachian studies scholars and a powerful volume of stories for all readers who reflect upon the importance of place and home *Mammoth Cave* David Rains Wallace,2003 **The Longest Cave** Roger W. Brucker,Richard A. Watson,1987-02-16 The dramatic story of several generations of cavers whose exciting and dangerous explorations in Kentucky s limestone labyrinths culminated in the big connection between the Flint Ridge Cave System and Mammoth Cave forming the longest cave in the world *Mammoth Cave* Melanie Miller-Inman,2023-01-30 The author s family has over the years fallen in love with Mammoth Cave National Park which is located near Cave City Kentucky The love of this wonderful and mysterious place started back in the 1960s with the author s father J David Miller who was there as a teen trapping deer with the United States government and spread to the author s mother Judy then on to the author and her husband Tony in between the years of 1980 and 2004 The author wishes to share with her readers her family s love of an amazing place in southwestern Kentucky *Trapped!* Robert K. Murray,Roger W. Brucker,2025-04-15 When small town farmer and cave dweller Floyd Collins became trapped in a southern Kentucky cave in early 1925 the sensationalism and hysteria of the rescue attempt generated America s first true media spectacle making Collins s story one of the most prominent of the century The crowds that gathered outside Sand Cave turned the rescue site into a carnival Collins s plight was front page news throughout the country hourly bulletins interrupted radio programs and Congress recessed to hear the latest word With a new foreword by Tina Landau bookwriter and director of the musical *Floyd Collins* as well as a new afterword by Roger W Brucker *Trapped* is a tense adventure and a brilliant historical re creation of the past a tale as enthralling today as it was when the event took place over one hundred years ago **Mapping the Darkness** Kenneth Miller,2023-10-03 WINNER OF THE 2024 ASJA BOOK AWARD BIOGRAPHY HISTORY NAMED A BEST BOOK OF THE YEAR 2023 BY THE NEW YORKER NEW YORK TIMES EDITOR S CHOICE SELECTION From award winning journalist Kenneth Miller comes the definitive story of the scientists who set out to answer two questions Why do we sleep and How can we sleep better A century ago sleep was considered a state of nothingness even a primitive habit that we could learn to overcome Then an immigrant scientist and his assistant spent a month in the depths of a Kentucky cave making nationwide headlines and thrusting sleep science to the forefront of our consciousness In the 1920s Nathaniel Kleitman founded the world s first dedicated sleep lab at the University of Chicago where he subjected research participants including himself to a dizzying array of tests and tortures But the tipping point came in 1938 when his cave experiment awakened the general public to the unknown and vital world of sleep Kleitman went on to mentor the talented but troubled Eugene Aserinsky whose discovery of REM sleep revealed the astonishing activity of the dreaming brain and William Dement a jazz bass

playing revolutionary who became known as the father of sleep medicine Dement in turn mentored the brilliant maverick Mary Carskadon who uncovered an epidemic of sleep deprivation among teenagers and launched a global movement to fight it Award winning journalist Kenneth Miller weaves together science and history to tell the story of four outsider scientists who took sleep science from fringe discipline to mainstream obsession through spectacular experiments technological innovation and single minded commitment Readers will walk away with a comprehensive understanding of sleep and why it affects so much of our lives A propulsive utterly engrossing history None of it is simple and all of it is captivating The New York Times Mapping the Darkness offers two narratives at once a sweeping journey of discovery about dreams sleep and the terra incognita of unconsciousness and a wake up call about the dangers of chronic exhaustion It s time Mr Miller tells us to take our sleep back The Wall Street Journal Science and Ecosystem Management in the National Parks William L.

Halvorson, Gary E. Davis, 2023-01-10 Our national parks are more than mere recreational destinations They are repositories of the nation s biological diversity and contain some of the last ecosystem remnants needed as standards to set reasonable goals for sustainable development throughout the land Nevertheless public pressure for recreation has largely precluded adequate research and resource monitoring in national parks and ignorance of ecosystem structure and function in parks has led to costly mistakes such as predator control and fire suppression that continue to threaten parks today This volume demonstrates the value of ecological knowledge in protecting parks and shows how modest investments in knowledge of park ecosystems can pay handsome dividends Science and Ecosystem Management in the National Parks presents twelve case studies of long term research conducted in and around national parks that address major natural resource issues These cases demonstrate how the use of longer time scales strongly influence our understanding of ecosystems and how interpretations of short term patterns in nature often change when viewed in the context of long term data sets Most importantly they show conclusively that scientific research significantly reduces uncertainty and improves resource management decisions Chosen by scientists and senior park managers the cases offer a broad range of topics including air quality at Grand Canyon interaction between moose and wolf populations on Isle Royale control of exotic species in Hawaiian parks simulation of natural fire in the parks of the Sierra Nevada and the impact of urban expansion on Saguaro National Monument Because national parks are increasingly beset with conflicting views of their management the need for knowledge of park ecosystems becomes even more critical not only for the parks themselves but for what they can tell us about survival in the rest of our world This book demonstrates to policymakers and managers that decisions based on knowledge of ecosystems are more enduring and cost effective than decisions derived from uninformed consensus It also provides scientists with models for designing research to meet threats to our most precious natural resources If we can learn to save the parks observe Halvorson and Davis perhaps we can learn to save the world
